

SUBJECT INDEX

Aerosol particles, effects of	128
Albedo	134, 164-166
Anthropogenic aerosol	129
Astronomical theory	4, 132-152
Atmospheric chemistry and climate	128
Biological carbon pump	159-161
Biological processes	119
¹³ C in sediments	87-99, 160-165
Carbon dioxide (CO ₂):	
- climatic effect of	162-169
- doubling of content	127
- during ice age	153
- general aspects	4, 126-127, 162-169
- ocean cycle	157-159
CLIMAP	165
Climate and atmospheric chemistry	128
Climate modelling:	
- climate applications	119-120
- main problems	3
- man made changes	125
- meteorological applications	118-119
- natural system	123
- numerical errors	120
- ocean models	119
- parametrization errors	120
Climatic feedback effects	165-167
Cold summers	72
Deep sea sediments	83-97, 160, 165
Deep water formation	83-101, 160, 168
Dendroclimatology	2, 35-56
Dendro-ecological diagram	36
El Niño	26-30
ENSO phenomenon	26-30
Eruptions	23-26
Faculae	10
Flares	10
Foraminifera in sediments	83-104
Forcing factors	22
Glacial - interglacial transition	95, 155, 169
Global water cycle	126
Grape harvest dates	59, 76
Greenhouse effect	163-169
Growth rings of trees	35
Hemispheric temperatures	18
High altitude aerosol	13
High Middle Ages	57
High energy flares	10
Historical sources	60-63
Homogeneity problems	18

Ice age climate	162-169
Ice ages, astronomical theory of	142-150, 162, 167
Ice cores	154-156
Ice volume, global	83, 99, 159
Insolation	132, 136, 167-168
Isotope stages	85-104
Isotopic equilibrium	83-87
Little Ice Age	15
Man's impact on climate	125-130
Man-made climatic change, detection of	130
Maximum density (tree rings)	36
Meteorological observations	19
Milankovitch theory	132, 141, 162, 167
North Atlantic deep water	83
Norwegian sea	83
Numerical modelling	117-131
^{18}O :	
- in ice cores	155-156
- in ocean water	83-104
- in sediments	83, 161
Ocean:	
- sediments	3
- models	119, 126
Orbital variations	132, 147
Pointer years (dendroclimatology)	42
Polar ice cores	4
Precipitation:	
- patterns	71-74
- reconstruction	39
Proxy data	36
Radiation:	
- absorbed at earth surface	137, 141
- in the atmosphere	133, 163
Ring width	36
Sea ice	84, 95, 100
Sea level variations	99, 159
Sea surface temperature	19-22, 95-103
Solar activity	12
Solar constant	1, 6-17
Solar irradiance:	
- measurements	8
- power spectra	11
Soot content	129
Southern oscillation	26-30
Spectra of motion	121
Sunspots	10
Temperature:	
- annual estimates	20
- anomalies	45-54, 65
- deep water	83-104
- global data	18
- hemispheric data	18
- reconstruction from conifers	37
- variations	2

Trace gas content	126
Tree ring data	63
Volcanic effects	23-26
Warm anomalies	68-71
Warm period	2,57
Weather patterns	58

ADDRESSES

A. Berger, Institut d'Astronomie et de Géophysique Georges Lemaitre, Université Catholique de Louvain, 2 Chemin du Cyclotron, B-1348 Louvain-la-Neuve, Belgium

P.L. Blanc, CEN/FAR, B.P. 6-92265 Fontenay aux Roses Cedex, France

J.C. Duplessey, Centre des Faibles Radioactivités, Laboratoire mixte CNRS-CEA, F-91190 Gif sur Yvette, France

C. Fröhlich, Physikalisch-Meteorologisches Observatorium, World Radiation Center, CH-7260 Davos Dorf, Switzerland

H. Grassl, Forschungszentrum Geesthacht, Max-Planck-Strasse 1, D -2054 Geesthacht, Federal Republic of Germany

P.D. Jones, Climatic Research Unit, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ, United Kingdom

P.M. Kelly, Climatic Research Unit, School of Environmental Sciences, University of East Anglia, Norwich NR4 7TJ, United Kingdom
