

# Subject Index

- acceleration voltage 88
- acid-base titration 14
- acidity constants 12
- antimicrobial nanocomposites 94
- artificial kidneys 44
  
- band gap semi-conductor materials 95
- barium sulfate 57
- bicontinuous phase 60
- binding constant 30
- binding isotherm 28
- biomineralization 57
- Bjerrum length 20
- block copolymer micelles 4
- block copolymers 38, 69
- blood plasma volume expander 11
- boostering effect 64
- Bragg-Williams model 19
- branched polyethylenimine 54
  
- capsules 45
- carbon film 90
- carboxymethylcellulose 16
- catalysis 93
- cellulose sulfate 44
- charge density 26
- chitosan 33
- chromophores 22
- cluster formation 66
- coatings 44
- collodion film 89
- colloid titration 23
- colloid vibration potential 80
- colloidal gold 51
- complex stability 39
- complex stoichiometry 35
- conformational changes 12
- contact lenses 44
- controlled free radical polymerization 70
- copolymers (polystyrene sulfonate-*co*-maleic acid)  
56
- Coulomb interactions 25
- counterion binding 2
- counterion selective electrodes 24
  
- critical aggregation concentration 29
- critical micellization concentration 25
- cryo SEM 91
- crystalline particles 50
- crystallization processes 58
- cubes 67
  
- Debye scattering function 7
- Debye-Hückel theory 19
- degree of binding 29
- degree of substitution 12
- dendrimers 54
- dental materials 94
- dialysis 7
- diatomeen 57
- diffusion coefficient 8
- DLVO theory 73
- DNA 1
- Doppler effect 8
- double layer 80
- droplet-droplet interactions 60
  
- egg albumin complexes 37
- Einstein expression 10
- electrochemical potential 27
- electrokinetic sonic amplitude 80
- electromotive force 28
- electron density 89
- electron-dense labeling agents 93
- electroosmosis 75
- electrophoresis 75
- electrophoretic light scattering 78
- electrostatic stabilization 3
- electrostatically stabilized systems 73, 74
- endpoint determination 41
- energy-distance function 73
- equivalence point 14
  
- fibers 62
- freeze-etching 91
- freeze-fracture electron microscopy 66
- freeze-fracturing 91
  
- globule-coil transition 17

- Gouy–Chapman model 73  
grid 89  
Guinier plot 7
- Helmholtz model 75  
Helmholtz plane 76  
Henderson–Hasselbalch equation 14  
Henry equation 79  
Huggins equation 10  
hydrodynamic radius 8  
hydrodynamic volume 5  
hydrophobically modified polyelectrolytes 55  
hydroxyapatite nanoparticles 57
- inorganic nanoparticles 62  
invertase 44
- Kelvin equation 49  
Kuhn–Mark–Howink–Sakurada equation 10
- L1 phase 60  
L2 phase 60  
lecithin complexes 36  
lignosulfonate 23  
linear polyethylenimine 54  
lotus effect 45
- magnetic materials 61  
magnetic properties 94  
Manning parameter 19  
Manning theory 12  
marine shells 57  
Meissner signal 62  
methacromatic dye 23  
micro-phase separated block copolymers 70  
microdomain formation 17  
microemulsions 59  
miniemulsions 59  
multi-angle light scattering 6
- nanocasting 58  
nanolatexes 61  
nanotubes 67  
nearest-neighbor interactions 19  
Nernst equation 28  
Nernst potential 75  
nonlinear optical behavior 94  
nuclei 46
- ordered structures 67  
osmotic pressure 6  
Ostwald ripening 49
- parameter of cooperativity 30  
particle charge detector 83  
particle electrophoresis 79
- phase separation 64  
photo-/opto-/electro-active materials 95  
photolytic Reduction 51  
photon correlation spectroscopy 78  
photovoltaics 95  
Poisson–Boltzmann equation 12, 73  
poly(acrylic acid) 21  
poly(diallyldimethylammonium chloride) 1  
poly(ethylene glycol) block copolymers 39  
poly(fumaric acid) 17  
poly(L-glutamate) 34  
poly(maleic acid) 17  
poly(methacrylic acid) 17  
poly(styrene sulfonate) 23  
poly(styrenesulfonic acid) 1  
poly(vinylchloride) 26  
polyaspartic acid 57  
polyelectrolyte complex stoichiometry 38  
polyelectrolyte complexes 33  
polyelectrolyte effect 11  
polyelectrolyte multilayers 45  
polyelectrolyte–micelle association 35  
polyelectrolyte–micelle complexes 35  
polyelectrolyte–micelle interactions 25  
polyelectrolyte–surfactant interactions 25  
polyelectrolyte–nanoparticle interactions 68  
polymer recognition 39  
polymer-modified microemulsions 64  
preferential binding 21  
principle of La Mer 50  
prosthetic materials for body repair 44  
protective agents 52  
proteins 34  
purple of Cassius 93
- quantum dot effect 3  
quasi-elastic light scattering 85
- radius of gyration 7  
Rayleigh conditions 7  
redispersion of nanoparticles 63, 67  
reducing agents 51  
relaxation measurements 22  
resolution power 87  
rod-like model 19
- Satake–Yang equation 31  
Satoh model 20  
scale minerals 57  
scanning electron microscopy 87  
Schulz–Blaschke equation 10  
second virial coefficient of the osmotic pressure 7  
sedimentation potential 78  
sedimentation velocity 9  
self-diffusion measurements 22  
shear plane 77  
size exclusion chromatography 5

- Skolnick–Fixman model 19  
Smoluchowsky approximation 79  
Smoluchowsky equation 81  
sodium bis(2-ethylhexyl)sulfosuccinate 62  
spontaneous curvature 61  
steric stabilization 3  
sterically stabilized systems 74  
Stern layer 76  
Stern model 75  
Stokes' law 77  
Stokes–Einstein relation 8  
streaming potential 75  
super-paramagnetic materials 95  
superabsorber 34  
superconductors 61  
supersaturation 47  
supramolecular structures 58  
surface enhanced Raman spectroscopy 94  
surfactant sensitive membrane 26  
Svedberg constant 9  
template phase 4  
thiophenol modification 63  
titration techniques 35  
transmission electron microscopy 87  
two-step process of symplex formation 43  
ultramicrotome 90  
UV irradiation 53  
water-soluble polyelectrolyte complexes 38  
zeta potential 75  
Zimm plot 7
