

## Sachverzeichnis

Die Stichworte sind in der Sprache der Beiträge wiedergegeben.

- Acetophenone, initiation of anionic polymerization 286
- Acetoxymethyl-diacetoxymethylsilane, hydrolysis 444
- Acroleine, graft copolymers 190
- Acrylamide, anionic polymerization 282
- , graft copolymerization 189, 192, 197, 199, 203
- Acrylates, graft copolymerization 183, 184, 185, 192
- Acrylic acid, block and graft copolymerization 184, 193, 203
- Acrylonitrile, anionic polymerization 428
- , block copolymers 182, 192, 193, 206
- , free-radical bulk polymerization 409
- , free-radical polymerization in homogeneous solution 402
- , graft copolymers 185, 187, 190, 191, 196, 197, 199, 203
- , heterogeneous free-radical polymerization 417
- , polymerization in aqueous suspension 422
- Acrylonitrile polymerization, mechanism 401 ff.
- , termination of anionic polymerization 281
- Alginate, Röntgenkleinwinkelstreuung 381
- Alkali silanulates from silanols 456
- Alkaline earth catalysts for polymerization of cyclic ethers 48
- Alkenylarylsilanediole 455
- Alkoxysilanes, hydrolysis 461
- Alkyl-aryl ethers, sulfonated, preparation of ion-exchange membranes 311
- Alkylene polyamines, preparation of ion-exchange membranes 311
- Alkyl-naphthylsilanediole 454
- Alkylphenylsilanediole 454
- N-Alkyl- $\gamma$ -vinyl pyridinium compounds 312
- Allylsilanol 455
- Allylphenylsilanol 455
- Ammonia, initiation of anionic polymerization 286
- n-Amyltriethoxysilanes, hydrolysis 447
- Aniline, initiation of anionic polymerization 286
- Anion-exchange membranes 311, 313
- Benzoin**,  $^{14}\text{C}$ -labelled, as photosensitizer for polymerization 7
- Benzylvinylsilanol 455
- Bi-ionic potentials of ion-exchange membranes 333, 349
- Bimolecular termination 276
- 3,3-Bis-chloromethyl oxacyclobutane, polymerization 37
- Bis-(dichlorophenyl)-disiloxane-tetrol 455
- Bis-(triethylsiloxy) sulfate 456
- Block copolymers 173 ff.
- Block polymers, synthesis according to preconceived pattern 296
- Boron, determination in sodium metal 355
- Boron trifluoride, initiation of polymerization 278, 300
- $^{82}\text{Br}$ , application in polymer chemistry 3, 4
- Branching of high polymers, study by labelled monomers 8
- Butadiene, formation of block polymers 297
- , influence on molecular weight of polystyrene 285
- , polymerization by sodium naphthalene 287
- Butylethylsilanol 453
- tert*-Butylhexadecylsilanol 454
- Butyl methacrylate-methacrylic acid, grafting in emulsion 185
- tert*-Butylmethylsilanol 454
- tert*-Butylphenylsilanol 454

- <sup>14</sup>C, application in polymer chemistry 2 ff.
- Calorimetric data of high polymers, comparison with other physical measurements 261
- Calorimetric studies of states and transitions in solid high polymers 221 ff.
- Caprolactam, anionic polymerization 578 ff.
