

Subject Index

A

abscess 205
– acute dentoalveolar 206
– chronic 207
– – dentoalveolar 237
– infratemporal 224
– intraalveolar 208, 213
– lateral pharyngeal 232
– mental 225
– of base of upper lip 220
– of buccal space 222
– of the canine fossa 220
– of the fascial space 209
– of the parotid space 232
– periodontal 206
– pterygomandibular 231
– retropharyngeal 232
– subcutaneous 209, 218
– sublingual 227
– submandibular 229
– submasseteric 230
– submental 225
– submucosal 209, 214
– subperiosteal 208, 214
– temporal 224
abutment connection 343
actinomycosis 362
acute adrenal insufficiency 11
acute adrenocortical insufficiency 10
AIDS 12
allergy 13
– allergic asthma 14
– anaphylaxis 14
– angioneurotic edema 14
– urticaria 14
alveoloplasty
– after extraction
– – of single tooth 243
– – of three teeth 244
– – of two teeth 244
– after multiple extractions 248
– recontouring of edentulous alveolar ridge 250
amalgam splattering 317, 322
analgesia 14
anemia 6
anesthesia 191
anesthetic, local 9, 13
angina pectoris 1

antibiotic 14
– prophylaxis 3, 4, 355, 356
– – extraction of impacted third molar 359
– – indications 359
– therapy 212, 349
– – indications 360
anticoagulant
– aspirin-containing compounds 8
– coumarin drugs 7
– heparin drugs 8
anxiolytic drug 14
apicoectomy
– armamentarium 309
– complications 322
– contraindications 309
– indications 309
– surgical technique 312
asthma 11
autograft 346
axonotmesis 192

B

bacteremia 355
bacteria 349
bacterial
– endocarditis 3, 355
– – prophylaxis 357
– resistance 351
binocular loupes with light source 54
biopsy
– aspiration 297
– excisional 281
– incisional 295
– principles 281
bite block 52
blade 43
bleeding time 8
blood
– disease 6
– glucose test 9
– pressure 4
bone
– augmentation procedure 346
– burs 43
– file 46
– graft 70, 346
– substitute 346
breakage of instrument
in tissue 185

C

cardiac arrhythmia 3
catecholamine 8
cellulitis 210, 234
cephalosporin 352
cerebrovascular accident 5
chisels 47
clindamycin 353
compression 187
congenital heart disease 3
congestive heart failure 1
corticosteroid 10
cover screw placement 341
culturing of sample 350

D

dentist position 74
desmotome 63, 74
diabetes mellitus 9
diabetic patient 359
disease of the skeletal system 13
disinfection procedure 32
dislocation of temporomandibular joint 185
displacement
– of root
– – into maxillary sinus 189
– – into soft tissue 188
– of root tip
– – into maxillary sinus 189
– – into soft tissue 188
drainage
– of abscess 212
– of pus 211
dry socket 199
dysesthesia 191

E

ecthymosis 196
ectopic teeth 172
edema 196, 207
electrocoagulation 187
electrosurgical unit 54
elevator
– chompret 62, 76
– double-angled 60
– straight 60
– T-shaped 60
emphysema 186
empyema 205

- enucleation 301
 - epilepsy 12
 - exfoliative cytology 298
 - exostosis
 - localized mandibular
 - buccal 259
 - multiple 259
 - torus mandibularis 256
 - torus palatinus 253
 - exposure of impacted teeth
 - canine
 - with labial position 176
 - with palatal position 174
 - extraction
 - forceps
 - mandibular 57, 58
 - maxillary 55–57
 - vertical hinge 59
 - using elevator
 - intact teeth 84
 - multi-rooted teeth
 - with destroyed crown 88
 - root tips 84, 90
 - roots 84
 - single-rooted teeth
 - with destroyed crown 86
 - using root tip forceps 84
 - using tooth forceps
 - deciduous teeth 83
 - mandibular anterior teeth 80
 - mandibular molars 82
 - mandibular premolars 81
 - mandibular third molar 83
 - maxillary canines 77
 - maxillary central incisors 77
 - maxillary first molars 80
 - maxillary lateral incisors 77
 - maxillary premolars 77
 - maxillary second molars 80
 - maxillary third molars 80

