Bellenot, S.F.

1. Factorable bounded operators and Schwartz spaces, Proc. Amer. Math. Soc. 42(1974), 551-554.

Brudovskii, B.S.

1. Associated nuclear topology, mappings of type s , and strong nuclear spaces, Dokl. Acad. Nauk SSSR (English translation) 178(1968), 271-273.
2. s -type mappings of locally convex spaces, Dokl. Acad. Nauk SSSR (English translation) 180(1968), 15-17.

Chaney, J.

1. Banach lattices of compact maps, Math. Z. 129(1972), 5-19.

Cohen, J.S.

1. Absolutely p -summing, p -nuclear operators and their conjugates, Math. Ann. 201(1973), 177-200.

Cristescu, R.

1. Topological vector spaces (Noordhoff (1977)).

Crofts, G. (see Dubinsky, Ed.,)

1. Concerning perfect Fréchet spaces and diagonal transformations, Math. Ann. 182(1969), 67-76.

Crone, L., Dubinsky, Ed. and W.B. Robinson,

1. Regular bases in products of power series spaces, J. Functional Analysis, 24(1977), 211-222.

Crone, L. and W.B. Robinson,

1. Diameters and diagonal maps in Köthe spaces.
2. Every nuclear Fréchet space with a regular basis has the quasi-equivalence property, Studia Math. T.L11(1975), 203-207.

Cross, J.,

1. The strong dual of a strongly nuclear space need not be nuclear, Proc. Amer. Math. Soc. 57(2) (1976), 250.

Day, M.M.

1. Normed linear spaces (Springer-Verlag, Berlin, 1962).

De Grande-De Kimpe, N.

1. Generalized sequence spaces, Bull. Soc. Math. Belg. 23(1971), 123-166.
2. \wedge -mappings between locally convex spaces, Proc. Kon. Ned. Acad. v. Wet A74 (1971), 261-274.

Diestal, J. and R.H. Lohman,

1. Applications of mapping theorem to Schwartz spaces and projections, Michigan Math. J. 20(1973), 39-44.

Djakow P. and B.S. Mitiagin,

1. Modified construction of nuclear (F)-spaces without basis, Preprint.

Dollinger, M.B.

1. Nuclear topologies consistent with a duality, Proc. Amer. Math. Soc. 23(1969), 565-568.

Douglas, R.G.

1. Banach algebra techniques in operator theory (Acad. Press, New York and London, 1972).

Dragilev, M.M.

1. On regular bases in nuclear spaces, Amer. Math. Soc. Transl. (2) 93(1970), 61-82.

Dubinsky, Ed. (see Crofts, G., Retherford, J.R. and Ramanujan, M.S.)

1. Infinite type power series subspaces of finite type power series spaces, Israel J. Math. 15(1973), 257-284.

2. Infinite type power series subspaces of infinite type power series spaces, Israel J. Math. 20(1975), 359-368.
3. Concrete subspaces of nuclear Frechet spaces, Studia Math. T.L11 (1975), 209-219.

Dubinsky, Ed. and G. Crofts,

1. Nuclear maps in sequence spaces, Duke Math. J. 36(1969), 207-214.

Dubinsky, Ed. and M.S. Ramanujan,

1. On λ -nuclearity, Mem. Amer. Math. Soc. No.128(1972).
2. Inclusion theorems for absolutely λ -summing maps, Math. Ann. 192 (1971), 177-190.

Dynin, A.S. and B.S. Mitiagin,

1. Criterion for nuclearity in terms of approximate dimension, Bull. Acad. Polon. Sci. 8(1960), 535-540.

Ellis, A.J.

1. Linear operators in partially ordered normed vector spaces, J. London Math. Soc. 41(1966), 323-332.

Figiel, T.

1. Factorization of compact operators and applications to the approximation problem, Studia Math. 45(1973), 191-210.

Fremlin, D.H.

1. Tensor products of Archimedean vector lattices, Amer. J. Math. 94 (1972), 777-798.
2. Tensor products of Banach lattices, Math. Ann. 211(1974), 87-106.

Gel'fand I.M. and N. Ya. Vilenkin,

1. Generalized functions vol.4 (Acad. Press, New York, London, 1964).

Greub, W.H.

1. Linear Algebra

Grothendieck, A.

1. Topological vector spaces (Gordon and Breach, New York, London, Paris, 1973).
2. Produits tensoriels topologiques et espaces nucleaires, Mem. Amer. Math. Soc. 16(1955).

Hasumi, M.

1. The extension property of complex Banach spaces, Tôhoku Math. J. 109(1958), 135-142.

Holub, J.R.,

1. Tensor product mappings, Math. Ann. 188(1970), 1-12.
2. Integral operators in Banach spaces, Proc. Amer. Math. Soc. 29(1) (1971), 75-80.
3. Hilbertian operators and reflexive tensor products, Pacific J. Math. 36(1) (1971), 185-194.

