

Index

- amplified pressure CR system (see injection systems)
- auto-ignition (see ignition)
- Bernoulli equation 18, 54, 60, 61, 86, 87
- blob-method (see primary break-up modeling)
- boundary layer 75, 76, 139, 165
- break-up
 - length 5, 7, 16, 112, 120
 - modeling (see primary/secondary break-up modeling)
 - primary 11, 16, 24, 85
 - regimes of liquid drops 8
 - regimes of liquid jets 5
 - secondary 11, 24
 - time 112, 115, 121, 127, 129, 177
 - zone 16
- cavitation 17, 18, 19, 20, 21, 37, 88, 90, 98, 99, 100, 102, 103, 105, 232
 - number 21
- cavitation-induced break-up (see primary break-up modeling)
- coalescence (see droplet coalescence)
- collision (see droplet collision)
- common rail injection 32, 33
- conservation equations 49
 - conservation of energy 53, 61, 70, 80
 - conservation of mass 49, 55, 80
 - conservation of momentum 52, 56, 70, 80
- continuity equation (see conservation of mass)
- continuous thermodynamics 145
- continuum 47
- controlled auto-ignition (CAI) 254, 278
- diffusion flame 227
- direct injection
 - diesel engines 32, 226
 - gasoline engines 41, 242
- direct numerical simulation (DNS) 66
- discharge coefficient 88, 110
- drag coefficient (see droplet drag)
- droplet
 - coalescence 169
 - collision 11, 169
 - collision modeling 172, 220
 - collision regimes 169
 - drag 136
 - drag coefficient 136, 138
 - drag modeling 136
- droplet deformation and break-up model (DDB) (see secondary break-up modeling)
- droplet evaporation 139
 - multi-component 144
 - single-component 140
- dual-mode operation (see HCCI)
- eddy viscosity 71
- Einstein notation 49
- energy equation (see conservation equations)
- enhanced TAB model (see secondary break-up modeling)

- Euler equation 60
Eulerian description 47, 48
Eulerian-Eulerian description 221
Eulerian-Lagrangian description 83, 212
evaporation (see droplet evaporation)
exhaust gas recirculation 232, 242, 246, 263, 268, 272
- Favre-averaging 67, 69
flash-boiling 24, 158
full-cone spray (see spray)
- gamma-function 146
grid
dependencies 211
spray adapted grid 214
- HCCI 253
chemistry 256
dual-mode operation 255, 266, 268, 270, 279
emission behavior 261
high temperature oxidation 256, 260, 276
influence parameters 270
air excess ratio 275
compression ratio 270
engine speed 275
exhaust gas recirculation 272
fuel composition 275
homogeneity 278
inlet air temperature 274
variable valve timing 271
low temperature oxidation 256, 257, 276
mixture formation 264
negative temperature coefficient 256, 259
high temperature oxidation 260
hollow-cone spray (see spray)
homogeneous charge compression ignition (see HCCI)
- ignition 197
auto-ignition 197
laser-induced 252
spark-ignition 200
delay 197, 227, 231, 268
index notation (see Einstein notation)
- injection
direct injection 32, 41, 226, 242
direct injection spark ignition 41
main injection 232
multiple injection 230, 231
multi-point injection 38, 39
port fuel injection 38
post injection 233
pre injection 231, 232
pressure modulation 239
pressure-swirl injector 24, 25, 27, 42, 109
pulsed injection 265
rate 35
rate shaping 230, 232
single-point injection 38, 39
injection systems 32
amplified pressure CR system 238
common rail injection 32, 33
piezo injectors 234
unit injector system 34
unit pump system 36
- Kelvin-Helmholtz break-up (see secondary break-up modeling)
knock 243, 246, 249, 250, 253, 268, 273
k- ϵ model 73, 106
- Lagrangian description 47, 48
Laplace number 182
large eddy simulation 66
law of the wall 78
low temperature oxidation 257
- mass conservation (see conservation equations)
material derivative 47, 48
main injection (see injection)
maximum entropy formalism (MEF) 92
Miller cycle 230
momentum equation (see conservation equations)
Monte-Carlo method 82, 215
multiple injection (see injection)
multi-point injection (see injection)
- Navier-Stokes equations 70
negative temperature coefficient 197, 256, 259

-
- nozzle
 - k-factor 38
 - sac hole nozzle 37
 - types 32, 37, 38, 40, 42
 - variable nozzle concept 236
 - Nusselt number 141, 150, 192
 - Ohnesorge 5
 - diagram 5
 - number 6, 126, 182
 - penetration length (see spray penetration)
 - piezo injectors (see injection systems)
 - port fuel injection (see injection)
 - post injection (see injection)
 - Prandtl number 79, 150
 - turbulent Prandtl number 71, 79, 165
 - Prandtl mixing-length model 72
 - pre-injection (see injection)
 - premixed peak 227, 231, 232
 - pre-spray 25, 114, 133
 - pressure modulation (see injection)
 - pressure-swirl atomizer 24, 25, 27, 42, 109
 - primary break-up (see break-up)
 - primary break-up modeling
 - blob-method 86, 130, 131, 132
 - cavitation-induced break-up 98, 100
 - distribution functions 90
 - maximum entropy formalism (MEF) 92
 - sheet atomization model 109, 133, 135
 - turbulence-induced break-up 94, 100
 - pulsed injection (see injection)
 - rate shaping (see injection)
 - Rayleigh-Taylor break-up (see secondary break-up modeling)
 - Reynolds
 - number 6
 - number (droplet collision) 170
 - averaged Navier-Stokes equations 66
 - averaging 67
 - decomposition 66
 - stress tensor 69, 71
 - stress models 75
 - RNG k- ϵ model 75
 - sac hole nozzle (see nozzle)
 - Sauter mean diameter 14, 27
 - Schmidt number 150
 - secondary break-up (see break-up)
 - secondary break-up modeling 114
 - droplet deformation and break-up model (DDB) 122, 131, 132, 135, 137
 - enhanced TAB model 119
 - Kelvin-Helmholtz model 125, 130, 131, 132
 - phenomenological models 115
 - Rayleigh-Taylor model 128, 130, 132
 - Taylor-Analogy break-up 116, 132, 133, 136
 - shear velocity 77
 - sheet atomization model (see primary break-up modeling)
 - Shell model 198
 - Sherwood number 143, 150
 - single-point injection (see injection)
 - soot-NO_x trade-off 229, 253
 - Spalding transfer number 142, 149
 - spark-ignition (see ignition)
 - spray
 - angle 13, 86, 96, 99, 118
 - break-up zone 16
 - core length 8, 15
 - full-cone 10, 90
 - hollow-cone 23, 25, 26, 41, 91, 109
 - penetration length 11, 13
 - Sauter mean diameter 14
 - wall impingement (see wall impingement)
 - equation 81
 - wall interaction 29
 - stochastic parcel method 82, 215
 - stratified charge 243, 244, 246
 - air-guided technique 248
 - spray-guided technique 249
 - wall-guided technique 247
 - stress tensor 59, 60
 - Reynolds stress tensor 69, 71
 - substantial derivate (see material derivate)
 - swirl 248
 - Taylor number 126
 - Taylor-Analogy break-up (see secondary break-up modeling)
 - thermal energy equation 65
