# Subject Index

## A

Absorption 302, 303  
Acrylics 2  
Active sampling 37, 39  
Adsorption 92–103, 111, 119–120  
Aerosols 71  
Air/water partition coefficient 67  
Algae 209, 210, 217, 224  
–, toxicity 266, 276  
Alkyl chain 58, 64–73, 76, 81  
Alkyl side chain 2, 3  
Anchovy 209, 210  
AOPWIN 88  
Atmospheric deposition 334

## B

BAF 201–224  
BBP 149, 150, 201–224, 246  
BCF 201–224  
Bioaccumulation 69, 201–224  
Bioavailability 201–206, 223, 328, 343  
Bioconcentration 68, 186, 201–207, 221, 222  
Bioconcentration factor 264  
Biodegradation 33, 72, 73, 90–97, 105, 107, 119  
Biomass 96–101, 106  
Biota to sediment accumulation factor (BSAF) 202, 208–212, 331  
Bis(2-ethylhexyl) phthalate (DEHP) 154, 165, 172, 201–222, 252  
Blowing off 41  
Blue mussels 209, 210  
BSAF 202, 208–212, 331  
Butyl benzyl phthalate (BBP) 149, 150, 201–224, 246

## C

Carcinogenic potential 310  
Cellulosics 2, 5  
Clams, geoduck 209, 210, 217, 224  
Clausius-Clapeyron equation 66, 186  
Clean Water Act 6

## Colloids 71

Column chromatography 46, 47  
Concentrations 190–194  
Confidence factors 184–188, 195  
Contamination 26, 27, 33, 49  
Crabs, Dungeness 209, 210, 212  
Cyanopropyl silicagel (CN) column 19

## D

Degradation rates 73, 186, 187  
Diazomethane 23  
Dibutyl phthalate (DBP) 142, 143, 172, 201–209, 213–222, 239  
Dietary study 280–282, 287, 291  
Diethyl phthalate (DEP) 137, 138, 201–208, 212–222, 236  
Dimethyl phthalate (DMP) 132, 133, 201–222, 234  
Di-*n*-nonyl phthalate (DnNP) 201–223  
Di-*n*-octyl phthalate (DnOP) 161, 162, 201–223  
Disposal 5  
Dogfish, spiny 209, 210, 218–221  
Dust 136, 141, 148, 164  
– fractionation 44

## E

Electron capture detection (ECD) 15  
Embryo 312  
Emissions 5, 77, 180–199  
Emulsion formation 65, 69  
Endocrine modulating effects 284–295  
EPA method 606 15  
– – 8060 15  
EPIWIN 88  
EQC model 74–79  
Estradiol 284–292  
Estrogenic effects 284–289  
Ethylchloroformate 23, 52  
Evaluative fate modelling 74  
Extraction, accelerated solvent 34, 37, 47, 49

