

# Subject Index

- A-current 122
  - , channel properties 63
  - , expression in oocytes 63, 64
- A-currents, different types 96
- acetylcholine receptor, amino acid sequence 53
  - , nicotinic 127
  - channel, muscarinic 61
  - , nicotinic 61
- aconitine 21, 23
- activation and inactivation, interdependence 32ff
  - rate constants 35
- adenosine, K current 61
- ADP, K channels
- AHP channel 72, 73, 102
- 4-aminopyridine 118, 119, 120, 121, 122
- aminopyridines 98, 123, 124
- apamin, binding 99, 100, 101
  - binding protein 100
  - , K channel block, summary 104–106
  - , K channels 73, 74, 99ff, 112
  - -like factor, endogenous 104
  - , neurotoxicity 99
- arachidonic cascade 58
- astrocytes, K channels 62
- ATP, K channels 77
  - -sensitive channels, Mg block 60
  
- Ba, K channel block 67, 74, 76
- batrachotoxin 23, 26, 27, 30
- bee venom, toxins 98ff
- Boltzmann equation 16, 17
- N-bromoacetamide 30
- $\beta$ -bungarotoxin binding 107, 123, 124
  - , K channel block 108, 124, 125, 126
  - , structure 114, 115
  - , transmitter release 123
  
- Ca channel 63
  - , development 104
  - channels, voltage-sensitive 127
  - , Na channel conductance 23
- capsaicin 119
- cations, divalent, Na channel conductance 23, 24
  - , K channels 70, 71, 77
- channel gating, second messengers 60
- charge displacements 16, 29
  - distribution, steady state 16–18
- charybdotoxin 68, 102
  - , Ca-insensitive K channels 113
  - , K channel, Ca-activated 110, 111, 113
  - , structure 110
- chloramine-T 6, 7, 8, 26, 27
- chromaffin cells, Na currents 5
- cone snail, toxins, ion channel block 127
- conotoxins 2, 127
- crotapotin 115
- crotoxin, binding 125
  - , structure 114, 115, 125, 126
- Cs, K channel block 67
  
- deactivation rate constant 28, 29, 30, 31, 38, 39, 40
- dendrotoxin, binding 107, 117, 118
  - , central action 122
  - , general effects 116
  - , interaction with  $\beta$ -bungarotoxin and MCDP 117, 118, 124
  - , K channel block 108
  - , K currents 118ff
  - , neuromuscular transmission 115, 116, 120
  - , neurotoxicity 116
  - , structure 114, 115, 116
- dendrotoxins see dendrotoxin
  - , various 116
- DNA methods 53
- dopamine receptors 59

- epithelial cells, non-secretory 76  
 --, secretory 75, 76  
 expression studies 63, 64
- FMRF-amide 58  
 forskolin 74
- G protein binding 53  
 -- subunits 61
- GABA, K current 59  
 gating particles 9  
 gill withdrawal reflex 58  
 GTP 77  
 - analogues, non-hydrolysable 59, 61  
 guanidinium 14
- hexamethonium 57  
 histamine receptors 59  
 Hodgkin-Huxley equations 3, 6, 8, 11, 12,  
 13, 28, 32, 39
- immobilization time constant 19  
 inactivation, interaction with activation 8,  
 11, 22, 32  
 - rate constants 28, 29, 30, 31, 33, 34,  
 35, 38, 39, 40  
 -, variable 5, 6ff
- insulin secretion 55, 69, 75, 77
- ion channel gating 53  
 - channels, diversity 54  
 --, molecular biology 53  
 --, reconstituted 52  
 --, similarities 53  
 --, single channel recording 52  
 --, stretch-activated 78  
 --, subconductance states 66, 69  
 - currents, matching channels 54, 56, 57
- K channels, adenosine 61  
 --, AHP 72, 73  
 --, apamin-sensitive, development 103  
 --, -, muscle dystrophy 103  
 --, -, properties 101, 102  
 --, ATP-sensitive 77  
 --, Ca-activated see K channels, K (Ca)  
 --, classification 95, 96  
 --, delayed rectifier, subtypes 119  
 --, dendrotoxin-sensitive 118  
 --, -, properties 121, 122, 123  
 --, -, summary 122, 123  
 --, diversity 95ff  
 --, excitable cells 55  
 --, "gate modifiers" 98  
 --, gating, types of 53  
 --, hepatic 55, 61, 62, 102  
 --, K (Ca) 64ff  
 --, -, block 110, 111, 112, 113  
 --, -, blockade and structure 67-69  
 --, -, channel properties 66-69, 72  
 --, -, different types 96, 97  
 --, -, function in epithelial cells 75, 76  
 --, -, -- excitable cells 74, 75  
 --, -, intermediate conductance 74  
 --, -, kinetics 69-72  
 --, -, low conductance 72, 73  
 --, -, pH sensitivity 69  
 --, -, probe for 111, 112  
 --, -, reconstituted 64, 67, 70  
 --, large conductance, Ca-ac-  
 tivated 64-72  
 --, learning 55  
 --, ligand-operated 96  
 --, mechanosensitive 54, 78  
 --, modes of drug interactions 97, 98  
 --, non-excitable cells 55  
 --, pancreatic 55, 62, 69, 75  
 --, peptide toxins 95  
 --, physiological properties 95  
 --, renal 56, 61, 62, 74, 76  
 --, reviews 52, 53  
 --, scorpion toxin block 110, 111, 113  
 --, stretch-activated 78  
 --, T lymphocytes 56, 62  
 --, various types 54, 95ff, 119  
 - current, ACh receptor modulated 60, 61  
 --, delayed rectifying 127  
 --, --, dendrotoxin 118-122, 126  
 --, --, different components 95, 96  
 --, --, in excitable cells 62, 67  
 --, --, MCD peptide 108  
 --, --, in non-excitable cells 62, 63  
 --, --, noxiustoxin 110  
 --, inward rectifying 59-62  
 --, --, in excitable cells 60, 61, 67, 69  
 --, --, in non-excitable cells 61, 62  
 --, non-inactivating 119
- K currents, Ca-activated, noxiustoxin 110,  
 113  
 --, dissection 56, 57
- kidney, handling of K 56
- leiurotoxin I, apamin binding 112  
 -, binding 112  
 -, K channel block 112, 113
- leucocytes, K channels 76
- local anaesthetics 15, 98
- long-term potentiation 109
- lymphocytes 62

