

Subject Index

- absolute instability 252
- acoustic
 - cavitation 280
 - chaos 280–282
 - energy 10–11, 75, 85, 163–164
- adiabatic invariant 220
- analogies table 208
- aperiodic vortices 216

- Biot-Savart law 14, 76
- blade-vortex interaction 66–74
- Born approximation 126, 129, 177

- causality 251
- channel 239
- characteristics 269
- completeness (of the continuous spectrum) 244
- continuous spectrum 240–243
- convective instability 252
- conversion phenomenon 224
- critical layer 241
- Curle’s equation 58
- curvature effect 257–259
- cyclotron damping 207

- Debye series 162
- distribution function 197
- Dyson equation 147

- eigenfunction 211
- eigenvalue 210
- elastic plate 248
- energy exchange 221
- entropy equation 4
- equation
 - Fredholm integral 245
 - kinetic 194
 - Nonlinear Schrodinger 261
 - of state 266–267
 - Orr-Sommerfeld 196
 - Rayleigh 196, 241
 - dispersion 139, 163
 - eikonal 163
 - Helmholtz 43, 153, 170
 - Lighthill *see* Lighthill
 - parabolic 171–172

- fluid loading 248

- geometrical acoustics 160–168, 218
- Green’s function 8, 17–20, 43
- group velocity 252

- hamiltonian
 - functional 239
 - structure 245
- high-speed train 94
- Hilbert transform 244
- Howe’s acoustic analogy 40

- instability (acoustic) 201

- Landau damping 194
- leading edge 80
- Lighthill
 - acoustic analogy 4–7, 31–33
 - eighth power laws 35
 - equation 33
 - stress tensor 32

- mass operator 147
- multiple scattering 143–159

- negative energy waves 199, 249, 254–256
- noncanonical Poisson bracket 246

- nonlinear effect 259–262
- nonlinear waves 268–270
- normal operators 211
- numerical calculations 227

- optical theorem 129
- oscillator 245
- oscillators 230
- over-reflection 200

- phase speed 194

- random media 143, 144
- ray path 165, 168
- Rayleigh criterion 239
- resonance 194, 207, 231
- Rossby waves 193

- scattering of sound 122–131
- self-adjoint 211
- shallow water 135–139
- shear flow 239

- shear rate 217
- shock wave 270–271
- singularity 194, 241
- solitary wave 262
- sonoluminescence 272–276
- spatial Fourier harmonics 211
- spinning vortex 41
- surface wave 132–135

- total enthalpy 20, 39
- trailing edge 64, 78
- turbulence spectrum 173–175

- velocity
 - group velocity 133, 134, 164
 - phase velocity 133, 164
- vortex sheet 199
- vortex sound 14–17, 61, 119–121

- wave-vortex interactions 213
- Zel’dovich effect 207
