

Index

- (E, p, B) – C^r -vector bundle, 16
 2^Y – family of all subsets of Y , 14
 A^* – adjoint matrix, 21
 A^t – adjoint matrix, 98
 $C_b^k(\mathbb{R}^m, \mathbb{R}^n)$, 22
 $C^m([0, 1], \mathbb{C}^k)$, 10
 $C^m([0, 1], \mathbb{R}^k)$, 10
 C^r -diffeomorphism, 18
 C^r -mapping, 15
 C^r -submanifold, 15
 C^r -vector atlas, 16
 C^r -vector field on \mathbb{R}^m , 20
 $C_B(\mathbb{R})$, 117
 $C_b(\mathbb{R}, H)$, 158
 $C_{2\pi}^2(\mathbb{R})$, 110
 $H(\Omega)$, 26
 $H^2(\mathbb{R})$, 342
 $H_0^2([0, \pi])$, 243
 $H^3(\mathbb{R})$, 342
 $H^2(0, \pi)$, 222
 $H_0^1(0, \pi)$, 222
 $J^k(M, N)$ – jet bundle, 25
 $L(X, Y)$ – set of all linear bounded mappings
 from X to Y , 9
 $L^2(0, \pi)$, 222
 $L^2([0, \pi/4])$, 217
 $L^\infty([0, \pi/4] \times \mathbb{R})$, 172
 $L^\infty(\mathbb{R})$, 176
 $L^\infty(\mathbb{R}, \mathbb{R}^n)$, 150
 $L_{loc}^\infty(\mathbb{R}, \mathbb{R}^n)$, 152
 $L^p([0, 1], \mathbb{C}^k)$, 10
 $L^p([0, 1], \mathbb{R}^k)$, 10
 S^1 – circle, 137
 TM – tangent bundle, 15
 TM^\perp – normal bundle, 16
 T_pM – tangent space, 15
 $W_{loc, \varepsilon}^c$ – local center manifold, 21
 $W_{x_0}^{s(u)}$ – global stable (unstable) manifold, 18,
 20
 X, Y, \dots – Banach spaces, 9
 \mathcal{B}_X – closed unit ball in a Banach space X , 15
 \mathbb{C} – set of complex numbers, 10
 \Im – imaginary part, 27
 \mathbb{N} – set of natural numbers, 9
 \mathbb{N}_- – $-\mathbb{N}$, 56
 \mathbb{R} – set of real numbers, 2
 \Re – real part, 21
 \mathbb{Z} – set of integer numbers, 4
 \mathbb{Z}_+ – set of nonnegative integers, 11
 \mathbb{Z}_- – set of nonpositive integers, 17
 α -limit point, 20
 $\alpha(x)$ – α -limit set of a point x , 20
 $\text{codim } S$ – codimension of a submanifold S , 16
 $\text{conv } S$ – convex hull of a subset S , 9
 $\text{corank } \xi$ – corank of a jet ξ , 25
 $\text{diam } S$ – diameter of a subset S , 9
 $\ell^p(\mathbb{C}^k)$, 10
 $\ell^p(\mathbb{R}^k)$, 10
 $\ell_T^\infty(\mathbb{R})$, 257
 $\text{index } A$ – index of a Fredholm operator A , 12
 $\langle \cdot, \cdot \rangle_m$ – usual inner product on \mathbb{R}^m , 56
 ω -limit point, 20
 $\omega(x)$ – ω -limit set of a point x , 20
 $\phi(z, t)$ – orbit based at z , 20
 $\text{rank } \xi$ – rank of a jet ξ , 25
 σ – Bernoulli shift map, 18
 $\sigma(A)$ – spectrum of A , 17
 supp – support of a function, 132
 $d_H(A, B)$ – Hausdorff distance of subsets A, B ,
 14
 $f|_{\bar{\cap} S}$, 25
 $f^k(z)$ – k -iteration, 18

$j^k f$ – k -jet of f , 25

k -jet, 25

k th order contact, 24

$\mathcal{N}A$, $\mathcal{R}A$ – kernel and range of A , 12

A

absolute continuous function, 24

adjoint variational equation, 21, 33, 43, 46, 55,
71, 72, 89, 98, 99, 224, 296, 320

