
Subject Index

- β -1,3-glucanase, 94
- AC2, 140, 144
- actin, 41, 44
- Alfalfa mosaic virus* (AMV), 69
- amplification of the silencing signal, 145
- Apple*
 - , *chlorotic leafspot trichovirus* (ACLSV), 70
 - , *stem grooving capillovirus* (ASGV), 70
- Arabidopsis*, 128
- Arabidopsis mosaic virus* (ArMV), 72
- argonaute (AGO) family protein, 128
- asc1*, 174
- AtNSI, 175
- Avocado sunblotch viroid (ASBVd), 124
- Avsunviroidae, 119, 120, 124, 125
- Beet curly top hybrigeminivirus* (BCTV), 168
- Beat yellows virus*, 141
- beetle, 20
- boundaries, 98
- Brefeldin A, 73
- bridge hypothesis, 12
- Brome mosaic virus* (BMV), 70, 171
- BS/CC boundaries, 100
- BS/VP, 100
- BS/VP boundary, 99
- Cabbage leaf curl geminivirus*, 147
- cadmium-induced glycine-rich protein (cdiGRP), 93, 94
- callose, 93, 94
- calmodulin-related protein (rgsCaM), 141
- calreticulin, 45
- CarMV p7, 34
- CarMV p9, 34
- Cauliflower mosaic virus* (CaMV), 13, 16, 69, 140, 164
- Caulimovirus*, 12
- CC/SE
 - , boundary, 101
 - , complex, 101
- cdiGRP, 93, 94
- cdiGRP-interacting protein, 94
- chloroplasts, 119, 120
- chromatin, 131
- circulative
 - , transmission, 6
 - , viruses, 5
- cis* element, 120, 122
- CMV MP, 174
- co-infection, 18
- coat protein (CP), 11, 89
 - , alfamoviruses, 89
 - , bromoviruses, 89
 - , cucumoviruses, 89
 - , dianthoviruses, 89
 - , geminiviruses, 89
 - , luteoviruses, 89
 - , potexviruses, 89
 - , potyviruses, 89
 - , Tobacco mosaic virus, 89
 - , tombusviruses, 89
- Cowpea*
 - , *mosaic virus*, 66
 - , *severe mosaic virus* (CPSMV), 72
- cross-protection, 139
- Cucumber mosaic virus* (CMV), 70, 163
- cyanobacteria, 70
- cytoskeletal inhibitors, 73
- cytoskeleton, 73
- DCL1, 133
- DCL2, 134
- DCL3, 131

- DCL4, 130
 desmotubule, 31, 64
 dicer-like (DCL) enzymes, 127
 DNA viruses, 145
 DRB4, 130

East African cassava mosaic virus, 140
 eIF4E, 96
 embryo, 4
 endomembrane system, 73
 eukaryotic initiation factor-4E (eIF4E), 91, 95, 96
 exclusion of apical meristems, 106

 fungal transmission, 15

 gametes, 3
Geminiviridae, 10
 gene silencing, 127, 140
Grapevine
 –, *berry inner necrosis virus* (GINV), 70
 –, *fanleaf virus*, 66

 HASTY, 134
 HC, 12
 HcPro, 12, 140, 141, 144
 helper component, 12
 hemolymph, 9
 HEN1, 134
 histone modification, 131
 Hop stunt viroid (HSVd), 124
 host factors involved in viral systemic movement, 92
 HYL1, 130, 133

 inclusions, 17
 interferon-mediated resistance, 144
 internal and external phloem, 102
 IP-L, 95

 KNOLLE, 75

 Leaf vein classified, 99
 Lettuce mosaic potyvirus (LMV), 167
Luteoviridae, 7

 macromolecular trafficking, 65
 meristem, 3, 147
 micro (mi)RNAs, 127
 microfilaments, 48

 microtubules, 17, 74
 movement protein (MP), 63, 88
 –, bipartite geminiviruses, 88
 –, hordeiviruses, 88
 –, luteoviruses, 88
 –, red clover necrotic mosaic virus, 88
 MP-interacting host proteins, 75
 MPB2C, 44, 51
 multiple infection, 18

 natural siRNAs (nat-siRNAs), 134
 NCAPs, 43
 non-cell autonomous proteins, 66
 non-circulative viruses, 10
 non-propagative, 7
 nuclear import, 120
 nucleolus, 120, 121
 nucleoplasm, 120
 nucleus, 19

