- Age-friendly communities, 11, 12, 191, 209
- Age-friendly transport system, 224, 226
- Ageing
bodies, 23, 24, 30, 32–34, 38, 43
and death, 41, 42, 80
in the print media, 35
sexualities, 51–72
- Age-in-place, 189
- Ageism, 4, 22, 24, 25, 33, 46, 52, 55–57, 60, 64, 66–68, 260, 261, 274
- Ageist discourse, 26, 37, 55, 67, 68
- Ageist stereotypes, 45, 236, 267, 268
- Age-related diseases, 61, 131
- Age-related vulnerability, 132
- Age-segregated institutions, 259, 272
- Alzheimer's disease (AD), 6, 8, 132, 136, 137, 139
- Anti-ageing industry, 33
- Anti-ageing strategies, 267
- Antibody titre, 112, 114–117
- As asexual, 33, 34
- Asexual old age, 60
- Attention, 23, 30, 31, 41, 44, 60, 71, 79, 100, 116, 133, 135, 137, 143, 193, 209, 213, 214, 256, 258, 265

B

- Barriers
 - to cycling, 231–236
 - to participation, 162
 - to using the bus, 238–239
 - to walking, 231–236
- Behaviour change, 9, 141, 142, 145, 158, 166, 168
- Benefits of growing older, 265
- Bereavement, 7, 108, 117, 118, 158, 174
- Biomedical model, 30, 32
- Blame, 28, 261
- Brain changes, 132
- Bronfenbrenner's ecological systems model, 223, 226
- Bus use, 226, 237, 238

C

- Careful management of their body, 40
- Caregiver stress, 108, 113–116
- Carism, 225
- Catecholamines, 109, 112, 114
- Centre for Architecture and the Built Environment (CABE), 236, 237
- Challenge the narrative of older age as decline and loss, 52
- Chronic diseases, 6, 7
- Chronic stress, 109, 110, 113–119, 121, 122
- Cognitive activity, 8, 30, 134, 136–137
- Cognitive change, 6, 133, 171
- Cognitive decline, 8, 133–136, 138, 139, 174, 258

- Cognitive functioning, 4, 133, 136
 - Collaborative arts activities, 270
 - Collective resistance, 275, 276
 - Community arts, 268, 269
 - Community-Based Participatory Research (CBPR), 193–196, 198, 202
 - Community mapping workshops, 190, 197, 198, 202, 208
 - Community transport, 226, 228, 237–238, 241–242, 244
 - Concept of frailty, 158, 159
 - Conical model of mobility, 223
 - Conscientiousization, 193, 194, 213
 - Contentment, 265, 266
 - Context-Mechanism-Outcome (CMO) configurations, 169
 - Conversation analysis (CA), 6, 82–86
 - Cortisol, 109, 112–115
 - DHEAS ratio, 116, 118, 119, 121
 - Creative reminiscence, 266
 - Creative writing groups for older people, 271
 - Critical gerontological theory, 222
 - Critical social psychology, 4–6, 21, 22, 51, 58–61
 - Culturally diverse groups, 199
- D**
- Death, vii, 12, 30, 31, 36, 41–43, 79, 80, 84, 85, 95, 98, 159, 160, 221, 261
 - Death of Ivan Ilyich, The*, 264
 - Deliberative dialogue workshops, 190, 197, 206

Dementia, v, vi, vii, viii, 4, 7, 8, 34, 37, 113–115, 131–145, 171, 258, 261

Dementia risk, 133–140, 142–144

Dependency, 26, 34–36, 55, 256

Dependency ratio, 25

Depression, vi, 8, 116, 118, 119, 134, 141, 158, 160, 172, 173, 175, 177

Desexualised, 52, 53

Design of interventions for frailty, 158

Difficult decisions, 95

Discourse, vi, 4, 5, 23, 24, 26–29, 31–45, 53, 55–57, 60, 67, 68, 71, 83, 199, 206, 254, 255

Discourse analysis, 24, 35, 36, 38, 82, 83

Discourse of dependence, 25, 26, 36

Discursive approaches to ageing, 5

Displaying empathy, 81, 86

Doctorable, 91

Dominant cultural narratives of the journey, the family, and decline, 271

Dominant social constructions, 22

Dying, 79–81, 98

E

Ecological framework models, 222

Empathic display, 84, 85, 87, 91, 93

Empathy, vii, 6, 79–100, 173

End-of-life care, 80, 98

Environmental psychology, 12, 13

Equitable solutions, 215

Ethnicity, 5, 37, 62, 68, 70, 71, 201

Exercise or physical activity, 121

F

Fear of “vegetating,” 40

Fear of crime, 233

Feedback forums, 190, 197, 198, 202, 211, 212

Forced relocation, 193, 196–198

Formulations, 85

Frailty, viii 157

 phenotype, 158, 159

 prevalence, 160, 172

 profile, 159
