

Subject Index

A

- abbreviations xv
- AD (atrial diameter) 27, 101, 116, 201
 - AD index/cerebral BPD 102
- agyria 165
- antenatal cerebral pathologies
 - of infectious origin 237–243
- aqueductal stenosis
 - CMV 239
 - septo-optic dysplasia 146
 - toxoplasmosis 242
 - ventricular dilation 207, 209, 211
- arachnoid cysts 180–188
 - corpus callosum agenesis 180
 - heterotopia 182
 - hydrocephaly 181
 - interhemispheric cyst 180
 - macrocrania 181
 - PF 229
 - schizencephaly 182
 - ventricular dilation 181, 209
 - ventriculomegaly 181
- arrhinencephalia 141, 143
 - CCA 137, 144
 - holoprosencephaly 141, 143–144
 - olfactory
 - – bulbs 143–144, 147
 - – sulci 143, 147
- astrocytoma 177
- atriocerebral ratio or index 201
- atrium/atrial 21
 - atrial diameter (*see* AD) 27, 101–102, 116, 201
- AVM, pial 188

B

- biometric study 25
- Blake's pouch cyst posterior cerebral fossa (PF) 229
- BPD* (biparietal diameter) 115
 - bone BPD 26, 89
 - cerebral BPD 26, 88
 - index
 - – atrial diameter (AD) index/cerebral BPD 102
 - – craniocerebral index 90
 - – DV3/cerebral BPD index 104
 - – interhemispheric distance/cerebral BPD index 92

- brain stem 122, 217
 - brain volume abnormalities, embryology overview and classification 151–160
 - CCA 135
 - PF 217, 228
- bundles of *Probst* 131–132

C

- calcarina fissure 15
- calcifications/calcified necrosis 177, 258
 - CMV 237, 239
 - rubella 244
 - varicella 241
- callosal sulcus 18–20
- candlestick sign, CMV 241
- capillary
 - haemangioblastoma 177
 - telangiectasia of the rhombencephalon 233–236
- cavitations 253, 258
 - toxoplasmosis 242
- CCA* (corpus callosum agenesis) 131–139, 143
 - aqueductal stenosis 143
 - arachnoid cysts 180
 - arrhinencephaly 137, 144
 - brain stem hypoplasia 135
 - cerebellum hypoplasia 135
 - *Dandy-Walker* malformation 135
 - fornix 132, 135
 - gyration abnormalities 135
 - heterotopias 139
 - interhemispheric cyst 131, 137, 139
 - ischemic lesions 135
 - meningoceles and encephaloceles 195
 - posterior fossa 135
 - *Probst* bundles 131–132
 - ventricular dilatation 132, 203, 209
- central sulcus 16, 24
- cephalocoele 192
- cerebellar
 - atrophy, varicella 241
 - hypoplasia
 - – CCA 135
 - – CMV 228, 237
 - – meningoceles and encephaloceles 195
 - hypoplasia posterior cerebral fossa (PF) 218, 225
 - type I lissencephaly 165
- cerebral
 - biparietal diameter (cerebral BPD) 26, 88
 - mantle 124
- cerebro-oculo-muscular (COM) syndrome 167
- chiasma 121, 122, 147
- chlorid plexus papilloma 179, 180
- choroid plexus
 - cyst 180
 - papillomas 180
 - – hydrocephalus 180
 - – ventricular dilation 180
- cingular sulcus 15, 18–20
- cobblestone lissencephaly 167
- cisterna magna, mega, PF 229
- CMV (cytomegalovirus) infection 237–240
 - aqueductal stenosis 239
 - calcified necrosis 237
 - candlestick sign 241
 - cerebellar hypoplasia 225, 228, 237
 - germinal matrix/zone 239
 - hemimegalencephaly 241
 - hydranencephaly 241
 - hydrocephalus 239
 - ischaemic lesions 253
 - lissencephaly 237
 - microcephaly 237
 - molecular and meningeal heteropias 164
 - PF 225, 228
 - periventricular
 - – calcifications 239
 - – leucomalacia 237
 - polymicrogyria 239
 - porencephaly 237
 - schizencephaly 171, 241
 - subependymal pseudocysts 240
 - ventricular dilation 209, 237
- collateral sulcus 19–20
- COM (cerebro-oculo-muscular) syndrome 167
- congenital cystic abnormalities of the posterior cerebral fossa (PF) 217–231
- corpus callosum (CA)
 - agenesis (*see* CCA) 131–139, 143
 - dysgenesis 131–140

