Highlights in Regional Sciences

Growth and Innovation of Competitive Regions
The Role of Internal and External Connections

U. Fratesi, Politecnico di Milano, Italy;
L. Senn, Università Bocconi, Milano, Italy (Eds.)

The authors show how the capability of regions to innovate is enhanced by a large number of factors, including entrepreneurship, clustering, creativity, new technologies, human capital and the presence of internal, intra-regional, and external, extra-regional, connections.

2009. X, 370 p. 67 illus. (Advances in Spatial Science) Hardcover
ISBN 978-3-540-70923-7 ► **€ 99,95 | £90,00**

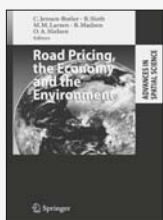

Modelling Regional Scenarios for the Enlarged Europe
European Competitiveness and Global Strategies

R. Capello, **R. P. Camagni**, Politecnico di Milano, Italy; **B. Chizzolini**, Università Bocconi, Italy; **U. Fratesi**, Politecnico di Milano, Italy

This volume provides quali-quantitative territorial scenarios for the enlarged Europe, under different assumptions on future globalisation strategies of BRIC (Brazil, Russia, India and China) and East and West European countries.

2008. XVI, 321 p. 83 illus. (Advances in Spatial Science) Hardcover
ISBN 978-3-540-74736-9 ► **€ 94,95 | £75,00**

Road Pricing, the Economy and the Environment

C. Jensen-Butler,
B. Sloth, University of Southern Denmark, Odense, Denmark;

M. M. Larsen, Danish Institute of Governmental Research, Copenhagen, Denmark; **B. Madsen**, Centre for Regional and Tourism Research, Nexø, Denmark; **O. A. Nielsen**, Technical University of Denmark, Lyngby, Denmark (Eds.)

This volume is a collection of research papers on the use of road pricing. The focus is on passenger transport, and the papers cover a wide range of approaches, including theoretical modelling and empirical studies of road pricing experience from different cities.

2008. XV, 425 p. 58 illus. (Advances in Spatial Science) Hardcover
ISBN 978-3-540-77149-4 ► **€ 109,95 | £87,00**

Innovation System Frontiers
Cluster Networks and Global Value

B. Wixted, Richmond, BC, Canada

Recent economic transformations in the world economy are progressing in two divergent directions – international production fragmentation and industrial agglomeration. Based on extensive data analysis and using models of interdependencies between key economies, this book analyses innovation systems that cross national borders.

2009. Approx. 300 p. (Advances in Spatial Science) Hardcover
ISBN 978-3-540-92785-3 ► **€ 89,95 | £81,50**

Technological Innovation Across Nations

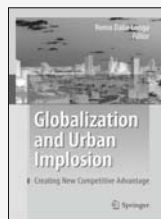

Applied Studies of Coevolutionary Development

M. v. Geenhuizen,
Delft University of

Technology, The Netherlands; **C. Watanabe**, Tokyo Institute of Technology, Japan; **V. Jauhari**, HP Labs Open Innovation Office, Gurgaon, Haryana, India; **E. Masurel**, Free University Amsterdam, The Netherlands (Eds.)

The book offers an interesting blend of applied state-of-the-art studies of coevolutionary development of institutions, innovation diffusion and innovative entrepreneurship, not published anywhere else. It can firstly be classified as belonging to mainstream endogenous growth studies on the country level, and secondly, to mainstream evolutionary studies.

2009. Approx. 215 p. 43 illus. Hardcover
ISBN 978-3-642-00157-4 ► **€ 84,95 | £78,00**

Globalization and Urban Implosion

Creating New Competitive Advantage

R. Dalla Longa, SDA Bocconi, Milano, Italy

In this book, an applicative model of complex urban interventions is presented. Based on a literature review, the model integrates different forms of Public Private Partnerships (PPPs), new types of tools and instruments associated with governance (issues/challenges) as well as new profiles of public “drivers”.

2009. Approx. 300 p. Hardcover
ISBN 978-3-540-70511-6 ► **€ 79,95 | £69,99**
