

---

# Index

- Albert quadratic form 15, 18, 20, 67, 93, 94, 146, 160, 164
- Arason–Pfister Hauptsatz 64
- category
  - of Chow motives (*Chow*), 27
  - of correspondences (*C*), 26
  - of mixed motives (*DM*), 10, 43
- cellular variety 10, 116, 158
- Chow group (CH) 11–14, 20, 26, 110, 117, 120, 122, 124–127, 179
  - of direct summand, 32
  - of split quadric, 29, 117, 158, 162
- (Chow) correspondence 26, 110
  - Rost, 116, 117
  - type of, 117, 158, 162
- degree (of a quadratic form) 72
- equivalence
  - motivic, *see* motivic equivalence
  - stable, *see* stably birational equivalence
- essential
  - dimension ( $\dim_{\text{es}}$ ), 135
  - quadratic form, 113
- excellent (quadratic form or quadric) 40, 43, 66, 67, 70
- generic
  - form, 40, 76–98
  - subform, 155, 163
- generic splitting tower IX, 31, 133
- height (of a quadratic form) 31
- index
  - Schur ( $i_S$ ), 153
  - Witt, *see* Witt index
- linkage of quadratic forms 155, 172
- maximal splitting 133, 142, 147, 169
- motive
  - lower ( $L_{lo}$ ), 36
  - of split quadric, 29
  - Rost, *see* Rost motive
  - Tate, *see* Tate motive
  - upper ( $L^{up}$ ), 36
- motivic
  - equivalence ( $\overset{m}{\sim}$ ), 116, 145, 146, 154, 161, 162, 166–171
  - functor, 27
- particular quadratic form 122, 124
- (Pfister) neighbor 14, 19, 20, 65, 66, 70, 76–81, 93–96, 105, 107, 108, 111, 113, 114, 116, 119, 120, 122–124, 127, 134, 137, 144–149, 151, 154, 156, 157, 160, 161, 163, 165–171, 173, 174, 176, 177, 179–182
  - half, 146, 154, 167
  - virtual, 105, 106, 108, 110, 111, 131, 134, 135, 137–140
- Rost
  - correspondence, 116, 117
  - motive, 36, 40, 43, 63, 67, 70, 86, 115

- nilpotence theorem (RNT), 31
  - type, 160
- Severi–Brauer variety 11, 13, 17, 18, 171
- shell 73
- size (of direct summand) 38
- special quadratic form 122, 156
- splitting pattern IX, 31, 104, 162, 167
  - (incremental,  $\mathbf{i}(q)$ ), IX, 31, 40, 43, 67, 71–99
  - specialization of, 72
- stably birational equivalence ( $\overset{st}{\sim}$ ) VIII, 66, 71, 109, 131, 135, 136, 145–149, 151–154, 157, 162–178
- standard equivalence pair 148
- Tate motive  $(\mathbb{Z}, \mathbb{Z}(n))$  10, 27–45, 55–56, 62–80, 85–89, 95, 115–117
- type
  - diagonal, 117, 159
  - formal notion, 158
  - of a correspondence, 117, 158, 162
  - possible, 159, 161
  - Rost, 160
- $u$ -invariant X, 111
- unramified
  - cohomology, X, 4, 114, 119, 120, 144, 179
  - Witt group, 21, 119
- Witt index ( $i_W$ ) VIII
  - first ( $i_1$ ), 34, 38, 72, 98, 104, 133, 135, 136, 138, 154, 161, 163–169, 174, 177, 182
  - higher ( $i_j$ ), IX, 31, 72, 98, 139–142