- M current function 57  
 --, pharmacology 57, 58  
 --, types of neurons 57  
 mast cell degranulating peptide 121, 123  
 ----, binding 107, 109  
 ----, K channels 104, 108, 109  
 ----, neurotoxicity 107  
 ----, pharmacological probe 109  
 Mg, block of K channel 59, 60  
 muscarinic receptors 59  
 muscular dystrophy, myotonic 103
- Na channel,  $\alpha$  channel peptide 26  
 --, amino acid sequence 53  
 --, development 2  
 -- expression 26  
 -- gating, charge immobilization 18–20, 37  
 --, -- models 28  
 --, -- process 15  
 --, inactivation 20, 21  
 ----, charge immobilization 18, 19  
 --, interdependence of activation and inactivation 8, 11, 22, 32, 33  
 --, models 32, 33  
 -- protein, amino acid sequence 2  
 --, reaction diagram 32ff  
 --, resting and open states 32, 33  
 --, S4 segment 63, 64  
 --, single channel analysis 22ff  
 --, -- conductance 22–24  
 --, --, statistical analysis 27  
 --, subconductance states 26, 27  
 -- channels, changes in gating behaviour 29  
 --, closure of 29  
 --, different kinetics 5  
 --, -- types 10, 14, 15, 24ff  
 --, expressed 4, 5, 15, 23  
 --, gating charges 17, 18  
 --, general aspects 1–3  
 --, heterogeneity 2, 3  
 --, low-conductance states 24–27  
 --, reincorporated, lipid bilayers 23, 24, 27  
 --, toxin effects 2  
 --, voltage activated 127  
 -- current, activation and inactivation, steady state 4–6, 8, 11, 22, 28  
 --, -- kinetics 8–10, 13  
 --, --, voltage-dependent 9  
 -- fluctuations 22  
 -- inactivation, dendrotoxin 120  
 ----, kinetics 11–15, 19  
 ----, modifiers 6–8, 21, 22, 36, 37  
 -- relaxation 4  
 --, slow inactivation 13  
 -- currents, macroscopic 2, 3–15, 33ff  
 --, simulation 33, 34, 36  
 --, stationary 5  
 -- gating currents 15ff, 37, 38  
 ----, chemical modification 15  
 ----, slow components 20ff, 37, 38  
 -- tail currents 35, 36  
 neuromuscular junction, K currents 115, 116, 120, 121  
 neurotoxins, presynaptic-active 114, 125, 126  
 niflumic acid 14  
 notexin 114, 115, 125, 126  
 noxiustoxin, K channel 109, 110, 113
- oocytes, expressed 4, 5, 15, 23  
 open state probability 33, 34, 37
- pancreatic B cells 55  
 papain 6, 7, 30  
 pH, effects on K channels 69  
 phagocytosis 76  
 phospholipase A<sub>2</sub> toxins 114, 115  
 platelets, K channels 62  
 pronase 8  
 protein kinase, (cAMP)-dependent 58
- quinine 98, 102
- Ranvier node 4, 5
- S current, G proteins 58, 59  
 --, serotonin 58, 59  
 $\alpha$ -scorpion toxins 3  
 scorpion toxins 2  
 --, K channel block 109–114  
 -- venom 8, 21, 22, 27  
 --, toxins 109ff
- sea anemone toxin 2, 8, 23, 27, 30, 33, 34, 36, 38  
 secretion 75  
 serotonin 58, 59, 61  
 Shaker mutant 63, 64  
 snake venom, toxins 114ff  
 somatostatin 61  
 substance P 61
- t-tubule channel 67, 70, 71  
 -- membrane 111  
 taipoxin, structure 114, 115, 125, 126

TEA 57, 98, 101, 118, 119, 120, 121, 123  
–, K channel block 62, 67, 68, 73, 111  
tetrodotoxin 2, 14  
–, development 25  
– resistant channels 26

tubocurarine 57, 102

volume regulation 78

Xenopus oocytes 63, 64
