# Index

- $C^0$ -integrable, 67
- action
  - of a curve, 16
  - of an invariant measure, 17
  - of an orbit, 60
  - potential, 26
- asymptotic distance, 91
- Aubry set, 33, 108
- billiard, 4
  - as a twist map, 39
  - circular, 42, 48
  - elliptic, 42
  - map, 38
- Birkhoff invariants, 63
- Birkhoff normal form, 63, 78
- boundary rigidity, 102
- caustic, 41
- characteristic foliation, 102
- closed characteristic, 68
  - general elliptic, 71
- conjugate functions, 32, 107
- conservative, 102
- constant width, 51
- contact form, 68
- contractible action spectrum, 85
- convex conjugate, 12
  - of the minimal action, 12, 19
- convex hull, 111
- convex hypersurface, 98
- critical value, 27
- Diophantine condition, 76
- elliptic fixed point, 63
  - general, 64
- energy
  - of a Hamiltonian diffeomorphism, 83
  - of a Lagrangian, 26
- Euler–Lagrange equation, 16
  - flow, 16
- exact
  - Lagrangian submanifold, 98
  - symplectic map, 2
- first return time, 69
- Floquet multiplier, 72
- foliation cycle, 106
- generating function
  - for a Poincaré map, 69
  - for a twist map, 2
  - for an area-preserving map, 60
  - quadratic at infinity, 99
- geodesic
  - broken, 37
  - vector field, 69
- globally minimizing measure, 29
- graph selector, 99
- Gutkin–Katok width, 55
- Hamilton–Jacobi equation, 30
- Hamiltonian
  - admissible, 82, 85
  - convex, 20
  - diffeomorphisms, group of, 82

- flow, 20
  - vector field, 22
- Hofer metric, 83
- invariant circle, 9
- isotropic, 21
- KAM-theory, 52, 65
  - converse, 94
- Lagrangian
  - convex, 16
  - graph, 22
  - section, 22
  - submanifold, 21
- Lazutkin parameter, 44
- Legendre
  - condition, 16
  - transformation, 20
- length spectrum, 40, 74
  - invariant, 45
  - marked, 40
- Liouville
  - class, 23, 98
  - form, 21
- Marvizi–Melrose invariants, 54
- Mather set, 29, 107
- minimal
  - geodesic, 84, 89
  - measure, 18
  - orbit, 7
- minimal action
  - of a closed characteristic, 73
  - of a closed geodesic, 75
  - of a Lagrangian, 18
  - of a pos. def. inv. torus, 79
  - of a twist map, 11
  - of an area-preserving map, 62
- minimizing hypersurface, 105
- non-removable intersection, 110
- non-resonance condition, 63
- Peierls barrier, 32
- pendulum, 6, 30, 90, 93
- period spectrum, 70
- Poincaré map, 69
- positive definite invariant torus, 77
- Reeb vector field, 68
- rotation
  - number, 7, 39, 62
  - vector, 18
- semistatic, 33
- separatrix, 6, 43
- shape, 114
  - sectional, 114
- stable norm, 118
- static, 34
- strongly chain recurrent, 108
- subgradient, 23
- superlinear growth, 17
- symplectic
  - form, 21
  - canonical, 21
  - manifold, 21
  - map, 22
  - shift, 23
- theorem
  - Aubry–Mather, 10
  - Birkhoff, 7
  - Birkhoff’s graph, 9
  - Hofer, 83
  - Mather’s graph, 20
- twist condition, 2
- twist map, 2
  - integrable, 3
- weak KAM solution, 31, 107
