

Subject Index

- abrasion, 303
- absorption property, 218
- additivity, 244
- adjacency, 281
- adjacency relation, 281
- adjacency system, 283
- alignment, 364, 369
- alpha shape, 266
- alpha-neighbourhood, 264
- Amphiphile, 108
- Amphiphilic system, 108
- anchoring angle, 180
- anchoring energy, 180
- anisotropy, 248
- anti-extensivity, 218
- anti-granulometry, 219
- area interaction process, 399
- area opening, 218
- asymmetry, 245
- atom, 252
- autocorrelation function, 231

- bend, 177
- bending rigidity, 115
- Betti number, VII, 264
- bicontinuous, 110, 134, 141, 144
- binomial point process, 268
- biomembrane, 107, 109
- biomineralization, 144
- birth-and-catastrophe process, 409, 410, 412
- birth-and-death process, 391, 395
- black and white space groups, 122
- block copolymer, 96, 144
- Boolean depletion model, 358, 375, 376
- Boolean model, XI, 11, 17, 29, 38, 41, 47, 49, 54, 55, 60, 62, 102, 270, 296, 318, 323, 327, 344, 350
- Boolean random function, 24
- bound, 17

- boundary operator, 263
- Bresenham line, 222

- capacity functional, 323, 338
- capillary waves, 180
- catchment basin, 233
- Cech homology, 264
- center map, 321, 352
- centroid, 245
- ceramics, 101
- CFTP, 403
- characterization, 46, 63
- characterization theorem, 244
- charge, 195–198, 200, 203
- chemical activity, 418, 420
- chirality, 157, 161
- cholesterol, 154, 156
- Choquet capacity, 4, 5
- chord distribution function, 67
- chord-length distribution function, 38, 302
- clan of ancestors, 408
- Clifford algebra, 385
- closing, 218
- CMC-surface, 112
- coalescence time, 406, 407
- columnar phases, 176
- complementary adjacency system, 288
- composite material, V, 275
- composites and filled polymers, 101
- computer simulations, 172
- conditional cross-correlation, 363
- conditional mark probability density, 361
- conformal transformations, 115
- conformally invariant, 139
- connected components, 261
- connectivity, 75, 275
- connectivity density, 294
- connectivity number, 219

- contact distribution, V, XI, 317, 318, 324–326, 338, 345, 351, 422, 423
 convex ring, 277
 convex-continuous, 244
 copolymer, 227, 233
 correlation function, IX, XII, 37, 51, 52, 66
 coupling, 391, 397, 401, 412
 covariance, 7, 76, 363
 Cox random field model, 358, 380
 cubic bicontinuous, 121
 curvature, 243
 curvature centroids, 245
 curvature index, 116, 137
 cutoff resolution, 265
- dark matter halo, 368
 Delaunay triangulation, 266
 density functional theory, X, 255
 depletion, 375
 detailed balance, 394, 398
 diblock copolymer, 109, 121, 131
 dielectric permittivity, 9
 dilation, 6, 78, 216
 dilation curve, 219
 dipolar energy, 160
 direct correlation function, 178
 directional signature, 228
 directional texture, 226
 discretization of a set, 281, 286
 disk, 223
 dislocation, 98
 disorder, 187
 distance correlation, 425
 DMPA, 154
 domain shape, 156, 160
 dominated coupling from the past, 392, 403
 dominating process, 401, 403
 dopant profiling, 101
 DPPC, 154, 156, 157, 161
- elasticity, 13
 electrochemical etching, 100
 electrostatic analogy, 195
 ellipsoid, 172, 173
 empty space function, 362
 emulsification failure, 111, 128, 131, 139
 energy cascade, 429
 energy minimization, 161, 163
 equilibrium, 187, 191, 192
 erosion, 6, 78, 216, 219
 erosion function, 301
 erosion-dilation, 49, 64
 Euler characteristic, VII, X, 40, 47, 49, 75, 219, 261, 275, 278
 Euler number, density of, 294
 Euler-Poincaré formula, 278, 286
 exact simulation, 392
- Farey sequence, 224
 filamentary alignment, 364, 369
 fluid membrane, 109
 fluidity of the membrane, 141
 fluids, VIII, 255
 fluorescence microscopy, 154
 foam, V, VI, VIII, IX, 187
 Fourier approach, 122
 Fourier transform, 137
 fractals, 270
 fracture, VII
 fracture statistics, 23
 Frank elastic constants, 177
 fully developed turbulence, 428
- galaxy, 248, 366
 galaxy cluster, 249
 galaxy distribution, X
 Gauss-Poisson (process, model), 333, 340
 Gaussian bending rigidity, 115
 Gaussian model, 39, 41, 49, 50, 67
 Gaussian random field, 114, 136, 143, 382
 Gay-Berne potential, 174
 generating functional, 431
 geometric algebra, 385
 geometry, 195, 197
 geometry index, 128
 Gibbs distribution, 114
 Gibbs pixel-particle, 308
 Gibbs point process, 420
 hard-core, 422, 423
 Gibbs process, XII
 Ginzburg-Landau model, 117, 136, 143
 Ginzburg-Landau theory, 122
 Goldstone's theorem, 177
 grain model, 322, 337
 granulometry, X
 granulometry by closing, 219
 Griffith criterion, 26
- h-minima transformation, 233
 Hadwiger's recursive definition, 278