- length of 27, 93, 116
- lipoma 140
- thick CA 140
- cortical
- organization, abnormalities of 151-173
- ribbon 124
- craniocerebral index 90, 115
- ventricular dilation 206
- craniopharyngioma 177
- cysts/cystic
- encephalomalacia, multicystic 253
- epidermoid cyst 195
- interhemispheric, CCA 131, 137, 139
- intracranial space-occupying lesions 180
- - arachnoid cysts (*see there*) 180-188
- - choroid plexus cyst (*see there*) 180
- posterior fossa cysts 217
- - Blake's pouch cyst, PF 229
- pseudocysts, subependymal (*see* subependymal pseudocysts) 203, 240, 244
- subependymal cysts 253
- cytomegalovirus (*see* CMV) infection 164, 171, 209, 225, 228, 237-240, 253

D

- Dandy-Walker malformation
- CCA 135
- encephaloceles 195
- lissencephaly 167
- meningocele 195
- PF 221, 230-231
- development of the fetal brain 5-124
- diameter
- of the fourth ventricle (*see* DV4), anteroposterior 28, 105, 106, 116
- of the third ventricle (*see* DV3), lateral 28, 103-104, 116
- diffusion tensor imaging 9, 258
- disease/syndrome (*see* syndromes)
- double cortex syndrome/subcortical band heteropia (DCX) 164
- lissencephaly (*see there*) 164
- DV3 (diameter of the third ventricle), lateral 28, 103-104, 116, 202
- DV3 index/cerebral BPD 104
- DV4 (diameter of the fourth ventricle), anteroposterior 28, 116, 202
- DV4/FOD index 106

E

- encephaloceles (*see* meningoceles and encephaloceles) 192-197
- encephalocystomeningocele 195
- encephalomalacia, multicystic 253
- ependymoblastoma 177
- ependymoma 177
- epidermal nevus syndrome 159
- epidermoid cyst 195
- external occipitotemporal sulcus 19

F

- fetal cerebral parenchyma, abnormalities, ischemic and hemorrhagic lesions 247-263
- FOD (fronto-occipital diameter) 25, 87, 115
- DV4/FOD index 106
- LCC/FOD index 94
- Foix-Chavany-Mary syndrome 170
- fornix 132
- CCA 132, 135
- isolated agenesis of the septum 147
- fourth ventricle (*see* DV4) 22
- fronto-occipital diameter (*see* FOD)
- Fryns syndrome 144

G

- gadolinium injection 9
- gangliocytoma 177
- germinal zone 124, 151
- CMV 239
- haemorrhagic lesions 248, 253
- ischaemic lesions 247
- PF 228
- germinolysis (*see* subependymal cysts, pseudocysts) 253
- ischaemic lesions 255
- rubella 241
- glioblastoma multiforme 177
- gliopendymal cysts 182
- glioma 177
- gliosis 258
- globus pallidus 23
- glutaric acidaemia type II 170
- gradient-echo T2-weighted sequences 9
- gyration 32, 35, 160-172
- abnormalities of 160-172
- - CCA 135
- - meningoceles and encephaloceles 195
- microcephaly with simplified gyral pattern 155-157
- study of 32
- - MRI studies 118
- - neurofetopathological studies 117
- - sonographic studies 118

