benefit accounting 143-146
benefit aggregate 49
benefit characteristics 136-138
benefit effective analysis 21,24-27, 142
benefit efficiency 17
benefit identification matrix (BIM) 143-146, 158-165
benefit measure 139-141
benefit intensity 45-49, 146-154, 165-171
benefit space 64-66, 136-142
benefit Time 7-8
benefits
accounting concept of 132-132
economic concept 132-136
measurement of 132-136
classification of 133-136
Bernoulli choice 80-81
boolean product operator 180-182
boolean sum 181-182
burden of social costs 32-36, 45-47, 93-102

calculus of Decision 1
categories of fuzzy membership functions 218-224
center of gravity method 252-255
classification

characteristic Identification Process 12-13
characteristic set 35-38
characteristic Vector 37-40
   real benefit 39
   real cost 39
choice-decision space 131-132
cluster analysis 210
cohort Analysis 209-210
components of cost 83-86
cost-Benefit duality 80-88
comprehensive social accounting 35-39,106-108
cost space of 64-66
   benefit space of 64-66
distribution space of 64-66
of contingency 67-73
concept of fuzzy set 180-182
cost-Benefit criterion 13
cost-Benefit conditions 13-20
cost-Benefit identification matrices 36-42, 53-67
cost-Benefit selection problem 274
cost-Benefit space 12-13
cost-Contingency Matrix 67-73
cost Identification Matrix 91-124, 110-112
cost Space 64-66, 88-91
cost Time 7-8
core of trapezoidal fuzzy number (TZFN) 235-237
criterion field, 267-269
current cost set, 82
cost concepts of Cost 81-86
consumer offer curve (coc) 51-55
contingency index 70-76
contingency set 68-77
contingency valuation method (CVM) 49-59, 129-131
control Technology 72-75
convex fuzzy decision 253-255, 264
convex fuzzy set 217
cost aggregate 49, 106-108
cost effective analysis 21, 23-27, 142
cost efficiency 17
cost identification matrix 43-45
dissimilitude relation 214-215
distance Function 188-192
deny of Euclidean distance 189-192
deny of Hamming distance 188-192
Distribution space 64-66
Distributional weights 26-27, 45-49, 96-106, 115-120, 146-155, 268-271
Double counting 158
discounting algorithm 155
evergy index 195-196
evironmental quality problems 3
equivalence principle 50-51
equivalence relation 213-215
Euclidean distance 188-192
exponential membership functions, 219-220, 222
extension principles, 226-229-242

D
decision-choice process 274
decision-choice rationality 1-3
decomposition of fuzzy decision 256-259
decomposition of fuzzy relation 209-213
decomposition theorem 196-202
defuzzification 59, 293-295
defuzzification module 293-295
degree of importance 282-292
degree of unimportance 282-292
degrees of accuracy, 177-179
discounting algorithm 155
decision-choice process 274
decision-choice rationality 1-3
decomposition of fuzzy decision 256-259
decomposition of fuzzy relation 209-213
decomposition theorem 196-202
defuzzification 59, 293-295
defuzzification module 293-295
degree of importance 282-292
degree of unimportance 282-292
degrees of accuracy, 177-179
discounting algorithm 155
fuzzy blurring 217
fuzzy certainty 245
fuzzy complement 182-188
fuzzy concentration 216-217
fuzzy confidence interval 224-229
fuzzy confidence coefficient 224-226
fuzzy constraint 243-249, 254-255, 262-265
fuzzy mathematical program 29-31, 255-265
fuzzy maximal decision set 249-251
fuzzy maximum 227-229
fuzzy measure 260-262
fuzzy minimum 227-229
fuzzy multiplication 227-229
fuzzy numbers 224-242
fuzzy optimal decision, 250-252
fuzzy optimization problem, 251-265-285-292
fuzzy ordered preference by minimum variance (FOPMV), 280
fuzzy order relation 215
fuzzy partition 38
fuzzy rationality 57-59
fuzzy relation 202-217
fuzzy relational matrix 203-205
fuzzy risk covering 226
fuzzy set covering 178-180
fuzzy Threshold 28-30
fuzzy Union 183-188
fuzzy value theory 77
fuzzy containment 182-188
fuzzy decision module 293-295
fuzzy decision problem 243-246
fuzzy decision process 243-251, 277-294
fuzzy decision space, 259-261
fuzzy dilation 216-217
fuzzy distribution function 178-180
fuzzy Division 227-229
fuzzy environment 244
fuzzy equilibrium weights 99-105
fuzzy equivalence relation 213-215
fuzzy goal, 243-247, 254-255, 262-265
fuzzy graphs, 202-212, 218-224
fuzzy incompatibility principle 27-30
fuzzy information 165-166
fuzzy intensification 216-217
fuzzy intersection 183-188
fuzzy interval arithmetic 226-242
fuzzy logic 57-59
fuzzy variable 178-179