 - instrument
 - for removal of roots 63
 - irrigation instrument 53
 - International Normalized Ratio (INR) 7, 8
 - irrigation instrument 53
- L**
- leukemia 6
 - leukoplakia 294
 - ligation 187
 - low-speed drilling for implants 338
 - Ludwig's angina 235
 - luxation of adjacent tooth 181

M

macrolide 352
 mallets 47
 marsupialization 302, 334
 medical history 1
 membranes 70
 mouth props 52
 mucocoele 330
 mucus
 – cyst 330
 – extravasation phenomenon 330, 334
 – retention cyst 330, 334
 myocardial infarction 2

N

necrotic sloughing 200
 needle 67
 – holders 47
 nerve injury
 – classification 191
 – etiology 192
 – prognosis 194
 neuralgia of the head 122
 neurapraxia 191
 neurotmesis 192
 nitroimidazole 353

O

odontogenic infection 205, 349
 – principles of treatment 351
 – treatment 354
 oral flora 349
 oroantral communication,
 preventive measures 190
 orthostatic hypotension 5
 osseointegrated implant
 – complications 346
 – contraindications 337
 – indications 337
 – instruments 337
 – surgical procedure 337
 osteomyelitis
 – sclerosing 361
 osteoradionecrosis 362

P

painful postextraction socket 197
 papillary hyperplasia 275
 paresthesia 191
 partial thromboplastin time 8
 patient position 77
 pedicle bone grafting 346
 penicillin
 – amoxicillin 351
 – ampicillin 351
 periapical curettes 63
 pericoronitis 122
 perioperative
 – chemoprophylaxis 358
 – complication 181
 periosteal elevator 45

peripheral
 – fibroma 291
 – giant cell granuloma 286
 phlegmon 210, 234
 placement of cover screw 341
 postextraction
 – care of tooth socket 92
 – granuloma 197
 postoperative
 – complications 195
 – instructions 92
 pregnancy 15
 preparation
 – of patient 32
 – of surgeon 32
 preprosthetic surgery 243
 proliferative periostitis 362
 prosthetic
 – heart valve 4
 – joint 357
 prothrombin time 7, 8
 pulmonary edema 1
 pus formation 205

R

radicular cyst 301
 radiograph 21
 radiographic
 – detection technique
 – – magnification technique 23
 – – tube shift principle 23
 – – two radiographs with different
 reference planes 23
 – – vertical transversal tomography
 of the jaw 23
 – examination 21, 121
 – technique
 – – lateral oblique projection of man-
 dible 21
 – – occlusal projection 21
 – – panoramic radiograph 21
 – – periapical projection 21
 radiotherapy 13
 ranula 334
 reflecting soft tissue 75
 reflection of the mucoperiosteum 38
 renal disease
 – acute glomerulonephritis 10
 – chronic glomerulonephritis 10
 – chronic renal failure 10
 resection of tooth apex 312
 retractors 51
 retrograde filling 312
 rheumatic fever 3
 rongeur 46

S

salivary gland lesion 327
 scalpel 43
 scissors
 – soft tissue 49
 – suture 49

sectioning of roots 88
 severing soft tissue attachment 74
 sialolithiasis 327
 simple tooth extraction 77
 sinus lift procedure 346
 skeletal system 13
 soft tissue
 – abnormality 261
 – injury 181
 specimen care 298
 spread of pus 207
 status
 – asthmaticus 11
 – epilepticus 13
 sterilization of instruments 31
 stroke 5
 surgery
 – fundamental rules 33
 – corrected heart disease 4
 – dressing 69
 – equipment and instruments 43
 – extraction
 – – ankylosed tooth 103
 – – contraindications 99
 – – deciduous molar embracing
 crown of permanent tooth 102
 – – indications 95
 – – intact tooth with hypercemen-
 tosis of the root tip 99
 – – multi-rooted tooth 99
 – – root tips 114
 – – roots 104
 – – steps 99
 – – teeth with intact crown 99
 – handpiece 43
 – suction 53
 – unit 43
 suture 187
 – continuous 39
 – interrupted 39
 – mattress 40
 – nonresorbable 66
 – resorbable 66

T

tetracyclin 353
 thyrotoxic crisis 8
 tissue regeneration materials 70
 toluidine blue staining 298
 towel clamps 50
 traumatic fibroma 283
 trephination of maxillary sinus 189
 trismus 195
 tuberculosis 11

V

Valsalva test 190

W

wound healing disturbance 200
