# Index

- acoustic approximation 262
- Asay Foil 412
  
- Boltzmann distribution 282
- Bouger-Lambert law 281
- Bouger-Lambert-Beer law 282
  
- Chapman-Jouguet 26
- characteristic 169, 200, 364
- color temperature 289
- complex radiation 278
- conservation of energy 10, 12, 34
- conservation of mass 10, 12, 34
- conservation of momentum 10, 12, 34
- contact discontinuity 15
  
- deviatoric strain 3
- deviatoric stress 2
- diagnostic methods and devices
  - capacitive probe 196, 250
  - capacitive sensor 91
  - dielectric pressure sensor 114
  - Doppler velocimeter 196
  - electro-optical method 88
  - electro-optical pyrometer 304, 307
  - electrocontact sensors 75
  - electromagnetic 96, 169, 177, 196
  - electron-optical recorder (EOR) 134
  - electrooptical transducer (EOT)
    - 124
    - EOP-66 306
    - explosive light source (ELS) 129
    - flash gaps 80
    - IFK-50 304, 307
    - IFK-500 130
    - inductive 99
    - K-8 quartz glass 293
    - KI quartz glass 292
    - KU quartz glass 291
    - laser interferometer 250
    - laser interferometry 166
    - magnetoelectric 93
    - manganin 108, 169, 177, 196, 223, 225
    - photoelectric pyrometry 301
    - photographic pyrometry 299, 307
    - piezoelectric and ferroelectric time markers 79
    - piezoelectric pressure transducer 102
    - polarization pressure sensor 117
    - pulsed light source (PLS) 130
    - pulsed X-ray 132
    - PVDF 105
    - quartz transducer 103
    - SFR 81
    - shadowgraph 118
    - streak-camera 42, 121, 206, 302
    - synthetic sapphire 293
    - ytterbium 114, 223
- diagnostic methods and devices, closed contacts (CC) 90
- dielectric and magnetic permeability 279
- dielectric metallization 210
- dielectric-metal transition 209
- diffraction scattering 282

- doubling rule 19, 148, 149, 206
- Drude dependence 321
- Drude-Zener relation 211
- dynamic yield strength 221, 223, 224, 239
- effective detonation rate 365
- effective or equivalent strain 4
- effective or equivalent strain rate 4
- effective or equivalent stress 4
- elastic precursor 197, 201, 230, 233, 237, 243
- electrical conductivity 209
- electronic band structure 210, 216
- equation of state (EOS)
  - co-volume model 6
  - Landau-Stanyukovich 354
  - limiting density 184
  - Mie-Grüneisen 5, 148, 176, 182, 364
  - OSA 186
  - ROSA 186
  - Zubarev 366
- ERIDAN 133, 136, 340
- experimental methods and devices
  - ballistic mortar 377
  - ballistic pendulum 376
  - ballistic shock tube (BST) 40
  - cascade device 45
  - contact explosive devices 42
  - convergence-shaping guns 55
  - cylinder test 385
  - Dautriche 346
  - deceleration method 149
  - Double compression 153
  - electric gun 54
  - explosive tubular gun (ETG) 51
  - fast shock tube (FST) 51
  - Hess's test 372
  - Hopkinson bar 244
  - impedance matching 151
  - impedance-matching 195
  - inclined foil 354
  - isobaric expansion 164
  - light gas gun (LGG) 37
  - M-60 384
  - magnetocumulative generators 56
  - method of barriers 161
  - method of side unloading 170
  - MZ device 153
  - optical lever 231
  - overtake method 172
  - photoelectric method 360
  - powder gun 35
  - pulsed laser 59
  - railgun 55
  - reflection method 151, 195
  - relativistic electron beam (REB) 60
  - self-consistent method 227
  - soft charge device (SC device) 45
  - spallation 147
  - T-20 385
  - Taylor method (Taylor cylinder) 228, 244
  - Trautzle bomb 375
  - zebra 136, 354
- first-order phase transition 191, 202
- flow stress 7
- gas-dynamic approximation 197
- geometrical optics 278
- Gladstone-Dale function 321, 404
- GRIM 134, 136
- hardening 257
- heat shock 57
- homogeneity (with respect to the propagation of em radiation) 279
- Hugoniot elastic limit (HEL) 8
- hydrodynamic approximation 223
- hydrodynamic theory of detonation 25
- Kirchhoff law 283
- Lagrangian coordinate 11
- Lambert law 287
- light absorption 281
- light dispersion 279
- Lindemann melt model 8, 204
- linear fracture mechanics 261
- Lorentz-Lorentz dependence 321
- luminance temperature 289
- melt curve (or line) 201
- metal-dielectric transition 209
- method of characteristics 10
- Michelson straight line 27
- monochromatic radiation 278
- normal detonation wave 27

- nucleation and growth (NAG) model 265
- Poisson adiabat 13, 170, 198
- polymorphic phase transformation 191, 199, 259
- principal strain 3
- principal stress 2
  
- Rankine-Hugoniot relationships 13, 148
- rarefaction shock 199, 200, 259
- Rayleigh's law 282
- Rayleigh-Jeans equation 285
- refractive index 279
- relative refractive index 279
- Riemann integral 11
- Riemann invariant 11, 169, 170, 200, 364
- Riemann problem 15, 147, 151, 245, 247
  
- Sadovsky relationship 379
- second-order phase transformation 208
- shear strength 238
- shear-strength 221
- softening 257
- spall 199, 245, 261
- specular reflection 280
- Stefan-Boltzmann law 286
- strain tensor 3
- stress tensor 2
  
- thermal softening 8
- Tuler-Bucher model 264
  
- Van der Waals 6
- vaporization 205
  
- Wien equation 285
- work hardening 8
  
- Zhurkov model 263