- , graft copolymers 209
- , polymerization mechanism 581
- Caprolactam salts 579, 580
- Carbanion block copolymerization 205
- Carbanions, isomerization reactions 280
- Carbobenoxo-Polyaminocapronsäuren, Röntgenkleinwinkelstreuung 386
- Carbon dioxide, introduction of terminal carboxylic groups 296
- Carbon disulphide, introduction of terminal thiocarboxylic groups 296
- Carbonium ion graft copolymerization 203, 204
- Carbonium ions, isomerization reactions 280
- Carboxylic acids, olefinic, preparation of ion-exchange membranes 312
- Catalysts for polymerization of cyclic ethers 19
- Cation-exchange membranes 311, 313
- C-Cl bond, influence on polymerization 279
- Cellophane, preparation of ion-exchange membranes 313
- Cellulose, crystallinity 15
- , graft copolymerization 197, 209
- , Röntgenkleinwinkelstreuung 380, 381, 382, 393, 395
- Cellulose methacrylate, grafting of vinyl monomers 185
- Ceric ions, preparation of block and graft copolymers 203
- Chain orientation, effect on glass transition 258
- Chain transfer, termination by 282
- Chain transfer constants 179
- Chain transfer initiation for preparation of block and graft copolymers 175
- Chloroalkoxysilanes, inter-condensation 444
- p-Chlorophenylvinylsilanediol 455
- Chloroprene, block polymerization 191
- Chlorosilanols as intermediates 443
- Chlorotriethylsilane 456
- Chlorotriisopropylsilane, hydrolysis and alcoholysis 460
- Cinnamic acid, labelled, analysis of polystyrene 7
- <sup>36</sup>Cl, application in polymer chemistry 2
- C-Li bond, influence on polymerization 279
- Cohesive energies of high polymers 238
- "Cold crystallization" 242, 250
- Concentration gradient across membranes 323, 345
- Concentration potential of ion-exchange membranes 330, 347
- Concentration profiles in membranes 337
- Conductivity, electrical, of ion-exchange membranes 338
- of selective membranes 352
- Copolyesters, melting points 230
- Copolymerization, study by labelled monomers 7
- Copolymers, crystallinity 248
- , glass transition 259
- Counter-ions, termination by 276
- Cross-linking by high energy radiations 9
- Crystallinity, effect on glass transition 258
- of high polymers, influence on infrared spectra 65
- of polymers and copolymers, calorimetric estimates 243
- —, study by deuterated compounds 15
- Crystallization, cold 242, 250
- Cumenyl mercaptan as transfer agent in block polymerization 201
- Cyclohexasilsesquioxanes 450
- Cyclooctasiloxanes 447
- Cyclotetrasiloxanes 447
- "Dead" polymers 287
- Deionization of solutions 354
- Desalting of seawater 342, 354
- Deuteration of high polymers, shifting of infrared bands 91
- Deuterium, influence on branching of high polymers 10
- Dialkylsilanols 453
- Diallyldisiloxanediols 455
- Dialysis potential of ion-exchange membranes 330, 347
- Diamines, preparation of block copolymers 209

- Diarylsilanediods 455  
 Diarylsilanols 453  
 Diazonium salts, initiation of chain grafting 202  
 Di-n-butoxydichlorosilane, hydrolysis 451  
 Di-*tert*-butoxydimethylsilane, hydrolysis 444  
 Di-*tert*-butoxysilanediol 454  
 Di-n-butylsilanediol 454  
 Di-*tert*-butylsilanediol 454  
 Dichlorodiethoxysilane, hydrolysis 451  
 Dichloroethoxyethylsilane, hydrolysis 447  
 Dichloroethoxymethylsilane, hydrolysis 446  
 Dichloroethylsilane, hydrolysis 444  
 Dichlorophenylsilanetriol 455  
 $\alpha,\omega$ -Dichloropolysiloxanes, hydrolysis 444  
 —, preparation 443, 444  
 Dichlorosilanes, hydrolysis 443, 461  
 Dichtgepackte Systeme, Untersuchung mit Röntgenkleinwinkelstreuung 372, 392  
 Dicyclohexylsilanediol 454  
 Dielectric loss data of high polymers, comparison with calorimetric data 267  
 Diethoxymethylsilane, hydrolysis 443  
 Diethyldithiocarbamates, initiation of block and graft copolymerization 202  
 Diethylmethylsilane, reactivity 458  
 Diethylsilanediol 454  
 Diethylsilanol 453  
 Diffusion across membranes 323, 345  
 Dihydromyrcene as transfer agent 187  
 Diisobutylsilanediol 454  
 Diisocyanates, preparation of block copolymers 209  
 Diisopropoxydimethylsilane, hydrolysis 444  
 Diisopropylsilanediol 454  
 Dilatometric data of high polymers, comparison with calorimetric data 262  
 Dimethyldichlorosilane, hydrolysis 445  
 Dimethyldimethoxysilane, hydrolysis 443  
 3,3-Dimethyloxacyclobutane, polymerization 38  
 Dimethyl polysiloxane, graft copolymers with acrylonitrile 190  
 Dimethylsilanediol 454  
 Dimethylterephthalate, graft copolymerization 209  
 Diols, preparation of block copolymers 209  
 Dioxanes, formation by depolymerization 23, 26  
 Diphenylamine, initiation of anionic polymerization 286  
 Di-n-propylsilanediol 454  
 Disilicic acid 453  
 Disiloxanediods 455  
 Disiloxanes, alcoholysis 457  
 Divinylbenzene, preparation of anion-exchange membranes 313  
 —, preparation of ion-exchange membranes 311  
 Divinyldisiloxanediods 455  
 Donnan potential of ion-exchange membranes 321  
 "Dormant" polymers 279  
 Drag factor for ion-exchange membranes 340  
 Electrodialysis 338  
 Electrolysis, preparation of graft copolymers by 198  
 Elektronendichte, Einfluß auf Röntgenkleinwinkelstreuung 364, 373  
 Emulsion polymerization, preparation of block copolymers 192, 193  
 End-groups, effect on polymer properties 296  
 Entropies of fusion of high polymers, calorimetric determination 232  
 Entschmierung bei Kleinwinkeluntersuchungen 365  
 Epichlorohydrin, preparation of ion-exchange membranes 312  
 Epoxides, monosubstituted, racemic, production of crystalline polymers 41  
 —, reaction with alcohols 18  
 Ethanol, initiation of anionic polymerization 286  
 Ether exchange during polymerization of cyclic ethers 28  
 Ethers, cyclic, polymerization 18 ff.  
