

Subject Index

- 3D model matching, 285
- 3D reconstruction, 46, 645

- active appearance model, 568
- active contours, 503
- adaptive cooling schedule, 3
- affine alignment, 90
- affine flow, 220
- algorithms, 268

- B-spline, 398
- basis functions, 600
- Bayesian inference, 74, 414
- belief propagation, 119
- biological growth models, 107
- brain image analysis, 633

- canonical set, 316
- cardiac MRI, 398
- cartoon + texture decomposition, 382
- clustering, 34
- compositionality, 235
- computational efficiency, 539
- computerized tomography, 456
- concurrent stereo matching, 46
- conditional random field, 153
- consistent labeling, 203
- constraints, 503
- contextual information, 617
- convex optimization, 600
- convex relaxation, 171
- correspondence problem, 645
- curvature derivative and torsion, 645
- curve-based stereo, 645
- curve evolution, 439
- curve matching, 645

- data fitting, 633
- deformable models, 119
- denoising, 439
- diffeomorphic matching, 365
- direct Fourier method, 456
- discriminative random field, 153

- edge reconstruction, 645
- energy minimization, 268, 349, 398, 439
- expectation-maximization, 74, 90

- face modeling, 568
- factorization, 90
- fast Fourier transform, 74
- feature detection, 633
- feature reduction, 316
- Fisher information, 18
- free boundary, 365
- frequency interpolation, 456

- Gabor filters, 119
- Gaussian processes, 74
- generalization ability, 539
- generic shape learning, 251
- geodesic matching, 349
- geodesic shooting, 365
- global optimization, 600
- graph algorithms, 251
- graph cuts, 220, 268
- graph matching, 171
- graph spectra, 285
- graphical models, 235
- GRID model, 107

- hierarchical modeling, 251
- human brain growth analysis, 107

- image classification, 153
- image codes, 600
- image matching, 203, 316
- image noise, 46
- image reconstruction, 268
- image segmentation, 74
- incremental grouping, 301
- indexing, 285
- information geometry, 18
- information theory, 34
- InSAR, 268
- integral invariants, 414
- inverse compositional algorithm, 568
- ISOMAP, 398, 552

- kernel annealing, 34
- Lagrange optimization, 34
- large deformations, 349
- layered models, 427
- linear programming, 203
- Lipschitz regularity, 456
- local linear embedding (LLE), 552
- local image descriptors, 235
- local minima, 503
- logistic regression, 74
- machine learning, 187
- manifold learning, 398
- marked point process, 3
- Markov random fields, 74, 119, 153, 220
- matching, 503
- matching under occlusion, 316
- maximum likelihood estimation, 107
- maximum marginal approximation, 153
- MCMC, 153
- medial surfaces, 285
- medical imaging, 503
- mesh parameterization, 552
- metamorphoses, 349
- Meyer's G norm, 382
- minimal partition problem, 439
- minimization of high-order variation, 645
- missing data, 90
- morphable appearance models, 568
- motion layer, 220
- motion segmentation, 220
- MRI, 268
- MRI image analysis, 107
- multidimensional scaling, 552
- multilayer implicit representation, 439
- multiple view geometry, 645
- multiresolution, 349
- multivariate polynomials, 187
- negative Sobolev space, 382
- Newton's method, 365
- non-negative matrix factorization (NMF), 600
- nonparametric density estimation, 34
- non-rigid registration, 427
- nonparametric statistics, 119
- ODE, 349
- one-shot shape priors, 414
- optical flow, 349
- optimal control, 365
- optimization, 503
- pairwise clustering, 301
- parameter estimation, 153, 187
- Parzen windowing, 34
- pattern classification, 187
- pattern recognition, 187
- PCA, 600
- pdf divergence measure, 34
- phase unwrapping, 268
- photogrammetry, 645
- prior based image segmentation, 490
- prior knowledge, 503
- probabilistic image models, 74
- projective differential geometry, 645
- remote sensing, 503
- reverse-convex programming, 600
- reversible jump MCMC, 3
- rigid registration, 427
- saddle point approximation, 153
- scale-space image features, 316
- second order cone programming, 600
- segmentation, 119, 398, 427, 439, 503
- semidefinite programming, 171, 316
- sequential convex programming, 600
- shape, 503
- shape matching, 251
- shape templates, 414
- simplex, 503
- simulated annealing, 3
- slanted surfaces, 617
- snakes, 398
- sparse stereo, 645
- sparseness, 600
- spatial point process, 107
- spherical splines, 633
- stereo constraints, 645
- stereo correspondence, 46, 617
- stereo vision, 645
- stochastic approximation, 34
- subgradient projection method, 456
- subgraph matching, 171
- successive convexification, 203
- support vector machine, 539
- surface flattening, 552
- surface normal consistency, 617

- texons, 119
- texture, 119
- texture mapping, 552
- texture representation, 18
- third-order expansion, 645
- total variation, 456
- tracking, 203
- training method, 539
- transversality equation, 365
- variable exponent, 382
- variational image segmentation, 490
- variational methods, 382
- variational segmentation, 414
- video segmentation, 220, 301
- visual object categorization, 235
- wavelets, 349
