

Subject Index

- acetylcholine as trophic factor 99, 100
 - esterase, expression 113, 114
 - receptor, expression 111, 114
- adenosine, macula densa signal 28
 - , renin release 28, 31
- adenylate cyclase, regulation of secretion 15
- adrenergic action, renin release 29, 30
- aldosterone secretion 15, 16
- ANF 72
 - , aldosterone secretion 54
 - , cGMP 18, 19, 43, 45, 48
 - , cGMP-dependent protein kinase 59
 - , particulate guanylate cyclase 48
 - peptides 48
 - receptors 48
 - , renin release 18, 19
- anti-sciatin antibody 113, 114, 115
- atrial natriuretic peptide see ANF
- autophosphorylation 57
- axonal flow, transferrin 116, 118

- baroreceptor, intrarenal 26, 27
- blood brain barrier, transferrin 117

- Ca²⁺-ATPase, cGMP-PK 63, 64
- Ca²⁺ channel blocker 21
 - channels, cyclic nucleotides 73
 - , voltage-gated 11
 - , cytosolic, cyclic nucleotides 72, 73
 - , -, second messenger 69, 70
 - , entry blockers 13, 14
 - , guanylate cyclase activity 47
 - , juxtaglomerular cells 11
 - mobilizing hormones 13
 - paradox 23-25
 - release, inositoltriphosphate 73
- calmodulin 71
 - antagonists 14, 20
 - , renin release 13-15, 17, 20
- cAMP, regulation of secretion 15
 - , renin release 16, 18, 24
 - see also cyclic nucleotides
- cathepsins 8

- cell culture, history 109
 - , myogenic 110
 - , - cells 96, 98
- cGMP, acetylcholine 44
 - , Ca²⁺-ATPase 73, 74
 - , Ca²⁺-pump 63, 64
 - , calcium-lowering effects 72
 - , cation channel effect 52, 53
 - , cellular level, regulation of 44ff
 - , effects on cAMP 53, 54
 - , history 42
 - , hormonal regulation 44, 47
 - , intracellular Ca²⁺ 47
 - , mechanisms of action 52ff
 - , Na⁺, K⁺, Cl⁻-cotransport 74
 - , negative inotropic agents 54, 59
 - , neurotransmitter 46, 47
 - , phosphodiesterases 49-51, 53
 - , platelet function 74, 75
 - , protein kinase 52, 53
 - , - phosphorylation, functions 74, 75
 - , regulation of phosphodiesterases 53, 54
 - , - of secretion 15
 - , renin release 18, 19
 - , in smooth muscle 44, 45
 - , versus other second messengers 42
 - , synthesis, regulation 43, 44
- cGMP-dependent protein kinase, cerebellar 62
 - - - , distribution and regulation 57-61
 - - - , immunocytochemistry 60
 - - - , intracellular concentration 58
 - - - , smooth muscle 62, 63
 - - - , structure and properties 55-57
 - - - , substrates for 61-67
- cGMP-regulated proteins 43, 44, 52
- Cl⁻-channel, calcium-activated 21, 24
 - , cGMP 74
- creatine kinase activity 110, 111
- cromakalim, renin secretion 22
- cyclic nucleotide phosphodiesterases 49, 50, 51
 - nucleotides, calcium mobilizing pathways 72, 73

- , — removal 73, 74, 75
- , cytosolic calcium 71, 72
- , protein phosphorylation in platelets 66
- , renin release 15 ff
- , secretion 3
- cytoskeleton 59
- , protein kinase 74
- , role of in (renin) secretion 8, 9
- , transferrin cycle 108

- denervation see muscle denervation
- desferoxamin 105
- 1,2 diacylglycerol 11, 15, 69, 70, 72
- dibucaine 111
- DNA, muscle fiber 94, 99
 - synthesis 104
- dopamine 30

- elevator hypothesis 108
- embryo extract, cell growth 109–110
- endothelium-derived relaxing factor 46, 59
 - — —, renin release 19
- enterotoxin, guanylate cyclase 49
- escalator hypothesis 108

- Fe, cell proliferation 103
 - , in cell cycle 104, 105
 - , chelators 104
 - , metabolism 112
 - , muscle fiber 117, 118
 - , muscle development 112
 - , release from transferrin 107
 - , requirement, muscle fiber 112, 113
 - , transferrin 105
 - , transferrin gene regulation 105
 - , uptake by motoneurons 117
- ferritin 120
- forskolin 16