G
global criterion, 268
goal of Fuzzy decision
goals of computable Identification 62-67

H
hamming distance 152, 188-192
Hasse Diagrams 271-275
hedonic pricing approach (HPA) 55-57
historic cost, 81-82

I
identification problem
of appropriate prices 26-27
of discounting 26-27
of real benefit 26-27
of real costs 26-27
of distributive weights 26-27
incomplete information 28-30
identification matrixes 36-38
conceptual structure of 37-47
of benefit 44-46
of cost, 43-45
index of fuzziness, 193-196
Entropy index of, 195-196
Linear index of 193-196
Proportionality index of 195
Quadratic index of 193-195
information elicitation 93-94, 283
informed subjective judgment, 21-22
intersection of fuzzy relations 208-209
intersection of fuzzy sets
intertemporal aggregation 13, 300-3
intertemporal benefits 33-38
intertemporal costs 33-38

L

lattice 271-275
logical Scheme of the theory of fuzzy decision 293-295

M

marginal Membership functions 205-209
  fuzzy projection of 206-207
  downward projection of 206-207
  upward projection of 206-208
  projections of 206-209
matrix of distributional weights 268-271
matrix identification 36-39, 143-146, 158-165, 43-45, 53-67, 62-73, 91-124
matrix identification relation 36-39
matrix of intersection 210-215
measurement of benefits 132-136
measure of inexactness 224
membership set 203-206
minimum squared averaging, 280
misery Index 78
module of fuzzy equivalence 293-295
module of fuzzy optimization 293-295
multi-alternative decision problem 35-36
multi-attribute decision 35-36
multi-criteria decision making 265-292
multi-objective decision problem 9-11, 34-36
multiplication of fuzzy members 227-229

N

non-fuzzy certainty 245
non-humanistic systems 66-77
normal fuzzy set 177-196
  Graph of 202-209, 218-226
  operations on 182-188
normative science 2

O

optimal coefficient of importance 278-280
optimal coefficient of unimportance 278-280
optimal decision elements 285-280
optimal membership averaging (OMA) 249-280
optimal prices 12
optimization 255-265-277-280
fuzzy duality of 247-259
of fuzzy decision 249-255
  of fuzzy goal 247-251
  of weighted fuzzy function 265-292
ordered weighted average 270

P

postulate of political expediency 608
potential 4
power fuzzy set 216-217
prescriptive science 2
prescriptive theory 2
principle of willingness
to accept 50-55
to pay 50-55
priority score 274-277, 280-292
problem of fuzziness 78-80
producer offer curve 51-55
program vector 38-44
proper concept formation 21-22
project selection problem 274
Q

quality of Life 77-78
quality index 78

R

ramp membership function 220-221, 222-223
real benefit characteristics 10-13, 26-27, 33-35, 158-165
real cost characteristics 10-13, 26-27, 33-36, 1-96
relational Matrix 37-45
relational values 36-39
Rent-seeking, 33
resemblance relation 213-215
revealed preference method (RPM) 49-59, 130-131
risk analysis 70-76, 226
risk covering 226
risk function 255-226

S

shades of meaning 177-179
simple matrix 40-49
social Cost of Mental Illness 108-127
  cost-identification matrix of 110-112
  aggregatecost data of 112-115
  distributional weights of 115-120
  projection of 119-121
social Costing 83
social decision space 8-11
security identification Matrix 69-76
Social intensity weights 149
Social partition matrix 42-47
social partition vector 37-47
static aggregation 12-13
step-membership function, 218-222
steps in social costing 125-127

T

technological benefit 71-78
technological cost, 71-78
treatment of mental illness 156-176
triangular Fuzzy numbers 224-235
total criterion weight 278

U

union of fuzzy sets 183-188
union of fuzzy relation 208
upper level cut 199
upper projection 206-207

V

variable of Fuzziness 178-79

W

welfare function 13-22
willingness to accept (WTA) 129-131, 140-142
willingness to pat (WTP) 129-131, 140-142
