

Index

A

Absolute magnitude reasoning, 6–8
Advisory committees, 118
Analytical tool, 318
Angles, 189
Approximate number system (ANS),
17, 81, 91
Arabic notation, 362
Arithmetic sign and space, 88
Arithmetic skill, 363–366
Australian Curriculum Mathematics, 174
Australian school system, 342
Axiomatic system, 199

B

Battista hypothesizes, 187
Battista's Length Learning Progression, 152
Benchmark strategy, 11, 13, 14, 19
BI's reasoning, 218
Bidirectional analysis, 352
Boxspring, 288, 290, 291, 294, 295
Buildings tasks, 313–316, 318–322

C

Calculations, 285
Carol's students, 248
Challenging task, 311, 335
Children's natural propensity, 42
Classroom teachers in situ, 173
Classroom-based intervention research, 173
Cognition based assessment (CBA), 151–152
AW's ruler reasoning, 158
component, 152

counting for length measurement, 160
geometric measurement, 157
non-measurement and measurement
reasoning, 153, 154
RC, 153
TMM, 158
unit-length iteration, 162
Cognitive complexity, 311
Cognitive demand
doing mathematics, level of, 318
procedures with connections, level of, 318
procedures without connections, level of,
318
Cognitive psychology, 171, 173
Cognitive science, 118, 122, 124, 140
Collaborative visualization tasks, 313
Collaborative work, 333
Common Core State Standards for
Mathematics (CCSS-M), 57, 67,
69, 121
Communication challenge, 288
Communication failures, 289
Communication tasks, 299
Compatibility effects, 84, 105
Conceptual Change in Childhood (1985), 347
Conceptual understanding of measurement,
32, 35, 39
Confirmatory factor analysis (CFA),
123, 128, 138
Congruence, 236–238, 243, 249
Contextual and mathematical information, 261
Conversion top, 292
Couch, 290, 296–298
Counting and cardinality, 121
Counting tasks, 88