analytic function, 26

area preserving map, 54

Arzelà-Ascoli theorem, 10

attractive invariant manifolds, 132

averaged system, 23

B

Baire space, 25

Banach fixed point theorem, 11

Banach functional spaces, 10

Banach inverse mapping theorem, 9

Banach-Mazur Theorem, 14

base space, 16

beam resting on two elastic bearings, 167

Bendixson criterion, 23

bifurcation equation, 12

blue sky catastrophe, 372

bounded multilinear maps, 9

breathers, 157

Brouwer degree, 13

Brouwer index, 13

buckled elastic beam, 220

buckled mode, 228

bundle projection, 16

C

Carathéodory property, 24

Cauchy residue theorem, 27

Cauchy-Schwarz-Bunyakovsky inequality, 10

center equation, 109

center manifold, 131

center manifold theorem for flows, 21

closed ball, 9

closed subset, 9

coercive mapping, 14

complex residue, 27

convex (compact) valued set mapping, 14

convex subset, 9

coordinate neighborhood, 15

covariant derivative, 373

cross-cap singularity, 149

D

D'Alembert equation, 373

degenerate homoclinic orbit, 45

degenerate system, 131

deterministic chaos, 19

differentiable manifolds, 15

discontinuous differential equations, 249

divergence, 23

Duffing equation, 1, 95

Duffing equations coupled by impulsive
effects, 42

E

elliptic singularly perturbed problem, 374

embedding, 16

equicontinuous sequence of functions, 10

equivariant ODE, 372

essential singularity, 27

Euler buckling load, 228

exponential dichotomy, 17

F

fast time, 132

fibre, 16

first integral, 22

flow, 20

Fourier coefficients, 10

Fourier transform, 10

Fredholm operator, 12

fundamental solution of

difference equation, 17

fundamental solution of

differential equation, 17

G

global center manifold, 22, 133

Gronwall inequality, 17

H

Hölder inequality, 10

Hartman-Grobman theorem for flows, 21

heteroclinic connection, 324, 361, 370

heteroclinic cycle, 363, 365, 371

heteroclinic orbit, 4

Hilbert space, 10

holomorphic function, 26

homoclinic cycle, 2

Hopf singularity, 136

horseshoe dynamics, 19

hyperbolic equilibrium, 20

hyperbolic fixed point, 18

hyperbolic matrix, 17

hyperbolic periodic solution, 19

I

immersed submanifold, 16

immersion, 16

implicit function theorem, 11
 induced topology, 15
 infinite dimensional center manifold, 170, 244
 infinite dimensional ODEs, 156
 inflated mapping, 73
 inflated Smale horseshoe, 81
 integrable map, 54

K

KBM-vector field, 23

L

Liouville theorem, 17
 Lipschitz continuous mapping, 14
 local C^r -chart, 15
 local trivialization, 16
 locally trivial vector bundle, 16
 logarithm principal value, 340
 Lojasiewicz-Ornelas parametrization theorem, 14
 Lyapunov-Schmidt method, 12

M

Malgrange preparation theorem, 26
 McMillan map, 54
 Melnikov function, 4, 5, 38, 44, 47, 51, 52, 55, 71, 121, 134, 237, 306, 328, 337
 Melnikov method, 337
 meromorphic function, 27
 multivalued or set-valued mapping, 14

N

natural projection, 15
 nondegeneracy condition, 256
 nondegeneracy condition of nonsmooth homoclinic orbit, 252
 nondegenerate homoclinic orbit, 45, 337
 normally hyperbolic manifold, 374

O

open ball, 9
 open subset, 9
 order of the zero of an analytic function, 27
 oriented manifold, 15
 oriented vector bundle, 16

P

Parseval theorem, 10
 penalized equation, 373
 period blow-up, 372
 periodics, 19
 piecewise linear 3-dimensional differential equation, 299
 piecewise smooth ODEs, 249

Plancherel theorem, 11
 Poincarè-Bendixson theorem, 23
 pole of order m of a complex function, 27
 proper mapping, 14

R

reduced equation, 21, 70, 98, 109, 221, 224
 region in \mathbb{C} , 26
 residual set, 25
 resonant forced compressed beam, 242
 roughness of exponential dichotomies, 17

S

scalar product, 10
 Schwarz reflection principle, 27
 second-order Melnikov function, 93, 309, 356
 section of the bundle, 16
 semi-hyperbolic equilibrium, 93
 sensitive dependence on initial conditions, 19
 separatrix, 4
 simple zero, 13
 simple zero of a map, 4
 sliding homoclinic, 315
 sliding solution, 316
 Smale horseshoe, 19
 Smale-Birkhoff homoclinic theorem, 19
 Sobolev space, 10
 spatially localized solution, 157
 standard like map, 54
 stick-slip, 313
 subharmonics, 19
 submersion, 16

T

tangent vector, 15
 Thom transversality theorem, 26
 time or Poincarè map, 19
 topological entropy, 38
 total space, 16
 trace of a matrix, 17
 transition matrix, 256, 311
 transversal heteroclinic cycle, 364
 transversal heteroclinic/homoclinic point, 18
 transversal nonsmooth homoclinic cycle, 251
 transverse heteroclinic orbit, 132
 trivial vector bundle, 16
 tubular neighbourhood, 16, 90, 149

U

uniform contraction mapping principle, 11
 uniformly bounded sequence of functions, 10
 unperturbed problem, 244

V

variational equation, 20, 30, 88, 99, 224
vector field, 16

W

Whitney C^∞ topology, 25
Whitney C^k topology, 25
Whitney umbrella, 137
