

# Index

## A

Absolute entropy, 27  
Absolute temperature, 27  
Acceleration, 6  
Acceleration equation, 4  
Adiabatic process, 25  
Anisotropic, 3  
Anti de Sitter spacetime, 12  
Apparent horizon, 8

## B

Backreaction, 54, 65  
Baryon Acoustic Oscillations, 10  
Baryonic matter, 10  
Bekenstein entropy, 30  
Bekenstein entropy-area bound, 35  
Bekenstein entropy-mass bound, 35  
Bekenstein-Hawking formalism, 68  
Bekenstein system, 35  
Big crunch, 18  
Big freeze, 18  
Big rip, 18  
Black hole, 15  
Boundary, 22  
Bulk viscosity, 54  
Bulk viscous pressure, 54

## C

Causal, 8  
Chaplygin gas, 16  
Closed surface, 22  
Closed system, 22  
Comoving coordinate system, 3  
Concordance model, 17  
Copernican principle, 2

Cosmic fluid, 2, 74  
Cosmic microwave background, 2  
Cosmological constant, 11  
Cosmological constant problem, 11  
Cosmological horizons, 8  
Cosmological principle, 2  
Cosmological thermodynamics, 32  
Cosmology, 1  
Coupling, 14  
Creation pressure, 56  
Critical density, 6  
Curvature, 3  
Cutoff, 14

## D

Dark energy, 10  
Dark matter, 10  
de Sitter, 12  
Deceleration, 6  
Deceleration parameter, 5  
Density parameter, 5  
Diathermic wall, 23  
Dissipative fluids, 51  
Dissipative processes, 51  
Dust, 7  
Dynamic cosmological horizons, 73

## E

Eckart theory, 52  
Einstein field equations, 4  
Einstein-Hilbert action, 5  
Energy conservation equation, 4  
Energy-Momentum tensor, 4  
Enthalpy, 25  
Entropy, 26

Epoch, 2  
 Equation of state, 7  
 Equilibrium, 21  
 Equilibrium surface, 23  
 Event horizon, 8  
 Extensive properties, 23

**F**

False vacuum, 55  
 First law of thermodynamics, 24  
 First order theory, 52  
 Flat FLRW universe, 73  
 Four-velocity, 4  
 Friedmann equation, 4  
 Friedmann–Lemaître–Robertson–Walker  
 Universe, 3  
 Fundamental observers, 3

**G**

Generalized Chaplygin gas, 17  
 Generalized Hawking Temperature, 35  
 Generalized second law, 29  
 Geodesic world lines, 2

**H**

Hawking temperature, 30  
 Heat death, 18  
 Holographic dark energy, 14  
 Holographic principle, 14, 34  
 Homogeneous, 2  
 Homogeneous system, 23  
 Horizon and flatness problems, 8  
 Horizon area theorem, 29  
 Horizon thermodynamics, 32  
 Hot Big Bang model, 1  
 Hubble constant, 5  
 Hubble horizon, 10  
 Hubble law, 2  
 Hubble parameter, 5

**I**

Inflationary universe, 31  
 Infrared cutoff, 15  
 Inhomogeneous cosmological models, 65  
 Inhomogeneous system, 23  
 Intensive properties, 23  
 Interaction, 14  
 Internal energy, 24  
 Irreversible, 22  
 Irreversible thermodynamics, 51

Isentropic, 54  
 Isolated system, 22  
 Isothermal process, 27  
 Isotropic, 2  
 Israel–Stewart theory, 52

**K**

K-essence, 12

**L**

Lemaître–Tolman–Bondi model, 66

**M**

Macroscopic properties, 22  
 Mass function, 67  
 Matter action, 5  
 Maximum entropy principle, 26  
 Metric, 3  
 Metric tensor, 4  
 Microscopic properties, 22  
 Minkowski spacetime, 30  
 Misner–Sharp–Hernandez mass, 32  
 Modified Chaplygin gas, 17  
 Modified gravity models, 11  
 Modified Hawking Temperature, 34  
 Modified matter models, 12

**N**

Neutrinos, 7  
 Non-Bekenstein system, 35  
 Nonconservation, 56  
 Nonequilibrium thermodynamics, 51  
 Noninteracting HDE, 34  
 Non-relativistic matter, 7, 74  
 Null geodesic congruences, 9  
 Null surface, 10

**O**

One-form, 70  
 Open system, 22

**P**

Particle horizon, 8  
 Particle number, 53  
 Perfect fluid, 3  
 Phantom fluid, 10  
 PLANCK, 2  
 Planck mass, 15

Power law, 7  
Pressureless universe, 7  
Principle of least action, 5  
Proper distance, 3

## Q

Quasistatic process, 25  
Quintessence, 12

## R

Radial null geodesics, 9  
Radiation pressure, 7  
Raychaudhuri equation, 4  
Redshift parameter, 3  
Relativistic matter, 74  
Reversible, 22  
Ricci scalar, 5  
Rindler horizons, 30

## S

Scale factor, 3  
Second law of thermodynamics, 26  
Second order theory, 52  
Semiclassical, 29  
Singularity, 1  
Slow-roll parameter, 13  
Spacetime, 12  
Spatially flat, 6  
Specific entropy, 53  
Spherically-symmetric, 2  
Spontaneous process, 26  
Standard cosmological model, 1  
Steady state theory, 14

Strong energy condition, 11  
Supernovae Type Ia, 10  
Surface gravity, 30, 68  
Surroundings, 22  
System, 22

## T

Temperature, 24  
Thermal equilibrium, 23  
Thermodynamic equation of state, 23  
Thermodynamic equilibrium, 23  
Thermodynamics, 21  
Thermodynamic system, 22  
Third law of thermodynamics, 27  
Timelike geodesics, 3  
True vacuum, 55  
Tunneling approach, 32

## U

Ultraviolet cutoff, 14  
Unified first law of thermodynamics, 69  
Universal thermodynamics, 32  
Unruh temperature, 30

## W

Weyl's postulate, 3  
WMAP, 2

## Z

Zero-point energy, 11  
Zeroth law of thermodynamics, 24
