- characteristic polynomial, 64
- conditional Gaussian likelihood, 66, 74, 99
- conditional heteroscedasticity, 41, 48, 85
- conditions
  - A.1 – A.3, 171
  - C.1 – C.5, 100
  - D.1 – D.2, 111
  - D.3, 114
  - M.1 – M.3, 143
  - M.4 – M.9, 161
  - N.1 – N.4, 116
  - N.3', 173
  - Q.1 – Q.4, 75
  - S.1 – S.2, 30, 88, 94, 98
  - S.3, 33
  - T.1 – T.3, 166
- contraction, 29
- Cramér–Wold decomposition, 47
- doubly infinite sequence, 14
- e.a.s (exponentially fast almost sure convergence), 26–28
- efficiency, 80, 164, 165
- EGARCH model, 60–61, 90
  - asymptotic normality of QMLE, 130
  - consistency of QMLE, 104
  - invertibility, 95
  - stationarity, 90
- ergodic theorem
  - for  $\mathbb{C}(K, \mathbb{R}^{d' \times d'})$ -valued sequences, 24
  - for  $\mathbb{C}(K, \mathbb{R}^{d'})$ -valued sequences, 19
  - for  $B$ -valued sequences, 22
  - for real-valued sequences, 17
  - subadditive, 31, 52
- ergodicity, 13–17
- exponentially fast almost sure convergence (e.a.s.), 26–28
- extremal index, 171
- forward iterates, 30, 103
- Fourier
  - coefficient, 199, 201
  - frequency, 71, 189
  - series, 69
- Frobenius norm, 24
- GARCH(1, 1) model, 187
  - heavy tails, 188
  - inconsistency of Whittle estimator, 191
  - limit behavior of SACF, 190
  - limit behavior of SACVF, 190
  - non-Gaussian limit of Whittle estimator, 191
  - Whittle estimator, 189
- GARCH( $p, q$ ) model, 48–60
  - identifiability, 76
  - least-squares estimator, 73
  - limit behavior of QMLE, 75
  - limit behavior of Whittle estimator, 81
  - QMLE, 74
  - Whittle estimator, 81
- Gaussian quasi likelihood, 64, 66, 74, 99
- general conditionally heteroscedastic time series model, 85
  - asymptotic normality of MLE, 163
  - asymptotic normality of QMLE, 118

- consistency of MLE, 143
- consistency of QMLE, 100
- invertibility, 94
- MLE, 142
- non-Gaussian limit of QMLE, 174
- nonstationary, 131
- QMLE, 99
- simulation, 89
- stationarity, 88
- gross error model, 152
- heavy-tailed distribution, 41, 56–61, 171, 188, 193
- identifiability, 49, 64, 76, 104, 105, 154
- inconsistency, 83, 148, 191
- integrated GARCH model (IGARCH), 60
- invariant set, 14
- invertibility, 46, 93, 98
- Karamata's theorem, 209
- Kolmogorov's 0–1 law, 14
- Kullback–Leibler discrepancy, 153
- Laplace density, 154
- least-squares estimator, 68, 73
- leverage effect, 43, 49, 60
- likelihood
  - approximate, 66, 74, 99, 142
  - conditional Gaussian, 66, 74, 99
  - Gaussian, 64
  - Gaussian quasi, 64, 66, 74, 99
  - reduced, 65
- linear process
  - causal, 17, 46
  - non-causal, 17
- Lipschitz function, 29
- log–return, 37
- logarithmic moment, 26
- MA( $\infty$ ) model, 46
- martingale central limit theorem, 117, 169
- martingale transform, 170
  - central limit theorem when tails are heavy, 171
- matrix norms, 23
- maximum likelihood estimator (MLE), 142
  - asymptotic normality, 163
  - consistency, 146
  - inconsistency, 148
  - misspecification, 148
- misspecification, 148
- mixing, 171, 180
- multivariate regular variation, 172
- norm
  - Frobenius, 23, 24
  - in  $\mathbb{C}(K, \mathbb{R}^{d'})$ , 18
  - matrix operator, 24
- NYSE Composite, 38
- periodogram, 71, 189
- Polish space, 29
- power transfer function, 70
- quasi likelihood, 64, 66, 99, 152
- quasi maximum likelihood estimator (QMLE), 64, 74, 99, 152
  - asymptotic normality, 65, 75, 118
  - consistency, 65, 75, 100, 153
  - non-Gaussian limit, 174
- r-fold iterate, 29
- random element, 13
  - simple, 20
- random map, 51
- random matrix, 24, 52
- random product, 28
- random scale, 144
- robustness, 153
- sample autocorrelation function (SACF), 40
  - limit behavior, 190
- sample autocovariance function (SACVF), 40
  - limit behavior, 190

- scale model, 152
- scale parameter, 49, 51
- spectral
  - density, 69
  - distribution function, 69
  - radius, 54
  - representation theorem, 69
- stable distribution, 172, 174, 190
- state space form, 50
- stationarity, 13–17, 38
  - covariance, 57
  - weak, 57
- stochastic recurrence equation
  - (SRE), 29–36, 188
  - absolute regularity, 180
  - linear, 50
  - perturbed, 33
  - polynomial linear, 179
  - simulation, 30
  - stationary solution, 30
  - strong mixing, 180
- stochastic volatility models, 61
- strong mixing, 171, 180
- Student  $t_\nu$  density, 147
- stylized facts of financial time series, 38
- subadditive ergodic theorem, 31, 52
- subexponential, 61
- tail index, 42, 57, 83, 188
- time series, 37
- top Lyapunov exponent, 51, 91, 179
- uniform
  - convergence, 17–19
  - strong law of large numbers, 18
- volatility, 41
- Volterra series, 59
- weak convergence in  $\mathbb{C}(K, \mathbb{R}^{d'})$ , 24
- white noise process, 40, 48, 80, 194
- Whittle estimator, 71, 81, 189
  - asymptotic normality, 72, 81
  - consistency, 72, 81
  - inconsistency, 191
  - non-Gaussian limit, 191
- Yule–Walker estimator, 194

## Lecture Notes in Statistics