 Ethoxymethylsiloxanes 446  
 Ethylbenzene, preparation of anion-exchange membranes 313

- Ethylchloroacrylate, block copolymerization 201
- Ethylene, grafting on polyvinyl acetate 182
- , termination of polymerization 276
- Ethylene imine, graft copolymers 209
- — preparation of ion-exchange membranes 312
- Ethylene oxide, formation of block polymers 297, 298
- —, graft copolymers 206, 209
- —, introduction of hydroxylic terminal groups 296
- —, polymerization 18, 25, 26
- —, stereospecific polymerization 46
- —, termination of polymerization 300
- Ethylidene dimethacrylate, graft copolymers 185
- Ethylphenylsilanol 453
- Ethyltrichlorosilane, alkoholyse 447
- Far infrared spectroscopy of high polymers 90
- — — of high polymers, experimental techniques 70
- Fatty acids, long chain, formation 182
- Films, hydrophobic, preparation of ion-exchange membranes 313
- , hydrophylic, preparation of ion-exchange membranes 313
- Fluorene, initiation of anionic polymerization 286
- Fluorine-containing polymers 465 ff.
- Fluoro carbon polymers as binder for ion-exchange membranes 312
- Fluorotriphenylsilane, hydrolysis 460
- Frequency shift of infrared spectra by isotopic substitution of molecules 64, 91, 92
- Friedel-Crafts polymerization of cyclic ethers 19
- "Frozen-in" radicals in grafting processes 191
- Gel membranes, homogeneous 311
- Gitter, Röntgenkleinwinkelstreuung 379
- Glass transitions, calorimetric studies 252 ff.
- Graft copolymers 173 ff.
- Grafting by chain transfer, influence of initiator 177, 178
- Group frequencies of high polymers 58 ff.
- Guttapercha, entropy of fusion 236
- , graft-polymerization, study by labelled initiators 6
- , heat of fusion 235
- , melting point 235
- <sup>3</sup>H, application in polymer chemistry 2
- Halides, inorganic, catalytic activity in polymerization of cyclic ethers 20, 24, 25
- Heat capacity of chain polymeric crystals 225
- Heat of fusion of high polymers, calorimetric determination 232
- , theory 237
- Helmholtz-Smoluchowsky model for ion-exchange membranes 320
- Hexaacetoxysiloxane, hydrolysis 453
- Hexachlorodisiloxane 450
- Hexa-p-chlorophenyl-1,5-trisiloxane-diol 455
- Hexasilsesquioxanes 448
- Hole theory of glass transition 256
- Hydride ion, termination of polymerization 279, 282
- Hydrogen atoms, introduction to end of polymers 295
- Hydrogen bonding, influence on infrared spectra of high polymers 69
- Hydroperoxides, initiation of chain grafting and block copolymerization 195
- Indene, initiation of anionic polymerization 286
- Infrared spectra of high polymers 51 ff.
- Inhibitors, labelled 13
- Inhomogenität, Bestimmung durch Röntgenkleinwinkelstreuung 374
- Initiation processes, study by tracer methods 4
- Interdiffusion of ions 326, 346
- Intermolecular interactions, influence on infrared spectra of high polymers 67
- Internal pressure of high polymers, effect of glass transition 258
- Interpolymers, preparation of ion-exchange membranes 314
- Intramolecular interactions, influence on infrared spectra of high polymers 66
- Iodine, recovery by ion-selective membranes 354

- Ion-exchange membranes 307 ff.  
