

INDEX

- Argabright, L. N., 28, 132
- Berglund, J. F., 28, 132
- Bhattacharya, R. N., 107, 132
- Brunel, A., 143, 194
- Center, B., 107, 132
- Choquet, G., 28, 132
- Communication relations, 145
- Conservative state, 145
- Convergence of
- $\mu^n(0)$ to 1, 33
 - $(\frac{1}{n}) \sum_{k=1}^n \mu^k$ in the weak*-topology, 35, 39, 41
 - μ^n on a compact group, 43, 69
 - μ^n on a compact semigroup -
- 47, 65, 68
 - μ^n on a completely simple semigroup, 50, 67
 - $\mu^{n*} \delta_{a_n}$ on a compact semigroup, 61
 - $\nu_k^n = \mu_{k+1} * \dots * \mu_n$ on a countable group, 73
 - μ^n on a noncompact group, 95
 - μ^n on a noncompact nilpotent group, 101
 - μ^n on a noncompact abelian group -
- 102
- Convergence of products of random variables with values in a semigroup -
- 86, 89
- Convergence (speed of) in norm, 104
- Convolution of two measures, 19
- Deny, J., 28, 132
- Dudley, R., 140, 194
- Ellis' theorem, 7
- Essential state, 145
- Equivalence theorem, 88
- Galmarino, A. R., 107, 133
- Gard, J. R., 131, 133
- Grenander, U., 29, 133, 141
- Heble, M., 28, 133
- Heyer, H., 28, 134
- Hofmann, K. H., 28, 132, 194
- Högnas, G., 142, 194
- Ideal, 2
- Idempotent probability measure -
its structure, 25, 26
- Invariant measures - r^* -invariant, right invariant etc., 11, 12
- Ito, K., 107, 134
- Kawada, Y., 107, 134
- Kesten, H., 140, 194
- Kloss, B., 94, 107, 134
- Loynes, R., 135, 147
- Martin-Löf, P., 107, 135, 141
- Maximov, V. M., 107, 135
- Mukherjea, A., 28, 29, 107, 130, 131, 135, 136, 195
- Nakassis, A., 131, 136
- Parthasarathy, K. R., 29, 136
- Point of sure return, 146

- Possible state, 145
- Primitive idempotent, 4
- Pym, J. S., 28, 136
- Random walk-
 right, left and bilateral, 144
- Recurrence, 145
- Rosen, W. G., 28, 137
- Rosenblatt, M., 28, 29, 107, 131,
 137, 183, 185, 186, 187, 195
- Saff, E. B., 130
- Simple- right simple, left simple
 completely simple, 2, 4
- Spitzer, F., 140, 199
- Stochastic matrices, 112
- Sun, T. C., 107, 131, 136, 137,
 142, 195
- Tortrat, A., 28, 94, 138
- Tserpes, N. A., 28, 137, 138, 195
- Vague topology is the same as
- Weak*-topology, 29
