Subject-Index

Alternating group	11	Generalized alternating group	39
- - , generalized	39	- Cartan matrix	179
ambivalent group	9	- decomposition matrix	169
arm of a hook	79	- - numbers	169
associated cycleproduct	40	- symmetric group	39
- part of the rim	80	group, alternating	11
- partition	20	- , ambivalent	9
- representations	94	- , basis	25
- Young-diagrams	20	- , complete monomial	39
axial distance	76	- , hyperoctahedral	39
Basis group	25	- of horizontal permutations	22
branching theorem	85	- of vertical permutations	22
Conjugate representations	94	- , permutation	5
corner (of a hook)	79	- , symmetric	5
cycle	6	Hand (of a hook)	79
- , order of a	6	hook	79
-s, disjoint	7	- , arm of a	79
cycle-notation	7	- , corner of a	79
cycleproduct, associated	40	- , hand of a	79
cyclic permutation	6	- , leg of a	79
Degree of a permutation	5	- , leglength of a	79
- - - - group	5	- , length of a	79
determinantal form (of		horizontal permutation	22
irr. characters of S_n)	77	- -s, group of	22
dictionary order	72	hyperoctahedral group	39
difference-product	11	Inertia factor	90
disjoint cycles	7	- group	90
Even permutations	11	Last letter sequence	75
Frobenius' theorem	86	leg (of a hook)	79
		leglength (of a hook)	79
		lemma of J. v. Neumann	67

Littlewood-Richardson-rule	84	Selfassociated partition	20
Littlewood's theorem of conjugates	125	- Young-diagram	20
M-group	111	similar permutation groups	29
Murnaghan-Nakayama-formula	80	standard-conjugator	14
Nakayama's conjecture	131	standard-tableau	71
Odd permutation	11	symbols	5
order of a cycle	6	symmetric group	5
P-component	168	- - , generalized	39
p-element	8	symmetrized outer products (general)	102
p-regular	8	- - - (of irr. ordinary repr. of S_n)	117
p-regular component	168	symmetry 39	
p-regular partition	96	Tableau	21
p-singular	8	transposition	6
p-weight (of a diagram)	132	type of a permutation	10
partition	8	- - an element of $G \setminus S_n$	40
- , associated	20	- - - irr. repr. of the basis group	90
- of a permutation	8	Vertical permutation	22
permutation	5	- -s, group of	22
- , cyclic	6	Wreath product	24
- , degree of a	5	-s with symmetric groups	39
- , even	11	Young-diagram	20
- group	5	- , associated	20
- - , degree of a	5	- , rim of a	79
- -s, similar	29	Young-subgroups	17
- , horizontal	22	Young-tableau	21
- , odd	11	- , standard	71
- , type of a	10	Young's natural form (of irr. ordinary repr. of S_n)	75
- , partition of a	8	- orthogonal form	75
- , vertical	22	- seminormal form	80
-s, group of horizontal	22	Zero-diagram	
-s, group of vertical	22		
R-induction	141		
r-node	141		
r-restriction	141		
rim (of a diagram)	79
