

Index

- A^\times , invertible elements in A , 3
 - $C_0(X)$, continuous functions vanishing at infinity, 2
 - $C_0^\infty(X)$, smooth functions vanishing at infinity, 2
 - $D(S)$, Cauchy development of subset S , 56
 - G_F , Feynman propagator, 117
 - G_\pm , Green's distributions, 122
 - $I_+^M(A)$, chronological future of subset A in M , 45
 - $I_+^M(x)$, chronological future of point x in M , 45
 - $I_-^M(A)$, chronological past of A , 45
 - $I_-^M(x)$, chronological past of x , 45
 - $J^M(A) = J_+^M(A) \cup J_-^M(A)$, 45
 - $J_+^M(A)$, causal future of subset A in M , 45
 - $J_+^M(x)$, causal future of point x in M , 45
 - $J_-^M(A)$, causal past of A , 45
 - $J_-^M(x)$, causal past of x , 45
 - $J_\pm(x)$, causal future/past of x , 122
 - R_\pm , Riesz distributions, 114
 - S' , commutant of S , 21
 - $S(A)$, states on A , 17
 - $W(\phi)$, Weyl-system, 29
 - $[\cdot, \cdot]$, commutator, 21
 - $\|\cdot\|_i$, injective C^* -norm, 24
 - $\|\cdot\|_\pi$, projective C^* -norm, 25
 - Δ_n , thin diagonal, 138
 - \exp_p , exponential map, 47
 - $\langle W(V) \rangle$, linear span of the $W(\phi)$, $\phi \in V$, 32
 - \mathcal{D}' , set of distributions, 87
 - \mathcal{E} , set of compactly supported smooth functions, 86
 - \mathcal{E} , set of smooth functions, 86
 - \mathcal{E}' , set of compactly supported distributions, 87
 - S , set of Schwartz functions, 93
 - S' , set of Schwartz distributions, 93
 - $WF(\phi)$, wavefront set of ϕ , 98
 - $\text{char}(P)$, characteristic set of P , 119
 - $\text{CCR}(S)$, $*$ -morphism induced by a symplectic linear map, 36
 - $\text{CCR}(V, \omega)$, CCR-algebra of a symplectic vector space, 30, 35
 - $\mathcal{L}(H)$, bounded operators on Hilbert space H , 1
 - CCR, functor $\text{SymplVec} \rightarrow C^*\text{Alg}$, 36
 - $C^*\text{Alg}$, category of C^* -algebras and injective $*$ -morphisms, 36
 - $\rho_A(a)$, spectral radius of $a \in A$, 4
 - $\sigma_A(a)$, spectrum of $a \in A$, 4
 - \square , wave operator, 113
 - $\Sigma(\phi)$, set of singular directions of a distribution, 99
 - $p < q$, there is a future-directed causal curve from p to q , 45
 - $p \leq q$, either $p < q$ or $p = q$, 45
 - $p \ll q$, there is a future-directed timelike curve from p to q , 45
 - $r_A(a)$, resolvent set of $a \in A$, 4
 - SymplVec , category of symplectic vector spaces and symplectic linear maps, 36
 - $*$ -automorphism, 12
 - $*$ -morphism, 12
- A**
- acausal subset, 55
 - achronal subset, 55
 - advanced fundamental solution, 64
 - advanced Green's distribution, 122
 - advanced Green's operator, 81
 - advanced Riesz distribution, 67
 - anti-deSitter spacetime, 43
- B**
- Bell inequality, 26
 - Bogoliubov transformation, 36

C

Cauchy development, 56
 Cauchy hypersurface, 55
 Cauchy problem, 73
 Cauchy time-function, 57
 Cauchy-Schwarz inequality, 17
 causal curve, 44
 causal domain, 51
 causal future of a point, 45
 causal future of a subset, 45
 causal vector, 39
 causality condition, 52
 causally compatible subset, 46
 C^* -algebra, 1
 C^* -norm, 1
 C^* -property, 1
 C^* -subalgebra, 2
 C^* -subalgebra generated by a set, 2
 characteristic set, 119
 chronological future of a point, 45
 chronological future of a subset, 45
 commutant, 21
 commutator, 21
 commutator distribution, 126
 conic neighborhood, 99
 continuous functional calculus, 13
 convex combination, 18
 convolution, 91
 correlated state, 26
 cyclic vector, 16

D

d'Alembert operator, 61, 113
 decomposable state, 26
 delta family, 91
 derivative of a distribution, 89
 deSitter spacetime, 41
 Dirac delta distribution, 89
 direct sum representation, 16
 distribution, 87
 distributional derivative, 90

E

Egorov's theorem, 120
 Einstein causality, 134
 elliptic regularity, 120
 entangled state, 26
 exponential map, 47

