

Index

A

- Aspiration, 69
 - approach, 79
 - length, 70

B

- Barber indenter, 188
- Barber's method, 358
- Barber's theorem, 355, 357
- Barnett–Lothe matrix, 337
- Berkovich indenter, 45
- Biot's theory, 285
- Biphasic theory, 288
- Boltzmann superposition principle, 232
- Borodich's theorem, 47, 228
- Borodich–Galanov (BG) method, 193
- Borodich's self-similar solution, 39–41
- Boussinesq's problem, 3, 110, 323, 324, 327, 337
- Boussinesq's solution, 5, 32, 42
- Bulychev–Alekhin–Shorshorov (BASH) relation, 20, 21, 23, 25, 33, 34, 37, 208, 209
 - generalized, 33, 208, 225, 347, 358

C

- Cattaneo–Mindlin theory, 133, 134, 136
- Cerruti's problem, 110
- Coefficient of consolidation, 287, 292, 293, 301, 309, 314, 315, 318, 319
- Compressibility degree, 89, 93
- Contact
 - frictional, 215
 - frictionless, 3
 - oscillating, 266

- self-similar, 39
 - frictional, 226
- sticking (no-slip), 197
- torsional
 - bonded, 107
 - with friction, 136
- unilateral, 6
- Contact area, 22
 - arbitrary, 34
 - decreasing, 248, 268
 - elliptical, 328
 - shape factor, 334, 336
 - harmonic capacity, 31, 150
 - harmonic capacity radius, 33, 36
 - increasing, 235, 245, 246
 - maximum, 275
 - minimum, 274
 - periodic, 270
 - possessing a single maximum, 247
 - semi-fixed annular, 187
 - shape factor, 33, 334
 - square, 34
 - time-dependent, 248, 268
 - triangular, 34
- Contact boundary condition, 7
- Contact depth, 21, 25
- Contact force, 3
 - zero load, 180
- Contact pressure, 4, 37, 41
- Contact radius, 3
 - zero load, 180
- Contact stiffness
 - normal, 144
 - tangential, 143
- Coulomb's law of friction, 129, 133, 216
- Creep function, 232
 - indentation

normalized, 246, 262
 poroelastic
 reduced, 304–306, 313

D

Darcy's law, 287, 290
 Depth-sensing indentation, 10
 Derjaguin–Muller–Toporov (DMT) model,
 176, 181
 Diffusion coefficient, 289, 290
 Dirac's function, 325
 Dundurs' constant, 132

E

Elastically similar materials, 132
 Elastic modulus, 2
 coordinate, 355
 Engineering elastic constants, 3
 Equilibrium equations, 324

F

Force-displacement relationship, 9, 18
 tangential, 142, 143

G

Galin–Sneddon solution, 8, 9, 159, 163, 171,
 186, 261
 Galin's solution, 13, 43, 250, 278
 Galin's solution, 43
 Galin–Willis theorem, 328, 331, 348
 Gap function, 130
 monomial, 137, 141
 paraboloidal, 139
 spherical, 139, 142
 Golden–Graham method, 279
 Green's function, 6, 327, 329
 vector, 113, 327, 328
 Greenwood's function, 262
 Griffith's energy balance, 167
 equation, 152

H

Heaviside's function, 236, 294
 Hertzian contact pressure, 42, 96, 315, 343
 Hertzian force-displacement relationship,
 10, 17
 Hertz's problem, 318, 343
 Hertz's theory, 10, 18, 99, 100, 139, 177, 249,
 278, 280, 314, 315

Hertz's theory, 139
 Hooke's law, 2, 323

I

Incompressible case, 145, 205–209
 Incremental
 indentation, 30
 method, 198, 216
 Indentation
 adhesive, 172
 area-controlled, 279
 displacement-controlled, 169, 238, 239,
 243, 257, 259, 279
 sinusoidally-driven, 237, 242–244,
 254–257
 flat-ended, 329
 circular, 329
 elliptical, 331
 force-controlled, 168, 240, 241, 243
 oscillating, 275, 278, 281
 sinusoidally-driven, 239, 243, 244,
 258, 259
 non-adhesive, 171
 oscillating steady-state, 270
 rebound, 259
 transverse, 363
 Indentation compliance
 complex, 236, 237
 creep, 233–236, 241, 245, 252, 254, 266
 equilibrium, 234, 237
 instantaneous, 234, 245, 268
 Indentation creep, 235
 poroelastic/biphasic, 306, 314
 Indentation depth, 3
 maximum, 24
 zero load, 180
 Indentation elastic modulus, 4
 equilibrium, 237
 instantaneous, 241, 245, 261, 264
 Indentation modulus
 circular, 330, 331, 341
 complex, 236, 237, 258, 281
 conical, 358–361
 elliptical, 334–336, 342, 343
 paraboloidal, 346–350, 352, 355
 Indentation relaxation, 235
 poroelastic/biphasic, 309, 316
 Indentation relaxation modulus, 233–236,
 239, 252, 253, 260, 266
 equilibrium, 234, 281
 instantaneous, 234
 Indentation stiffness, 20

- incremental, 20, 23, 31, 178, 224, 225
 - I**
 - Indenter
 - annular, 53, 147
 - narrow, 60
 - canonical, 250

 - in-plane, 108
 - out-of-plane, 108
 - Shear traction, 108
 - Shtaerman’s solution, 14
 - Signorini conditions, 8, 29
 - Sink-in depth, 21, 24

Standard viscoelastic solid, 242–244, 256, 264–266
 model, 241, 256, 272, 276
Stick-slip radius, 217, 218, 223, 224, 226
Stick-zone radius, 138, 144
Storage indentation compliance, 237, 240, 241
 incomplete, 241, 243, 258
Storage indentation modulus, 237
 incomplete
 modified, 255–257
Strains, 286, 324
Stresses, 324
 effective, 288
 total, 286
Stress intensity factor, 151
Surface deflection, 4, 9, 37
Surface energy, 184
Surface influence function, 113, 327, 336, 337, 339, 342, 343, 345, 348, 350, 352, 356, 359, 363–367
Surface stretch, 89

T

Tangential shift, 133
 without slip, 133
 with slip, 134
Tangential traction, 133
Torque, 107

V

Vickers indenter, 45

W

Willis' solution, 327–329, 343, 348
Work of adhesion, 151

Y

Young's modulus, 3