 — —, application 354  
 — —, preparation 310  
 — —, theory 314  
 Ion separation, electro-osmotic 354  
 Iron catalysts for production of crystalline polymers 41  
 Isobutene, termination of polymerization 278  
 Isomerization, termination by 280  
 Isoprene, block copolymerization 205  
 —, polymerization by sodium naphthalene 287  
 Isotope effects 4  
 Isotope rule for infrared spectra of high polymers 94, 95  
 Isotopes, application in polymer chemistry 1 ff.
- Katalysatoren, Untersuchung durch Röntgenkleinwinkelstreuung 376**  
 Kettenfaltung 385, 389  
 Kettenübertragung bei Copolymerisation 535  
 — bei radikalischer Polymerisation 496 ff.  
 Kice-Gleichungen 520  
 Kleinwinkeldiagramme, Nullpunkt 366  
 Kleinwinkelstreuung siehe Röntgenkleinwinkelstreuung  
 Kohärenzlänge bei unorientierten Systemen 375  
 Kohlenwasserstoffe, Übertragungskonstanten 562  
 Kollagen, Röntgenkleinwinkelstreuung 378, 379  
 Kolloide, Untersuchung durch Röntgenkleinwinkelstreuung 364 ff.  
 Korrelationsfunktion bei Kolloiden 373  
 KWS siehe Röntgenkleinwinkelstreuung
- L-coefficients of ion-exchange membranes 315**  
**LEUCH's anhydrides, termination of anionic polymerization 299, 302**  
 Liquid polymers, calorimetric studies 260  
 Liquid-solid transitions, irreversible 242  
 "Living" polymers 205, 287
- Macro-rings, termination of polymerization 300**  
 Magnesium from seawater 354
- Manganese, recovery by ion-selective membranes 354  
 Marlex 50, Röntgenkleinwinkelstreuung 385  
 Mass effects, influence on group frequencies of high polymers 63  
 Mayo-Gleichung 498 ff.  
 Mechanical data of high polymers, comparison with calorimetric data 266  
 Melting points of high polymers, theory 237  
 —, calorimetric determination 229  
 Membrane phenomena 319  
 —, application of reaction rate theory 342  
 —, calculation 322  
 Membrane potentials 328, 346  
 Membranes, diffusion 323, 345  
 —, ion-exchange 307 ff.  
 Mercaptan containing polymers, preparation 183  
 Meridianreflexe bei Röntgenkleinwinkelstreuung 382  
 Methacrylo-nitrile, polymerization in liquid ammonia 285, 287  
 Methanol, initiation of anionic polymerization 286  
 p-Methoxy aniline, initiation of anionic polymerization 286  
 Methyl acrylate, labelled, study of copolymerization 7  
 Methyl dioxolane, formation during polymerization of cyclic ethers 30  
 Methyl iodide as terminating agent 286  
 Methylisopropenylketone, block polymerization 191  
 Methylmethacrylat, Kettenübertragung bei Polymerisation 550  
 Methyl methacrylate, anionic polymerization 280  
 — —, study by labelled substances 4  
 —, block copolymerization 191, 194, 201, 202, 205  
 —, copolymerization, study by labelled substances 7  
 —, formation of block polymers 297, 299  
 —, graft copolymerization 177, 178, 180, 183, 185, 186, 187, 189, 190, 191, 192, 194, 195, 196, 197, 199

- Methyl methacrylate, graft copolymerization, study by labelled initiators 6
- , photopolymerization 191
- , polymerization by organo-lithium 303
- 2-Methyl-oxacyclobutane, stereospecific polymerization 46
- Methyl silicate, hydrolysis 452
- $\alpha$ -Methyl styrene, copolymerization with styrene by sodium naphthalene 287
- , influence on molecular weight of polystyrene 285
- Methyltri-n-butoxysilane, hydrolysis 447
- Methyltrichlorosilane, cohydrolysis 448
- , hydrolysis 445
- , methanolysis 446
- Methyltrimethoxysilane, hydrolysis 446
- Molekulargewichte von Hochpolymeren, Verteilungsfunktion 505
- Molekulargewichtsbestimmung durch Röntgenkleinwinkelstreuung 368
- Mono-isonitriles, anionic polymerization 281
- Monomers, labelled, use in copolymerization 7
- Monosilicic acid 452
- Monovinyl-compounds, aromatic, preparation of ion-exchange membranes 313