- Hamiltonian, 159
- hard core process, 399, 408
- hard gaussian overlap particle, 173
- hard spheres model, 18
- hard-core, 372
- hierarchical field correlation, 382
- hit-or-miss transform, 234
- homogeneous lattice, 280
- homogenization, 9
- homology, 262
- horizontal CFTP, 403
- hydrophobic effect, 108

- idempotent, 218
- image analysis, 275
- inclusion-exclusion principle, 278
- increasingness, 218
- independent marking, 321, 332, 347, 420
- independent sub-point process, 360
- inertia tensor, 242
- influence zones, 233
- intensity (function, measure), 320, 321, 327, 332
- interaction potential, 418, 420
 - repulsive, 424
- intermittency, 429
- isosurface, 97, 136
- isosurface construction, 117
- isotropic-nematic transition, 177
- iterated function system, 270

- J-function, 362
- jump process, 391, 393, 395, 413

- K-function, 362

- L-function, 427
- Langmuir monolayer, VIII, 154
- Laplacian, 203
- lattice animal, 305
- level surface, 136
- line segment, 221
- line tension, 157, 160
- lipid bilayer, 107
- lipids, 108
- liquid crystal, VI, VIII, 172
- local energy, 420
- local stability, 398, 399
- luminosity segregation, 366, 367

- mark, 358
- mark correlation, 358
- mark correlation function, 367
- mark distribution, 321, 419, 423
- mark fluctuation, 363
- mark probability density, 360
- mark segregation, 359, 361
- mark-independent clustering, 361
- mark-variogram, 363
- marked point process, 321, 358–360, 419
- Mars, 369
- Martian craters, 369
- mass vector, 242
- mathematical morphology, 233
- mean curvature, VIII, 40, 47, 52, 62
- mean mark, 363
- mean normal (measure, distribution), 330
- mesophase, 172
- mesoporous system, 144
- metals, 100
- method of intensities, 54
- microdomain structure, 96
- microemulsion, V, VI, VIII, 110, 134, 141, 143
- micrograph, 72
- microphase separation, 109
- minimal perimeter problem, 187
- minimal spanning tree, 266
- minimal surface, VIII, IX, 118, 125, 128
- minimum perimeter, 205
- Minkowski addition, 222
- Minkowski functional, IX–XI, 8, 39, 40, 46, 48, 50, 53, 54, 57, 60, 63, 67, 164, 165, 238, 328
- Minkowski valuation, 238
- Minkowski vector, 245
- modeling of materials, 103
- molecule, 252
- monolayer texture, 156, 157, 159
- Monte Carlo simulation, 114, 140
- morphological covariance K , 231
- morphology segregation, 366
- mosaic model, 16
- motion covariance, 244

- n-point correlation densities, 430
- nanotomography, VII, 93
- Navier-Stokes equation, 428
- nearest neighbor distribution function, 362
- neighborhood graph, 281, 284