Horváth, J.,

1. Topological vector spaces and distributions (Addison Wesley Publishing Comp., London, Ontario, 1966).
2. Locally convex spaces (Summer School on topological vector spaces, Edited by L. Waelbroeck, Lecture Notes in Math. 331, Springer-Verlag, 1973), 41-83.

Johnson, W.B.,

1. Factorizing compact operators, Israel J. Math. 9(1971), 337-345.

Kelley, J.L.,

1. Banach spaces with the extension property. Trans. Amer. Math. Soc. 72(1952), 323-326.

Kômura, T. and Y. Komura,

1. Über die Einbettung der nuklearen Räume in $(s)^A$, Math. Ann. 162(1966), 284-286.

Köthe, G.,

1. Topological vector spaces I (Springer-Verlag, Berlin, 1969).
2. Nuclear spaces (Lectures delivered at the University of California at Santa Barbara, 1969).
3. Über nukleare Folgenräume, Studia Math. T. XXX1 (1968), 267-271.
4. Stark nukleare Folgenräume, J. Faculty of Science, Univ. of Tokyo Sec. I, vol. XVII (1970), 291-296.
5. Nukleare (F)-und (DF)-Folgenräume, Theory of sets and Topology (1972), 327-332.

Levin, V.L.

1. Tensor products and functors in categories of Banach spaces defined by KB-lineals, Trans. Moscow Math. Soc. 20 (1969), 41-77.

Lindenstrauss, J. and H.P. Rosenthal,

1. The \mathcal{L}_p Spaces, Israel J. Math. 7 (1969), 325-349.

Lindenstrauss, J. and A. Pełczyński,

1. Absolutely summing operators in \mathcal{L}_p -spaces and their applications, Studia Math. 29 (1968), 275-326.

Mitiagin, B.S. (see N. Zebin and A.S. Dynin),

1. Approximative dimension and bases in nuclear spaces, Usp. Mat. Nauk 16[4] (1961), 73-132.

Mitiagin, B.S. and N. Zobin,

1. Contre exemple a l'existence d'un base dans un espace de Fréchet nucléaire, C.R. Acad. Sci. 279 (1974), 255-256, 325-327.

Mori, Y.,

1. Komura's theorem in $\lambda(P)$ -nuclear spaces, Math. Seminar Notes (Kobe Univ.) 5 (1977), 41-46.
2. On bases in $\lambda(P)$ -nuclear spaces, Math. Seminar Notes (Kobe Univ.) 5 (1977), 49-58.

3. An example of a $\lambda(P)$ -nuclear Fréchet space, Math. Seminar Notes (Kobe Univ.) 5(1977), 289-294.

Peressini, A.L. (see D.R. Sherbert),

1. Ordered topological vector spaces (Harper and Row, New York, 1967).

Peressini, A.L. and D.R. Sherbert,

1. Ordered topological tensor products, Proc. London Math. Soc. (3) 19(1969), 177-190.

Person, A.,

1. On some properties of p -nuclear and p -integral operators, Studia Math. T.XXXIII(1969), 213-222.

Pietsch, A.,

1. Nuclear locally convex spaces (Springer-Verlag, Berlin, 1972).

Ramanujan, M.S., (also see Dubinsky, Ed., and Terzioglu, T.,)

1. Power series spaces $\Lambda(\alpha)$ and associated $\Lambda(\alpha)$ -nuclearity, Math. Ann. 169(1970), 161-168.
2. Absolutely λ -summing operators, λ a symmetric sequence space, Math. Z. 114(1970), 187-193.
3. Generalized nuclear maps in normed linear spaces, J. Reine Angew Math. 244(1970), 190-197.

Ramanujan, M.S., and T. Terzioglu,

1. Diametral dimension of cartesian products, stability of smooth sequence spaces and applications, J. für reine ang. Math.

Randtke, D.,

1. Characterization of precompact maps, Schwartz spaces and nuclear spaces, Trans. Amer. Math. Soc. 165(1972), 87-101.
2. A factorization theorem for compact operators, Proc. Amer. Math. Soc. 34(1)(1972), 201-202.

3. Representation theorem for compact operators, Proc. Amer. Math. Soc. 37(2)(1973), 481-485.
4. A simple example of a universal Schwartz space, Proc. Amer. Math. Soc. 37(1)(1973), 185-188.
5. A structure theorem for Schwartz spaces, Math. Ann. 201(1973), 171-176.
6. On the embedding of Schwartz spaces into product spaces, Proc. Amer. Math. Soc. 55(1)(1976), 87-92.
