H. Börner (Ed.)

Pesticides in Ground and Surface Water

With contributions by **H. Beitz, D. W. Bewick, C. N. Guyot,
M. O. James, G. Mattheß, M. Häfner, F. Herzel, H. Schmidt**

1994. XII, 294 pp. 28 figs. (Chemistry of Plant Protection, Vol. 9)
ISBN 3-540-58180-4

This authoritative and practice-oriented volume draws together information on all key issues on the fate and behaviour of pesticides in water systems. Thus, it is an important source for researchers and practitioners in the plant protection and crop science field.

Contents: *H. Beitz, H. Schmidt, F. Herzel:* Occurrence, Toxicological and Ecotoxicological Significance of Pesticides in Groundwater and Surface Water. – *D. W. Bewick:* The Mobility of Pesticides in Soil. – *C. N. Guyot:* Strategies to Minimize the Pollution of Water by Pesticides. – *M. O. James:* Pesticide Metabolism in Aquatic Organisms. – *G. Mattheß:* Fate of Pesticides in Aquatic Environments. – *M. Häfner:* Pesticides in Soil: A German Approach of Predicting Their Movement into Ground and Surface Water.

Specimen Banking

**Environmental Monitoring and
Modern Analytical Approaches**

With contributions by numerous experts

1992. X, 242 pp. 65 figs., 60 tabs. ISBN 3-540-55001-1

Contents:

- Introduction
- Specimen Banking
- Specimen Banking in Industrialized Countries
- Practical Specimen Banking
- Organic Analytical Approaches
- Inorganic Analytical Approaches
- Future Developments
- Subject Index.

Springer-Verlag and the Environment

We at Springer-Verlag firmly believe that an international science publisher has a special obligation to the environment, and our corporate policies consistently reflect this conviction.

We also expect our business partners – paper mills, printers, packaging manufacturers, etc. – to commit themselves to using environmentally friendly materials and production processes.

The paper in this book is made from low- or no-chlorine pulp and is acid free, in conformance with international standards for paper permanency.