- M.S.T. model for ion-exchange membranes 320, 345
- Multicell for electrodiolyses 309
- Multi-ionic potentials of ion-exchange membranes 349
- Nernst-Planck flux equation of ion-exchange membranes 318
- — —, application 345
- Nuclear magnetic resonance data of high polymers, comparison with calorimetric data 265
- Nylon-1 281
- Nylon-66, Röntgenkleinwinkelstreuung 392
- Nylon, crystallinity, calorimetrically estimated 247
- , graft copolymerization 191
- , specific heat 227, 243
- , structure transitions 252
- Oberflächen, innere, Ermittlung durch Röntgenkleinwinkelstreuung 376
- Octa-n-amyloctasilsesquioxane 449
- Octachlorotrisiloxane 450
- Octamethyloctasilsesquioxane 448
- Octaphenyloctasilsesquioxane 449
- Octasilsesquioxane 449
- Optical isomers, retardation of polymerization 302
- Order-disorder transitions 251
- Oxacyclobutane, polymerization 22, 37
- Oxonium ion formation, mechanism 21
- Oxonium salts, depolymerization of cyclic ether polymers 23
- , tertiary, preparation from methyl halides and epoxides 19
- Ozonization of polymers, initiation of chain grafting 197
- Paper, preparation of ion-exchange membranes 313
- n-Paraffins, infrared spectra 103 ff.
- Parakristalle 380
- Peresters, initiation of chain grafting 198
- Perlon, gewalztes, Röntgenkleinwinkelstreuung 383
- Perlon L, Röntgenkleinwinkelstreuung 390
- Peroxides, initiation of graft copolymerization 196, 197
- PETP see polyethylene terephthalate
- Pfropfkonstanten 548
- pH-control by selective membranes 308
- Phenol-formaldehyde condensation products, block copolymerization 194
- Phenolformaldehyde resin, preparation of ion-exchange membranes 313
- Phenolsulfonic acid, preparation of ion-exchange membranes 311
- Phenylacetylene, initiation of anionic polymerization 286
- Phenyl glycidyl ether, stereospecific polymerization 46
- Phenylsilanetriol 455
- Phenyltrichlorosilane, hydrolysis 445
- Phenyltriethoxysilanes, hydrolysis 447
- Phenylvinylsilanediol 455
- Phosphorus pentafluoride as catalyst for polymerization of cyclic ethers 40
- Photolysis, preparation of block and graft copolymers 203

- Photosensitizers for grafting processes 189  
 Plasticizers, influence on glass transition 259  
 Poisson distribution of molecular weights 288  
 Polarization measurements of high polymers 95  
 — — of high polymers, experimental techniques 71  
 Polyacetaldehyde, peroxidized, initiation of graft polymerization 196  
 Poly(acetoxymethyl-methylsiloxanes), chain-blocked, preparation 444  
 Polyacrylamide, block and graft copolymerization 189, 193, 194, 203  
 —, study of branching by labelled monomers 8  
 Polyacrylic acid, graft copolymers with acrylonitrile 185  
 Polyacrylic esters, graft copolymerization 191  
 Polyacrylonitrile, graft copolymerization 191, 192  
 —, properties 402  
 —, susceptibility to graft copolymerization 185  
 Poly-acrylonitriles, termination by proton transfer 281  
 Polyäthylen, Röntgenkleinwinkelstreuung 383, 384, 392  
 —, Schichtkristalle 385  
 Polyalkoxysiloxanes, linear 451  
 Polyalkyl methacrylates, graft copolymerization 191  
 Poly-p-alkylstyrenes, peroxidized, graft polymerization 195  
 Polyamide, Röntgenkleinwinkelstreuung 383  
 —, Stufenkristalle 385  
 Polyamides, graft copolymerization 191, 209  
 — of highest degree of polymerization 581  
 —, heat of fusion 234  
 —, melting points 234  
 —, structure transitions 252  
 Poly-p-aminostyrene, diazotated, initiation of block copolymerization 202  
 Polybutadiene, block and graft copolymerization 197, 201  
 Polybutadiene, preparation of anion-exchange membranes 313  
 cis-1,4-Polybutadiene, heat of fusion 235  
 —, melting point 235  
 Poly-1,3-butylene glycol fumarate, copolymerization with styrene 186  
