

INDEX

Approximation assumption	3, 17, 39, 52, 76
Bramble-Hilbert lemma	209
Calahan scheme	97
Crank-Nicolson-Galerkin method	14, 95, 97, 109, 159, 161, 163, 177
Discontinuous Galerkin method	127
Discrete fundamental solution	63
Discrete Laplacian	8, 23, 29, 62, 92
Discrete maximum principle	63, 180, 183
Duality argument	6, 21, 53, 77, 136, 137, 151, 189, 199, 210, 223, 228
Duhamel's principle	9, 31, 70
Discrete solution operator $E_h(t)$	9, 29, 40, 47, 62, 72, 92, 111
Discrete solution operator T_h	22, 24, 96, 193, 214
Elliptic projection	5, 22, 25, 39, 70, 78, 81, 150, 192, 198, 226, 229
Elliptic regularity	6, 21, 22, 53, 74, 77, 190, 212, 225, 228
Euler-Galerkin method, backward	12, 94, 128, 155, 158, 177
Euler-Galerkin method, forward	97, 177
Galerkin-Petrov method	196
H^1 method	188
H^{-1} method	196
Interpolant	2, 3, 134, 208, 223, 228
Inverse property	18, 27, 30, 64, 68, 96, 155, 173
Lumping of masses	167
Mass matrix	4, 166
Maximum-norm stability	63, 64, 180
Mixed method	206
Negative norm	77, 80, 81, 130, 137, 145, 189, 194, 198
Order of accuracy	93, 99, 107, 124
Padé approximant	96, 124, 138
Pyramid function	2, 150, 166
Quadrature	109, 122, 129, 167, 170
Quasi-projection	86, 144
Quasi-uniform	2, 62, 149, 166
Raviart-Thomas elements	206
Reference triangle	19, 168, 206
Semidiscrete problem	4, 23, 24, 51, 149, 169, 194, 197, 215, 226, 231
Semigroup $E_h(t)$	29, 40
Smoothing property	29, 47, 72, 85, 103, 115, 131
Sobolev space $H^1(\Omega)$, def.	2
Sobolev space $\dot{H}^r(\Omega)$, def.	33, 200
Sobolev type inequality	11, 67, 174
Stability	9, 29, 93, 134
Standard Galerkin method	4, 22, 39, 51, 62, 76, 166
Stiffness matrix	5, 166
Superapproximation	66
Superconvergence	11, 79, 89, 137, 173, 190, 193, 195
Triangulation	1, 2, 17, 62, 166
Weak (variational) formulation	4, 188, 205, 223, 227
