## Subject Index

- automorphic function, 17
  - distribution, 126
- bilinear operations  $L_{\nu_1, \nu_2; \nu}$ , 3, 39
  - applied to Eisenstein distr. 69
  - transferred to  $\Pi$ , 71, 73
- $C^\infty$ -vectors of  $\pi_\nu$ , 12
- Cohen products, 1
- coherent states, 121
- composition of symbols, 4, 40, 184, 185
  - homogeneous — 35, 40
  - asymptotics of — 189
- continued fractions, 215
- cuspidal forms, 3, 51, 61
- Dirac's comb, 163
- Dirichlet series with the  $\lambda_k$ 's as poles 151, 152
- distribution space  $\mathcal{D}'_\nu$ , 14
  - modular distribution, 17
- Eisenstein series, 5, 19, 61
  - distribution 17, 19
- Euler operator, 26
- Fourier coefficients of forms, 20
  - of Eisenstein distrib. 21
  - as hyperfunctions 56
  - recovering — 66
  - and  $L^2$ -norm 62
- generating series of cuspidal forms, 153
  - their Fourier coefficients, 156
  - their polar parts, 157, 160
- Hecke operators, 7, 70, 132, 173
- holomorphic discrete series, 177
- homogeneous functions, 28
- horocyclic calculus, 182
- hyperbolic distance, 25
- hyperfunctions, 46, 56, 64
- infinitesimal operators, 11
- intertwining operator, 13, 22, 29
- Iwasawa decomposition, 25
- Kloosterman sums, 91
- $L$ -function, 131, 145
- Lax-Phillips theory, 194
- Maass-Hecke forms, 131
- Mehler's formula, 27
- metaplectic representation, 119, 179
- $p$ -adic calculations, 168
- Petersson space  $L^2(\Gamma \backslash \Pi)$ , 48
- Poisson bracket, 73
  - of Eisenstein series 111
  - reduced — of Eisenstein series 111
- product of Eisenstein series, 78
  - reduced product — 80, 82
  - continuous part of product, 89
  - continuous part of red. prod. 84
  - discrete part of red. prod. 101
- quadratic fields, 216
- Radon transform, 4, 25
  - (dual) — 25
  - in an  $L^2$ -context 27
- Rankin-Selberg unfolding method, 66
- residues (cuspidal), 19
- resolution of identity, 121
- Roelcke-Selberg expansion, 5, 50, 61
  - of product of Eisenstein series, 89, 133, 138
  - of reduced product of Eisenstein series, 84, 101
  - of Poisson bracket, 145
  - of reduced Poisson bracket, 112
- symbolic calculi, 179
- symplectic Fourier transf., 26
- Weber-Schafheitlin integral, 46, 72, 88, 105
- Weyl calculus, 33
- Wigner function, 121
- zeta series  $\zeta_n$  in two variables, 91, 108
  - link with Kloosterman sums 93
  - odd — 95, 112
  - residues of — 141
  - analytic continuation of — 108, 112
- zeros of zeta function, 97, 101, 108, 151, 152, 157