F

faithful representation, 16
 Feynman propagator, 117
 field, 136
 formal fundamental solution, 70

Fourier transform, 95
 of a compactly supported distribution, 97
 of a Schwartz distribution, 97
 of a Schwartz function, 95
 fundamental solution, 63
 future
 $I_+^M(x)$ causal \sim , 45
 $I_+^M(x)$ chronological \sim , 45
 future-compact subset, 51
 future-directed curve, 44
 future-directed vector, 40

G

Gauss lemma, 47
 Gelfand-Naimark-Segal representation, 20
 generalized d'Alembert operator, 61, 120
 geodesic spray, 121
 geodesically convex domain, 49
 geodesically starshaped domain, 49
 globally hyperbolic manifold, 53
 GNS representation, 20

H

Hörmander's topology, 105
 Hadamard coefficients, 69, 123
 Hadamard form, 126
 Hadamard series, 122
 Hadamard state, 126
 Hamiltonian flow, 121
 Heaviside step function, 90
 Heisenberg uncertainty relation, 98

I

inextendible curve, 55
 inhomogeneous wave equation, 73
 injective C^* -norm, 24
 injective C^* -tensor product, 24
 interacting models, 149
 invariant subset, 16
 inverse of the Fourier transform, 95
 irreducible representation, 22
 irreducible representation, 16
 isometric element of a C^* -algebra, 1, 9

J

Jordan product, 131

K

Klein-Gordon equation, 145
 Klein-Gordon operator, 61, 116, 145

L

light-cone, 119
 lightlike curve, 44

lightlike vector, 39
 local functional, 138
 locally covariant theory, 134
 Lorentzian cylinder, 41
 Lorentzian manifold, 40
 timeorientable \sim , 43
 Lorentzian scalar product, 39

M

Møller operator, 140
 microlocal elliptic regularity, 120
 Minkowski metric, 41
 Minkowski product, 39
 Minkowski space, 41

N

natural state, 144
 natural transformation, 136
 normal element of a C^* -algebra, 9
 normal state, 19
 normally hyperbolic operator, 120

P

past directed, vector, 40
 past-compact subset, 51
 past-directed curve, 44
 Peierls bracket, 141
 Plancherel formula, 95
 Poisson algebra, 142
 positive element of a C^* -algebra, 15
 principal symbol of a differential operator, 119
 product of distributions, 113
 product state, 26
 projective C^* -norm, 25
 projective C^* -tensor product, 25
 propagation of singularities, 120
 propagators of the Klein-Gordon field, 117
 pseudo-differential operators, 120
 pullback of a distribution, 106
 under a submersion, 110
 pure state, 21

R

regular directed point, 99
 renormalization, 151
 representation, 16
 direct sum \sim , 16
 faithful \sim , 16
 Gelfand-Naimark-Segal \sim , 20
 GNS \sim , 20
 irreducible \sim , 16, 22
 universal \sim , 20
 restriction of a distribution, 113
 retarded fundamental solution, 64

retarded Green's distribution, 122
 retarded Green's operator, 81
 retarded Riesz distribution, 67
 Riesz distribution, 67
 Robertson-Walker spacetimes, 41

S

Schwartz distribution, 93
 Schwarzschild black hole, 42
 Schwarzschild exterior spacetime, 42
 Schwarzschild half-plane, 42
 science fiction, 52
 selfadjoint element of a C^* -algebra, 3
 separable state, 133
 sequential continuity of the pull back, 110
 simple C^* -algebra, 33, 36
 singular directions of a distribution, 99
 singular support of a distribution, 90
 spacelike curve, 44
 spacelike vector, 39
 spacetime, 43
 state, 16
 correlated \sim , 26
 decomposable \sim , 26
 entangled \sim , 26
 normal \sim , 19
 product \sim , 26
 pure \sim , 21
 separable \sim , 133
 vector \sim , 17
 strong causality condition, 52
 subsystem, 133
 support of a distribution, 88
 symbol of a differential operator, 119
 symplectic linear map, 36
 symplectic vector space, 29

T

tempered distribution, 93
 thin diagonal, 138
 time slice axiom, 134
 timelike curve, 44
 timelike vector, 39
 timeorientation, 40, 43

U

unitarily equivalent, 16
 unitary element of a C^* -algebra, 9
 universal representation, 20

V

vector state, 17

W

warped product metric, 41

wave equation, 62

wave operator, 113

wavefront set, 98

of the Feynman propagator, 118

of the local fundamental solutions, 123

of propagators for the Klein-Gordon Field,
118

of Riesz distributions, 115

of the commutator distribution, 126

of the global Green's distributions, 125

weak-* closure, 26

weak-* limit, 26

weak-* topology, 91

Weyl-system, 29

Wick polynomial, 147
