

## INDEX

- Abel integral equations 120
- Aberrations 249
- Absolute 276
- Abundances of elements 186
- Actions 112
- Action space 114
- Active galactic nucleus 165
- Adaptive Optics 262, 278
- Adiabatic invariant 112
- Adiabatic perturbations 75
- Age of universe 19
- Airshower Čerenkov telescopes 332
- Airshower detectors 332
- Air showers 331
- Amplitude errors 264
- Amplitude transfer function 254
- Angle-of-arrival fluctuations 259, 261
- Angular resolution 260
- Anomalous refraction 364
- Antenna beam pattern 355
- Antenna temperature 302, 356
- Anthropic cosmological principle 11
- Aperture efficiency 359
- Aperture synthesis 295, 371, 255, 257
- Astigmatism 250
- Asymptotic giant branch(AGB) 152
- Atmospheric absorption 354
- Atmospheric coherence 277
- Atmospheric noise 365
- Atmospheric isoplanatic angle 266
- Atmospheric windows 354
- Autocorrelation theorem 287
- Axions 57
- Background 335
- Background thermal noise 263
- Back-illuminated CCDs 318
- Baking 322
- Bar detectors 348
- Baryonic matter 57
- Beam-averaged brightness temp.364
- Beam efficiency 359
- Beam switching 365
- Bias mech. for galaxy formation 72
- Big bang 171, 174
- Big bang model 3
- Bimodal star formation 176
- Binary stars 153
- Bispectrum 288
- Black holes 57
- Blue compact galaxy 164, 166
- Bolometers 345
- Bolometric correction 149
- Boltzmann distribution 194
- Box orbits 107, 111
- Brightness temperature 356
- Brown dwarfs 57
- Buried-channel CCDs 317
- Calibration 361
- Carbon stars 154, 175
- Case A recombination 197
- Case B recombination 197
- CCDs 316
- C. for Astr.Redshift Survey 7
- Čerenkov radiation 346
- Cepheid 160
- Channel multipliers 324
- Charge capacity 319
- Charge transfer 318
- Chemical evolution 172
- CID detectors 319
- CLEAN algorithm 373
- Closed-box model 176
- Closure phase 374
- Coded masks 329
- Coherence area  $\sigma$  262
- Coherence length 369
- Coherence lengths 370
- Coherent detectors 332, 257
- Cirrus 222
- Collapse time 45
- Collision ionization 198
- Collisionless Boltzmann eqn.117
- Color-color diagram 168
- Color evolution 168
- Color synthesis 168
- Comoving coordinate 13
- Compton scattering 32
- Compton telescope 330
- Coma 250
- Complex image spectrum 245
- Consequent 105

- Contact discontinuity 202
- Cooling 199
- Cooper pairs 342
- Corotation resonance 144
- Correlation functions 3, 64
- Correlator 257
- Cosmic ray, atomic comp. 193
- Cosmic ray density 192, 221
- Cosmic rays 174
- Cosmic time 12
- Cosmic time/redshift relation 24
- Cosmological constant 15, 29
- Cosmological principle 10
- Coulomb logarithm 99
- Covariance 1258, 261
- Critical density 17
- Critical model of universe 18
- Crossing time 99
- Cryostat 320
- Curvature of space 12
- Curvature sensors 264
- Cutoff wavelengths 312
- Dark matter 3, 27, 56, 179
- Declaration parameter 14
- Deconvolution 269
- $D\Phi$  269
- $D_{\epsilon}$  269
- Delay lines 368
- Delay tracking 369
- Density contrast 28, 42
- Density parameter 17, 26
- Depletion factor 186
- Detective quantum efficiency 303
- Dicke receiver 334
- Diffraction 253
- Diffuse ionized gas 215
- Diffusion coefficients 133
- Digicons 328
- Digitization 246
- Dipole anisotropy 27
- Dissip. role in galaxy formation 79
- Dispersion measure (DM) 191
- Dispersion relation 44
- Distance modulus 149
- Distortion 250
- Distribution function 121, 127
- Doped semiconductor 309
- Doppler imaging 248
- Double-sideband 334
- DUMAND project 347
- Dust particles 188
- Dust temperature 194
- Dynamic range 246
- Early epochs of universe 34
- Earth rotation synthesis 371
- EAS arrays 332
- EBS tubes 328
- Einstein-de Sitter model 18
- Einstein field equations 15
- Electron-beam oscillators 340
- Electron drift velocities 340
- Electron focusing methods 326
- Electrostatically focused tubes 325
- Elliptical galaxy 168
- Energy diagram 309
- Energy gap 308
- Epicycle approximation 105, 136
- Epicycle frequency 105
- Epoch of galaxy formation 40
- Epoch of recombination 30
- ESO VLT project 171
- ESO VLT 296
- Etendue of Coherence 252
- Eulerian coordinates 41
- Evolutionary synthesis 168
- External phase errors 276
- Extinction curve 181
- Far uv-emission 158, 166
- Far uv-excess 171
- Far uv-extinction 158
- Far IR-emission 159, 166
- Fermi energy 309
- FET transistors 335
- Field curvature 250
- Field of view 265
- First generation of stars 79
- Flatness problem 19
- Fluctuations in big bang 3
- Flux density 358
- Fokker-Planck equ. 133, 135, 136
- Format 246, 251
- Fourier coverage 377, 245
- Free streaming 63
- Frequel 255

- Frequency multiplier 341
- Friedmann models 17
- Fried's coherence area 260
- Fried's parameter 260, 262
- Fringe amplitude 369
- Fringe phase 369
- Fringe visibility 368, 273
- Frozen turbulence 258
- GaAs 340
- Galactic center 220
- Galactic chem. evolution 151
- Galactic diff. rotation 206
- Galactic fountains 236
- Galactic halo 236
- Galactic nucleosynthesis 151,172
- galactic warp 217
- Galactic wind 178
- GALLEX cooperation 347
- Gamma radiation 193
- Gamma-rays 331
- Gas dynamics 201
- Gas ionization devices 305
- Gas scintillation counters 308
- Geiger counters 307
- General theory of relativity 15
- Global fringe fitting 377
- Globular clusters, formation of 23
- Graphite dust particles 190
- Gravitational lenses 57
- Gravitational wave detectors 348
- Gravitino 58
- Great attractor 29
- Gunn diode 340
- Halo 264
- Hanbury-Brown and Twiss 258
- Hawking radiation 57
- Heating 199
- Helium abundance 179
- Hertzsprung-Russell diagram 149
- Heterodyne combination 272
- Hidden matter 27
- Higgs field 21
- High energy detectors 329
- High-mass stars 151
- High-velocity clouds 218
- HI region 187
- HII region 187
- HII region- extragalactic 162, 164
- Holographic speckle interferometry 287
- Horizon 17, 50
- Hot electron bolometers 346
- Hubble's constant 14, 22
- Hubble expansion 8
- Hubble flow 8
- Hybrid mapping 376
- Hydrogen maser 374
- ICCDs 328
- Ice absorption band 200
- Idler frequency 338
- Illumination pattern 355
- Image compression 275
- Image disector scanners 328
- Image intensifier tubes 324
- Image motion 261
- Image-plane combination 273
- Image reconstruction 279
- Impurity band 310
- Incoherent detectors 257
- Incoherent illumination 254
- Inflationary model 19, 22
- Infrared CCDs 319
- Initial mass function 155
- Instantaneous MTF 261
- Instant recycling 177
- Integral 98, 114
- Integral, non-isolating 101
- Integrated detector arrays 314