 Polycaprolactam, properties 592  
 Polychlorotrifluoro ethylene as binder for ion-exchange membranes 312  
 —, crystallinity, calorimetrically estimated 247  
 —, heat of fusion 235  
 —, melting point 235  
 Poly-di-n-butoxysiloxanes, cyclic 451  
 Poly-2,5-dichlorostyrene, graft copolymers with styrene 190  
 Polydimethyl siloxane, block and graft copolymerization 194  
 Poly-dimethylsiloxanes, cyclic 443  
 Poly-diphenylsiloxane-diols 455  
 Polydispersität, Bestimmung durch Röntgenkleinwinkelstreuung 370  
 Polyelectrolytes, preparation of ion-exchange membranes 314  
 Polyene hydrocarbons, preparation of ion-exchange membranes 313  
 Polyenes, preparation of anion-exchange membranes 313  
 Polyesters, graft copolymerization 183, 184, 186  
 —, heat of fusion 234  
 —, melting points 234  
 Polyethyl acrylate, graft copolymerization 184  
 Polyethyl  $\alpha$ -chloroacrylate, graft copolymerization 177, 184  
 Polyethylene as binder for ion-exchange membranes 312  
 —, crystallinity, calorimetrically estimated 247  
 —, entropy of fusion 236  
 —, graft copolymerization 189, 190, 191, 196  
 —, infrared spectrum 103 ff.  
 —, melting studies 229, 234  
 —, preparation of anion-exchange membranes 313  
 —, preparation of ion-exchange membranes 313  
 —, Raman spectrum 109  
 —, specific heat 226, 227, 228

- Polyethylene chain, character table and selection rules 82
- —, planar, zig-zag, symmetry elements 80
- Polyethylene chain factor group, multiplication table 81
- Polyethylene oxide, graft copolymers 209
- Polyethylene oxides, preparation by alkaline earth catalysts 48
- Polyethylene sebacate, crystallinity, calorimetrically estimated 247
- Polyethylene terephthalate, amorphous, specific heat as function of temperature 222, 223
- —, block copolymerization 194
- —, crystallinity, calorimetrically estimated 247
- —, graft copolymerization 191
- —, Raman spectrum 160
- —, structure 156
- Polyethylene terephthalates, deuterated, infrared spectra 152, 153
- —, infrared spectra 153 ff.
- Polyglycols, decomposition to dioxane 28, 29
- Polyisobutylene, graft copolymerization with styrene 190
- , internal pressure, effect of glass transition 258
- Polymerisationsgrad, Bestimmung 501
- , Definition 506
- , Übertragungsgleichungen 525, 526
- Polymerization, anionic, termination 275 ff.
- , stereospecific 41
- Polymerkette, Definition 503
- Polymerketten, Verteilung 506
- Polymerradikale, Reaktivität 567
- Polymers, crystalline, formation by asymmetric synthesis 41
- , "dead" 287
- , "dormant" 279
- , "living" 205, 287
- , oriented, study by polarized infrared radiation 71, 95
- , polyfunctional 296
- with specific end-groups 295
- Polymethacrylamide, graft copolymers with acrylonitrile 185
- Poly-p-methoxystyrene, graft copolymerization 204
- Polymethyl acrylate, hydrolysis of ester groups 9
- Polymethylmethacrylat, Übertragungskonstanten 562, 563, 564, 565, 566
- , Viscositätszahl und Polymerisationsgrad 535
- Polymethyl methacrylate, block and graft copolymerization 177, 178, 180, 182, 185, 190, 194, 196, 207
- —, hydrolysis of ester groups 9
- —, living 280
- Poly-4-methyl-penten-1, Stufenkristalle 385
- Poly(methylsiliconic acid) 446
- Poly- $\alpha$ -methyl styrene, distribution of molecular weights 288, 289
- Polymethylvinylketone, preparation of block and graft copolymers 188
- Poly olefines, preparation of ion-exchange membranes 313
- Polyoxymethylene, crystallinity, calorimetrically estimated 247
- , entropy of fusion 236
- , heat of fusion 235
- , melting point 235
- Polyperanhydrides, initiation of chain grafting 197, 198
- Polypropylene, graft copolymers with styrene 190
- , heat of fusion 235
- , infrared spectrum 135 ff.