- Extraction  
-, microwave assisted 33  
-, supercritical fluid 34, 47  
-, ultrasonic 33, 37, 47, 49
- F**  
Fecundity, endocrine modulation 289, 291  
Feminization 284  
Fertility 311  
Fish, toxicity 266, 282  
Flame ionization detection (FID) 15  
Flatfish 209  
Flounder, starry 209, 210  
Fugacity 130, 172
- G**  
Gel permeation chromatography 46, 48, 49  
Gonadal somatic index (GSI) 288, 291
- H**  
Half-life 72–74, 186, 187, 194, 198  
Henry's law constant 67  
Herring, Pacific 209, 210  
Hot spots 344  
Human exposure 227  
Hydrolysis 85, 87, 89, 114–120  
Hydrophobicity 68, 69
- I**  
Injection, cool on-column 14, 28  
-, large volume 29  
-, split/splitless inlet 15, 27  
International Agency for Research on Cancer 6  
Invertebrates, toxicity 266, 276
- L**  
Limit of detection (LOD) 29–31, 35–39, 47, 52  
Limit of quantitation (LOQ) 27, 39, 47, 48  
Lipase 95  
Lipid metabolism 282  
Liquid-liquid extraction (LLE) 27, 28  
Liver, -somatic index (LSI) 292, 293  
LOEL 304
- M**  
Macrobenthos 276  
Manila clams 209, 210  
Mass spectrometry (MS) 15, 19  
Melting points 59  
Metabolic transformations 201–208, 215–224  
Metabolite 239, 243, 251  
Method blank 35, 47, 48
- Micelles 65  
Microorganisms 266  
Migration 3  
Mineralization 90, 100–102, 115  
Minnnows 209, 210  
Moisture 98–99, 102, 113  
Molar volume 59, 63, 64, 66  
Molecular weight 1–5  
Monod 90–91, 96  
Monoester 114–118, 287–290
- N**  
National Toxicology Program 301  
NIOSH 5020 37  
NOEL 304, 305
- O**  
Octanol/air partition coefficient 71, 80  
Octanol/water partition coefficient 68, 202, 203, 208, 210, 264  
OECD 6  
OSHA 104 37  
OSHA CIM 37  
Oysters 209, 210
- P**  
Pacific staghorn sculpin 209, 210, 217–220, 224  
Passive sampling 37, 41  
Pentafluoropropanol/pentafluoropropionic anhydride 23  
Perch, pile 209, 210, 217, 224  
-, shiner 209  
Peroxisome proliferation 282, 301, 310  
Persistence 80, 81  
Photolysis 85, 87–89, 119–120  
Photo-oxidation 73  
Phthalates, isotopically labelled 19  
-, metabolites 22, 201  
-, mixed isomer 13, 17, 19  
Phthalic acid 99, 115–116  
- - monoester 50  
Phytoplankton 209, 210  
Plastic 26, 27  
PNEC 294  
Poisoning, secondary 332  
Polydimethylsiloxane 31, 38, 41  
Population density 181, 198, 199  
Predicted no effect concentration (PNECs) 327–333  
Probabilistic analysis 229  
Purple starfish 209
- Q**  
Quality objectives, environmental 319

**R**

Rats 301, 311  
Receptor binding 289  
Release 5  
Residence time 76, 77, 198  
Resource Conservation and Recovery Act 6  
Risk assessment 6, 339

**S**

Safe Drinking Water Act 6  
Saltwater 265, 276, 280  
SCAS test 105  
Seaperch, striped 209, 210, 217, 224  
Sediment 136, 141, 147, 153, 159, 164, 168, 202, 209, 210  
–, exposure concentrations 336, 337  
Sediment organisms, effects 319  
Sensitivity analysis, modelling 185, 194–197  
Sensitization potential 307, 313  
Sequestration 95, 101, 104, 119  
Sex ratio 290–293  
Sex reversal 284, 287  
SimpleTreat 106–109, 119  
Slow-stir technique 65, 69  
Sludge 137, 142, 148, 154, 161, 164, 334, 335  
Soil 136, 141, 147, 153, 159, 164  
–, exposure concentrations 334, 336  
Soil organisms, effects 319  
Sole 209, 210  
Solid-phase micro-extraction (SPME) 28, 31, 41  
Solubility 62–71, 87, 91, 95–96, 111  
Solubility cut-point 264  
Soxhlet extraction 33, 34, 37, 47, 49  
Sperm production 308, 311  
Stickiness 81  
Stir bar sorptive extraction (SBSE) 28, 51  
Structure-property relationship (SPR) 59  
Surf scoters 209, 210, 217, 224  
Surf smelt 209, 210  
Surface activity 65

Surface entrapment 266  
Suspended matter 186, 192

**T**

TaPL3 model 80  
Tenax 37  
Testis-ova 290–295  
Thermal desorption 28, 31, 37, 51  
Three solubility analysis 60–67  
Three-spine stickleback 209  
Time, characteristic 78, 198  
Toxicity, acute 306  
–, artefactual 265  
Transport, intermedia 76  
–, long-range 80  
Travel distance, characteristic 80  
Triethyloxonium tetrafluoroborate 23  
Trout 209

**U**

U.S. Consumer Product Safety Commission 6  
U.S. National Toxicology Program 6  
U.S. Toxic Substance Control Act 6  
Uncertainty analysis 185, 191, 196  
UNEP 201, 202  
Urethanes 2  
Urinary metabolites 239, 243, 251

**V**

Vapor pressure 5, 66  
Variance 185, 194–197  
VDI method 4300 44  
Vegetation 182, 185, 190–193  
Vinyl acetate 5  
Vitellogenin 288, 289, 292  
Volatility 2

**W**

Wastewater 137, 142, 148, 154, 160, 165  
Water, drinking 136, 141, 147, 149, 159, 161  
Whitespotted greenling 209, 210  
Wildlife, effects 329

**X**

XAD-2 37
