

## SUBJECT INDEX

- Asymptotic spatial behavior 99, 102
- Asymptotic suction 32
- Basic flow 2
- Bénard Problem 59
  - between spherical shells 60
  - in Magnetohydrodynamics 60, 79, 81
  - compressible 79
- Bessel functions 23, 38
- Bio-convection 71
- Chandrasekhar number 62, 80
- Continuos data dependence in Elastodynamics 109
  - without definiteness assumption on the elasticities 112
- Continuous data dependence in Elastostatics 95
- Couette flow between coaxial cylinders 68
- Counterexamples to improvements on USC
  - half space 22
  - exterior domain 37
- Criticality 5
- Decay of kinetic energy
  - in bounded domain 8, 12
  - in exterior domain 43
  - for a model equation 75
- Deformation rate tensor 8
- Diffusion equation 73
- D-solutions 49
  - uniqueness 51
  - further properties 51
- Eigenvalue problem
  - in linear stability 5, 56
  - in energy stability 9, 57
- Ekman layer 33
- Elasticities 92
- Energy relations
  - in bounded domain 8
  - in half space 17
  - in exterior domain 39
- Exchange of stabilities 5
  - strong 63

## Functionals

- maximization of 30, 46, 64

Generalized energy 81, 87

Instability 4, 7

Kinematic viscosity 1

Linearization principle 6, 7

Mean radius approximation 68

Navier-Stokes equations 1

- perturbed 2

Normal modes 5

## Operator

- symmetric 6, 9, 52
- symmetrizable 6, 63
- with compact resolvent 55

Oscillatory Stokes layer 6

Overstability 6

Periodicity cell 15, 45

Poincaré inequality 10

- counterexamples 17, 37
- weighted 15, 37

Prandtl number 59

- magnetic 61

Rayleigh number 59

Reynolds number 10, 11, 20, 21 40, 41

Shear layer model 73

## Stability

- asymptotic 24, 41
- asymptotic energy 3, 24, 41, 57
- energy 2, 57
- linear 3, 4, 56
- and skew-symmetric operators 63
- and symmetrizable operators 63
- - in unbounded domain 78

Stabilizing effect of magnetic field 61, 85

Trace inequality 100

Uniqueness in Elastodynamics 109, 115

Uniqueness in Elastostatics

- in bounded domain 93
- in exterior domain 95

Uniqueness of steady flows 53

## Universal Stability Criteria (USC)

- in bounded domain 10, 11
- in exterior domain 40
- in half space 20, 21

## Variational formulation of stability

- for a general evolution equation 64
- in bounded domain 9
- in exterior domain 45
- in half space 29

## Weak compactness 30

## Weighted convexity inequality 112

## Weighted energy equality 95

## Weight function method

- in Elasticity 95
- in Fluid Dynamics 18

GENERAL BIBLIOGRAPHY

N.B. Numerals in square brackets denote the chapter in which the bibliographic reference is relevant.