- G-proteins, cellular secretion process 3, 11
 - , control of exocytosis 19, 20
 - , renin secretion 20
- glucagon 16, 30
- guanylate cyclase, ANF 18, 19, 59
 - , ANF-receptor domain 49
 - , Ca²⁺-dependent regulation 47
 - , particulate 45, 48, 49
 - , —, amino acid sequence 48
 - , protein kinase 47
 - , soluble 44–47

- heme 45, 46
- hemin 111

- holotransferrin 101, 121
- hypoxanthine 110

- juxtaglomerular apparatus 2, 3
 - cells, Ca²⁺ current 21
 - , calcium conductance, renin release 21, 26
 - , cell volume 23, 24
 - , chloride currents 22, 24
 - , cloning 4
 - , cytoskeleton 9
 - , electrical properties 21
 - , intracellular calcium 11, 12
 - , isolated 5
 - , myofilaments 24
 - as osmometers 23, 29
 - , paradoxical Ca²⁺ effect 23, 24, 25
 - , patch clamp studies 21, 25
 - , phosphoinositol breakdown 14
 - , potassium conductances 21, 22, 24, 25
 - , processing of renin 6, 7, 8
 - , renin release 9, 10
 - as stretch receptor 26
 - tumor cells 4, 5

- kallikrein 8
- kemptide 62
- kidney, hydronephrotic model 4
 - , isolated cells 4, 5
 - , juxtaglomerular apparatus 2, 3
 - , mesangial cells 58, 59
 - , microdissected arterioles 4

- lactoferrin 101
- lysosomal enzymes and renin 7
- lysosomes 7, 107
- lysosomotropic substances 7

- macula densa segment 27, 28
- membrane potential, regulation of exocytosis 21
- motoneuron, Fe donor 115
 - , transferrin 115, 116
- motor unit 116
- multivesicular bodies 107
- muscle atrophy, denervation 97, 98
 - , prevention 97
 - , — of by stimulation 100
 - cell growth in myogenesis 92–96
 - cells, growth in vivo and in vitro 92 ff
 - , regulation of growth and maintenance 97–100
 - denervation, DNA 98

- -, in vitro model 119
- -, protein metabolism 98
- fiber, embryogenic formation 92
- -, increase in DNA 94, 99
- -, - in nuclei 94
- -, postnatal growth 94, 95
- -, protein/nucleus ratio 95
- -, protein synthesis 95, 96
- growth after denervation 98
- satellite cells 92, 94, 96
- trophic factor, extraction 113
- - -, neurogenic 100
- - -, release 113
- - substance, transferrin 109, 110
- myoblast proliferation, transferrin 111
- myoblasts 92, 93, 96
- myoblobin 120
- myofibrils 95
- myogenesis 92ff
- myogenic cell culture 110
 - cells, differentiation 36
 - -, in vitro growth 96
 - stem cells 92, 93
- myoglobin 111, 112
 - turnover 117
- myosin 111, 112
 - light chain kinase 64, 65, 68, 71
- myotube formation 96, 98
 - growth 111
 - maintenance 111, 112
- , primary 92, 93
- , secondary 93

- Na⁺/Ca²⁺-antiporter, protein kinase C 74
- Na⁺, K⁺, Cl⁻-cotransport, cGMP 74
- Na⁺/H⁺ exchange 69
- neuropeptide Y 31
- nitrate, organic, tolerance to 47
- nitric oxide 45, 46
- nitrovasodilators 45, 46, 59, 64, 65, 66, 68, 75

