

- Anderka O → Mayer G  
Andreeva IE → Chebotareva N
- Balthasar S → Vogel V  
Berth G, Dautzenberg H, Cölfen H:  
Physicochemical and chemical  
characterisation of chitosan in dilute  
aqueous solution 50  
Borchard W → Kisters D  
Borchard W → Straatmann A  
Borchard W, Cölfen H, Kisters D,  
Straatmann A: Evidence for phase  
transitions of aqueous gelatin gels  
in a centrifugal field 101  
Börger L → Lucas G  
Bozóky Z, Fülöp L, Jánoki G: Combi-  
nation of preparative and analytical  
ultracentrifugation methods for the  
investigation of low-density lipopro-  
tein aliquots to prepare radioactive-  
labelled lipoproteins 43  
Broek van den JA → Vogel V
- Chebotareva N, Andreeva IE, Makeeva  
VF, Kurganov BI, Livanova NB,  
Harding SE: Self-association of phos-  
phorylase kinase from rabbit skeletal  
muscle in the presence of natural  
osmolyte, trimethylamine  
N-oxide 70  
Chirkova MV → Zaitseva I  
Cölfen H → Berth G  
Cölfen H → Borchard W  
Cölfen H → Lucas G
- Dautzenberg H → Berth G  
Durchschlag H → Tzatzios C  
Durchschlag H, Zipper P, Krebs A:  
Prediction of hydrodynamic para-  
meters of *Lumbricus terrestris* hemo-  
globin from small-angle X-ray and  
electron microscopic structures 141  
Durchschlag H, Zipper P: Correlations  
between crystallographic, small-angle  
scattering and hydrodynamic data  
of biopolymers 121  
Durchschlag H, Zipper P: Modeling  
of protein hydration with respect  
to X-ray scattering and hydrody-  
namics 131
- Errington N, Mistry P, Rowe AJ:  
Protein hydration varies with protein  
crowding and with applied pressure:  
a sedimentation velocity study 58  
Eschbaumer C → Tzatzios C
- Fülöp L → Bozóky Z
- Grigorescu G → Wandrey Ch
- Haase W → Vogel V  
Harding SE → Chebotareva N  
Hunkeler D → Wandrey Ch
- Jánoki G → Bozóky Z
- Khotimsky VS → Zaitseva I  
Kisters D → Borchard W  
Kisters D, Straatmann A, Borchard W:  
The sedimentation behaviour of gels  
the generalised Lamm differential  
equation 92  
Krebs A → Durchschlag H  
Kurganov BI → Chebotareva N
- Langer K → Vogel V  
Lavrenko P, Yevlampiev K, Volokhova  
D: Hybrid polymer heterogeneity  
and boundary profile in a low-speed  
sedimentation experiment 19  
Lechner MD → Mächtle W  
Litvinova EG → Zaitseva I  
Livanova NB → Chebotareva N  
Lucas G, Börger L, Cölfen H: Solubility  
equilibrium gradients in the analytical  
ultracentrifuge: an approach towards  
the isolation of critical crystal nuclei  
in solution 11  
Ludwig B → Mayer G
- Mächtle W → Vogel V  
Mächtle W → Tzatzios C  
Mächtle W, Lechner MD: Evaluation  
of equilibrium and nonequilibrium  
density gradients in an analytical  
ultracentrifuge by calibration with  
marker particles 1  
Makeeva VF → Chebotareva N  
Mayer G, Anderka O, Ludwig B, Schu-  
bert D: The state of association of the  
cytochrome bc<sub>1</sub> complex from *Para-  
coccus denitrificans* in solutions of  
dodecyl maltoside 77  
Michailova NA → Zaitseva I  
Mistry P → Errington N
- Pavlov GM → Zaitseva I  
Pavlov GM: Evaluation of draining and  
volume effects in the interpretation of  
hydrodynamic data for linear macro-  
molecules 149
- Rjuntsev EI → Zaitseva I  
Rowe AJ → Errington N
- Schubert D → Mayer G  
Schubert D → Vogel V  
Schubert D → Tzatzios C  
Schubert UH → Tzatzios C  
Schuck P → Tzatzios C  
Schuck P → Vogel V  
Straatmann A → Borchard W  
Straatmann A → Kisters D  
Straatmann A, Borchard W: Determina-  
tion of thermodynamical properties of  
sodium alginate from bacteria and  
seaweeds in aqueous solutions 64
- Tzatzios C, Precup AA, Weidl CH,  
Schubert UH, Schuck P,  
Durchschlag H, Mächtle W, van den  
Broek JA, Schubert D: Studies on the  
partial specific volume of a poly(ethy-  
lene glycol) derivative in different  
solvent systems 24  
Tzatzios C → Vogel V
- van den Broek JA → Tzatzios C  
Vogel V, Langer K, Balthasar S,  
Schuck P, Mächtle W, Haase W,  
Broek van den JA, Tzatzios C,  
Schubert D: Characterization  
of serum albumin nanoparticles  
by sedimentation velocity analysis  
and electron microscopy 31  
Volokhova D → Lavrenko P
- Wandrey Ch, Grigorescu G, Hunkeler D:  
Study of polyelectrolyte complex for-  
mation applying the synthetic bound-  
ary technique of analytical  
ultracentrifugation 84  
Weidl CH → Tzatzios C  
Wills P, Winzor D: Exact theory  
of sedimentation equilibrium made  
useful 113  
Winzor D → Wills P
- Yevlampiev K → Lavrenko P  
Yevlampieva NP → Zaitseva I
- Zaitseva I, Michailova NA, Yevlampieva  
NP, Rjuntsev EI, Khotimsky VS,  
Litvinova EG, Chirkova MV, Pavlov  
GM: Properties of a membrane-form-  
ing polymer, poly(1-trimethylgermyl-  
1-propyne), in dilute solutions 37  
Zipper P → Durchschlag H