- , melting point 235
- , Raman spectrum 136
- , specific heat 227
- Polypropylene oxide, disordered 42
- Polysarcosine dimethylamide, block copolymers with acrylonitrile 182
- Polysilic acids 452
- Polysiloxanediols 455
- $\alpha,\omega$ -Polysiloxanediols, preparation 444
- Polysiloxanes, cyclic 443
- Polystyrene, air-oxidation 195, 196
- , analysis by labelled cinnamic acid 7
- , block copolymerization 194, 201, 202, 206
- , crosslinked, glass transition 253
- , deuterated, infrared spectrum 146
- , distribution of molecular weights 288 ff.
- , graft copolymerization 177, 178, 186, 187, 191, 197, 203, 204

- Polystyrene, infrared spectrum 140 ff.  
 —, "living", propagation 286  
 —, preparation of ion-exchange membranes 313  
 —, Raman spectrum 141  
 —, specific heat 228  
 —, structure 142, 143  
 —, study of branching by labelled monomers 8  
 —, susceptibility to graft copolymerization 185
- Polystyrene dihydroperoxide, initiation of graft polymerization 196
- Polystyrenes, deuterium labelled, radio-lysis 9
- Polystyrol, Übertragungskonstanten 562, 563, 564, 565, 566  
 —, Viscositätszahl und Polymerisationsgrad 535
- Polytetrafluoroethylene, block and graft copolymerization 194, 197  
 —, chain structure 469  
 —, chemical properties 487  
 —, crystalline structure 472  
 —, dispersion particles 467  
 —, effects of radiation 488  
 —, electrical properties 485  
 —, end groups 469  
 —, entropy of fusion 236  
 —, <sup>18</sup>F-labelled, study of solubility 15  
 —, graft copolymers with styrene 190  
 —, granular and dispersion particles 466  
 —, heat capacity at low temperatures 477  
 —, heat of fusion 235  
 —, infrared spectrum 115 ff., 475  
 —, mechanical properties 479  
 —, melting studies 235, 479  
 —, microscopy 477  
 —, molecular structure 469  
 —, molecular weight 471  
 —, order-disorder transitions 251  
 —, processing technology 489  
 —, resistance to reagents and solvents 487  
 —, specific heat 226, 227  
 —, stiffness 482  
 —, strength 482  
 —, structure 117  
 —, surface properties 484  
 —, thermal stability 488  
 —, thermodynamic properties 477
- Polytetrafluoroethylene, viscoelastic behavior 479  
 —, X-ray diffraction 472
- Polytetrahydrofuran, high molecular 40
- Polytrifluoroethylene, block and graft copolymerization 194
- Polyurethan, Röntgenkleinwinkelstreuung 383, 384  
 —, Stufenkristalle 385
- Polyvinylacetal as binder for ion-exchange membranes 312
- Polyvinylacetat, Übertragungskonstanten 562, 563, 564, 565, 566  
 —, Viscositätszahl und Polymerisationsgrad 535
- Polyvinyl acetate, block and graft copolymerization 182, 185, 201, 203, 207, 208  
 —, hydrolysis of ester groups 9  
 —, study of branching by labelled monomers 8  
 —, susceptibility to graft copolymerization 185
- Polyvinyl alcohol, deuterated, infrared spectrum 132  
 —, ethylene modified, formation 182  
 —, infrared spectrum 127 ff.  
 —, graft copolymerization 185, 203, 209  
 —, preparation of ion-exchange membranes 313  
 —, structure 129, 130
- Polyvinyl benzoate, graft copolymerization 183
- Polyvinylchloride as binder for ion-exchange membranes 312  
 —, block and graft copolymerization 190, 194, 204  
 —, infrared spectrum 120 ff.  
 —, preparation of ion-exchange membranes 313  
 —, structure 121, 122  
 —, susceptibility to graft copolymerization 185
- Polyvinyl chlorides, deuterated, infrared spectra 125
- Polyvinylformal as binder for ion-exchange membranes 312
- Polyvinylidene bromide, infrared spectrum 148, 149

- Polyvinylidene chloride, graft copolymerization 190, 204  
 — —, infrared spectrum 147 ff.  
 — —, structure 148  
 Polyvinylidene fluoride, block and graft copolymerization 194  
 Polyvinylpyrrolidone, graft copolymerization 185, 189, 197  
 1-Propylene oxide, optically active, polymerization 44  
 Propylene oxide, stereospecific 41, 46  
 Protamine collodion matrix membranes 314  
 Proteins, graft copolymerization 185, 209  
 Proton transfer, termination by 282, 285  
 Pseudo-termination of "living" polymers 300