- nematic phase, 172, 176
 network model, 75
 Neyman-Scott (process, model), 334, 340
 Nguyen-Zessin-Georgii equation (NZG), 421
 nodal approximation, 123
 numerical simulation, 22
- octagon, 223
 opening, 217
 optimal properties, 18
 orientation, 369
 orientation image, 230
- pair correlation function, 425
 parallel body, 64, 66
 parallel set, 264
 parallel surface, VIII, IX, 49, 63, 112, 125
 Pareto distribution, 30
 particle process, 318, 320
 pattern spectrum, 219
 percolation threshold, 55, 56
 perfect simulation, XII, 392, 402, 404, 406, 412
 periodic line, 222
 permeability, 75
 persistent Betti number, 265
 phase field method, 117
 phase separation, 157
 phase transition, 154, 161
 phospholipid, 153, 154, 161
 pixel-particle, 305
 planar alignment, 365, 369
 plasma etching, 97
 point process, V, XI, XII, 317, 319, 345, 359, 418
 Poisson cluster (process, model), 331, 334, 337, 348
 Poisson process, 318, 323, 327, 420
 polyconvex set, 277
 polymer films and coatings, 99
 pore, 373
 pore network, 373
 pore size distribution function, 38, 76
 porosity, 43, 44, 70
 porous medium, VI, 21, 75, 275, 373
 pressure, 193, 195, 197, 198, 200, 202
 pseudo-granulometry, 219
 pseudo-likelihood method, 419
- radius-vector function, 301
- random closed set, 317, 322, 342
 random damage, 28
 random field, 75
 random field model, 358, 371
 random function, 4, 5
 random labelling property, 365
 random multiplicative branching process, 428
 random set, 4
 random surface, 134
 random-field model, 380
 reconstruction, 38, 41, 54, 58, 64, 67
 reflection condition, 123
 regeneration, 398, 404
 renormalization, 116, 141, 143, 144
 renormalized, 139
 rose of directions, 227
- saddle-splay modulus, 115
 sandstone, 42, 44, 51, 53, 56, 60, 63, 69, 373
 scanning probe microscopy, 93
 scattering intensity, 143
 segmentation, 220
 self-assembly, 107
 semiconductor, 101
 serial section, 95
 shape function, 301
 shape ratio, 300
 shape theory, 264
 Sierpinski triangle, 270
 similarity of textures, 161
 simplicial complex, 262
 simulating Gibbs pixel-particles, 309
 simulation, 31, 163
 size distribution, 219
 skeletal graph, 118
 smectic phase, 172
 soft condensed matter, 107
 soil, 76
 spatio-temporal process, 391
 spherical contact distribution, 7
 spherocylinder, 175
 spiral galaxy, 248
 splay, 177
 sponge phase, 110, 134, 141
 spontaneous curvature, 111, 115, 125, 129, 130, 136, 144, 160
 stationarity, 320–322, 327
 Steiner formula, 241
 Stoyan's k_{mm} function, 363
 Strauss process, 399

- structure formation, 102
- structure-property relationship, 102
- structuring element, 216, 318, 329
- support measure, 335, 338
- surface area, 40, 47, 52, 62
- surface area measure, 330, 335
- surface of constant mean curvature, 128
- surface tension, 115, 118
- surfactant, 108
- synthetic rubber, 96

- Takacs-Fiksel method, XII, 422
- tangent-angle function, 301
- tensides, 108
- texture, X, 215
- thermal fluctuation, 116, 127, 139
- thermoplastic elastomer, 96
- third order bounds, 9, 10, 13
- topology, 75, 193–195, 197, 205
- topology index, 116, 122, 133, 136, 137
- transport, 75
- triangulated surface, 141
- triply periodic minimal surface, 112, 118
- triply periodic surfaces of constant mean curvature, 112

- turbulence, XII
- twist, 177

- upper and lower process, 405

- vector mark, 364
- vector-mark correlation function, 364
- volume fraction, 40, 43, 44, 50
- volume imaging, 93
- Voronoi diagram, 266
- Voronoi model, 40, 49, 50
- Voronoi tessellation, 41

- watershed transformation, 233
- wavelet, 432
- weakest link model, 24
- Weibull distribution, 30
- Weibull statistics, 25
- Weierstrass representation, 120, 124, 145
- Widom-Rowlinson model, 377
- Willmore problem, 122
- Willmore surfaces, 118

- X-ray tomography, 75