Oilseed rape mosaic virus, 144
Olive latent virus 2 (OLV2), 68
 ORF3, 92
 –, protein, 91

 p19, 141
 p21, 141
 p25, 145
 PAPK, 46
 pathogen-derived resistance, 139
 pectin methylesterase (PME), 44, 49, 92
Petunia vein clearing virus, 140
 phloem, 102, 122–124, 137
 –, external, 102
 –, internal, 102
 –, limitation, 103, 104
 plasmodesmal proteins, 31, 32
 plasmodesmata, 30, 43, 63, 136, 138
 POL IVa, 131
 Pospiviroidae, 119, 121, 125
 post-transcriptional
 –, gene silencing, 128
 –, silencing, 130
Potato
 –, *virus X*, 140, 145
 –, *virus Y*, 140
 Potato spindle tuber viroid (PSTVd), 120–124
Potyvirus, 12
 potyvirus

- , viral genome-linked protein (VPg), 90
- , VPg-interacting proteins (PVIP), 91, 97
- Plum Pox Potyvirus (PPV), 167
- proteasome, 36, 41
- putative RNA helicase SDE3, 136
- PVIP, 97
- PVIP1, 176
- PVIP2, 176

- RDR6, 128, 130
- recovery, 139
- Red clover necrotic mosaic virus*, 144
- Red clover mottle virus* (RCMV), 72
- Repeat associated siRNAs (rasiRNA), 128
- RISC, 128, 134, 136, 137, 141
- RNA
 - , silencing, 105, 106
 - , silencing suppressor, 106
- RNA-dependent
 - , DNA methylation, 131
 - , RNA polymerase RDR6, 136
 - , RNA polymerases, 128
- RNA-induced
 - , silencing complexes, 128
 - , transcriptional silencing (RITS) complex, 128

- Spring beauty latent bromovirus (SBLV), 171
- seed transmission, 2
- silencing suppressors, 140
- siRNA-guided RISC, 128
- size exclusion limit, 35, 65
- small
 - , interfering (si)RNAs, 127
 - , RNA binding protein (PSRP)1, 138
- 30K superfamily, 66
- symbionin, 9
- systemic
 - , movement, 85
 - , silencing signal, 130
 - , spreading of silencing, 135

- ta-siRNA, 128, 130
 - , coat protein, 46
 - , hel, 47
 - , MP, 32, 34
 - , MP accumulation at microtubules, 41
 - , MP phosphorylation, 45
 - , MP regions, 49
 - , MP structural models, 32
 - , MP TAD5, 39
 - , MP associated inclusion bodies/VRCs, 38
 - , MP microtubule complex, 41
 - , MP ubiquitinated, 36
 - , MP:GFP, 35, 37
 - , replicase, 47
- Tobacco*
 - , *etch potyvirus* (TEV), 139, 164
 - , *etch virus*, 140
 - , *mosaic virus*, 66, 139
- Tobacco ringspot nepovirus (TRSV), 170
- Tomato*
 - , *spotted wilt virus* (TSWV), 69
- Tomato Mosaic Virus CP-Interacting Protein-L (IP-L), 95
- Tomato spotted wilt tospovirus (TSWV), 172
- transcomplementation, 14
- transcriptional
 - , gene silencing, 128
 - , gene silencing (TGS), 131
- transcytosis, 7
- transitivity, 136
- transmission, 1
- tubular structures, 66
- tubule, 63
- tubulin, 44
- Turnip mosaic potyvirus (TuMV), 166
- Turnip*
 - , *crinkle virus* (TCV), 134, 145, 162

- umbravirus, 89
 - , ORF3 proteins, 91
- unloading, 103

- Vector
 - , Receptors, 15
- vector-transmission, 5
- vesicle transport, 73
- vid1*, 173
- viral
 - , ligands, 11
 - , systemic movement factors, 88
 - , unloading, 105
- Viroid, 119, 144
 - , trafficking, 119
- virus unloading, 103
- virus-induced gene silencing (VIGS), 139
- VP/CC boundary, 100

VPg, 90

VPg-PVIP

-, interaction, 97

VRCs, 37, 47, 48

vRNP, 35

vsm1, 172

xylem, 102