- oligodendroglia, transferrin 118
- ouabain 12
- ovotransferrin 101

- parathyroid hormone 16, 30
- PG-E₁ 65
- phorbol ester 108, 111
 - -, renin release 14, 15
- phosphatidylinositol turnover 67, 69, 72
- phosphodiesterase inhibitors 50, 51
- phosphodiesterases, Ca²⁺/calmodulin-activated 49, 50
 - , cGMP 49ff
 - , diversity 44
 - , renin release 16
- phospholamban 73
- phospholipase 11, 15
 - A₂, renin release 20, 25
 - C 69, 72
- platelets, adhesion 74
 - , aggregation 54
 - , -, regulation by cyclic nucleotides 70ff
 - , Ca²⁺-pumps, cGMP 73
 - , cGMP-related properties 67, 68
 - , function, cGMP 74, 75
 - , mechanism of activation 68-70
- preprorenin 7
- prorenin 7, 8, 10
- prostaglandins 16, 30
- protein accumulation 110, 111
 - kinase C 11, 15
 - - C, transferrin cycle 108
 - phosphorylation, cAMP-regulated 73
 - -, cGMP-dependent, functions 74, 75
 - -, cGMP-regulated 43, 44, 52, 53, 61ff
 - -, functional significance 61, 62
 - - in intact cells 64-67
- proteinase, neutral, calcium-activated 98
- protoporphyrin IX 46
- Purkinje cells 58

- red muscle fibers, denervation 98
- renin-angiotensin aldosterone system 2
- renin, forms of granules 7
 - , intracellular synthesis 6, 7, 8
 - , modified lysosome 7
 - release 2, 3, 5
 - -, adenosine 28, 31
 - -, ANF 18, 19
 - -, calcium 12-14, 17, 18, 19, 23, 24, 27
 - -, calcium-activated chloride channels 24
 - -, calmodulin 14, 15, 16, 17, 20
 - -, cyclic nucleotides 15ff
 - -, cytosolic water 23, 25
 - -, G-proteins 20
 - -, hormone effects 20, 21, 22, 29-31
 - -, intracellular processes 3, 10ff
 - -, intrarenal baroreceptors 25, 26, 27
 - -, macula densa 27-29
 - -, membrane potential changes 21, 22, 26
 - -, NaCl concentration 27, 28
 - -, osmotic factors 23
 - -, protein kinase C 14
 - -, regulation 2, 3, 5

- -, sympathetic nervous system 29
- secretion, mechanisms 8-10
- , synthesis and secretion, experimental models 4, 5
- , transcription and translation regulation 8
- ribonucleotide reductase 104
- RNA polymerase, Fe 112
- rolipram 51, 52

- sciatin 90, 91, 113-115
 - , identity with transferrin 114, 115
- secretion, cellular, regulation 3, 11
- smooth muscle cells, cGMP-related properties 67, 68
 - - contraction 70
 - - -, regulation by cyclic nucleotides 70ff
 - -, mechanism of activation 68-70
- sodium-calcium exchange 12, 18, 24
- sodium intake, low, renin 8
 - nitroprusside 45, 46, 47, 64
 - -, renin release 19
- somites 92
- sympathetic nervous system, renin release 29

- transferrin, cerebrospinal fluid 117
 - , class specificity 106, 111
 - deficiency 121
 - , effects on muscle cells 111, 112
 - expression 116
 - in extracellular fluid 120, 121
 - , Fe donator 104, 106, 111, 112
 - , growth promoter 96, 103, 104
 - , identity with sciatin 114, 115
 - , internalization cycle model 106, 107, 108, 111, 121
 - , metabolism 101
 - , molecular structures 101
 - , muscle trophic substance 109, 110
 - , neurogenic trophic factor 91
 - , neuroglia 118
 - , properties 100, 101
 - receptor, cell proliferation 105
 - - cycle 108
 - -, distribution on muscle fiber 119, 121
 - - expression, muscle fiber 113
 - -, Fe requirement 105
 - - gene expression 103ff
 - - molecule, genetics 103
 - - -, properties 102, 103
 - - synthesis and distribution, regulation of 105
 - release 115, 116, 118
 - , responses of muscle cells 119
 - , species specificity 106
 - synthesis, hepatic 120
 - -, neuronal 116, 117
 - , transport into cells 106-108, 117, 121
 - uptake, muscle cells 121, 122
 - , various functions 91
- thrombin 74
- trifluoperazine 16
- trophic effects, humoral factors 97
 - factor, at endplate 99, 100
 - -, neurogenic 113
 - -, -, history 90
 - -, see also under muscle
- tubulin 56
- tubuloglomerular feedback 27

- vanadate 12
- vasodilator-stimulated phosphoprotein 67
- vasodilators, cAMP-elevating 68, 71, 72, 74
 - , cGMP-elevating 74, 76
 - , endothelium-dependent 46