H

- haemorrhage/haemorrhagic lesions 248-252
- germinal zone 248
- hydrocephalus 248
- pericerebral space 251
- subependymal haemorrhage 253
- ventricular dilatation 203, 209, 248
- hemimegalencephaly (*see* HME) 159-160
- hemorrhage, ventricular dilation 203, 209
- heteropias 160-164
- arachnoid cysts 182
- CCA 139
- HME 159
- meningeal 164
- molecular 164
- nodular (*see there*) 160-163
- schizencephaly 171
- subcortical band (*see there*) 163
- subependymal 160-163
- ventricular dilation 203, 209
- hippocampus/hippocampal fissure 19-20
- HME (hemimegalencephaly) 159-160
- CMV 241
- heterotopia 159
- polymicrogyria 159
- tuberous sclerosis 159, 172
- ventricular dilation 206
- holoprosencephaly and absence of septum pellucidum 140-148
- arrhinencephalia (*see there*) 141, 143-144
- lobar holoprosencephaly 141
- macrocephaly (*see there*) 141
- microcephaly 141
- semilobar holoprosencephaly 141
- septo-optic displasia (*see there*) 141, 143, 146
- ventricular dilation 209
- hydranencephaly 253
- CMV 241
- toxoplasmosis 242
- hydrocephalus 201
- arachnoid cysts 181
- CMV 239
- encephaloceles 195
- haemorrhage 248
- ischaemic lesions 256
- meningoceles 195
- PF 222, 229-230
- rubella 244
- space-occupying lesions 177, 180
- varicella 241
- hypothalamic hamartoma 177

I

- IHD (interhemispheric distance) 29, 91
- imaging of the pathological fetal brain 131–262
- in vacuo dilation 201
 - ischaemic lesions 253
 - of the ventricles, ventricular dilation 206, 211
- infectious origin, antenatal cerebral pathologies of 237–243
- inferior
 - frontal sulcus 18
 - temporal sulcus 19
- interhemisphere/interhemispheric
 - cyst, arachnoid cysts 180
 - distance (IHD) 29, 91
 - – index/cerebral BPD 92
 - fissure 18
- intermediate zone 124, 151
- internal capsule
 - anterior limb 23
 - posterior limb 23
- internal parieto-occipital fissure 15
- interopercular distances (*see* IOPD)
- intracerebral tissue space-occupying lesions 177–180
- intracranial space-occupying lesions 177–197
- intraparietal sulcus 21
- IOPD (interopercular distances) 29, 99–100
 - anteroposterior 99
 - craniocaudal 100
- ischaemic lesions (*see also* haemorrhagic lesions) 247–248, 253–261
 - CCA 135
 - CMV 253
 - germinal zone 247, 253
 - germinolysis 255
 - hydrocephalus 256
 - in vacuo dilation 253
 - myelination 258
 - polymicrogyria 253
 - porencephalic cavity/cantations 248
 - rubella 253
 - schizencephaly 253
 - subependymal haemorrhage 253
 - varicella 241
 - ventricular dilation 209, 253, 256
 - VGAM 189
 - *Zellweger* syndrome 253
- Ito* hypomelanosis 159

J

- Joubert's* syndrome 223, 230
 - PF 223, 230

K

- Klippel-Trenaunay-Weber* syndrome 159

L

- laminar necrosis 258, 170
- lateral
 - sulcus 17, 19–20
 - ventricles 27
- LCC/FOD index 94
- lissencephaly 165–168
 - CMV 237
 - subcortical band heterotopia 164
 - type I 165
 - – cerebellum hypoplasia 167
 - – microcephaly 167
 - – posterior fossa (Dandy-Walker malformation) 167
 - type II 167–169
 - – ciobblestone lissencephaly 167
 - – encephalocoele 167
 - – posterior fossa 167
 - – ventricular dilatation 168, 203, 209

M

- macrocephaly 141, 157–158
 - holoprosencephaly 141
- macrocrania 157, 177
 - arachnoid cysts 181
 - space-occupying lesions 177
 - VGAM 189
- marginal sulcus 15
- materials 11–12
- Meckel-Gruber* syndrome 195
- medulloblastoma 177
- mega cisterna magna posterior cerebral fossa (PF) 229
- megalencephaly 157–158
 - opercular dysplasia 158
 - peripheral space 157
 - pachygyria 157
 - polymicrogyria 158
- meningeal
 - heteropias 164
 - – cytomegalovirus 164
 - – toxoplasmosis 164
 - sarcoma 177
- meningocoeles and encephalocoeles 192–197
 - cerebellar hypoplasia 195
 - corpus callosum agenesis (CCA) 195
 - *Dandy-Walker* malformation 195
 - gyration abnormalities 195
 - hydrocephalus 195
 - vermian agenesis 195

- meningomyocoele 192
- methodology 13–34
- microcephaly 152
 - CMV 237
 - holoprosencephaly 141
 - rubella 244
 - with simplified gyral pattern 155–157
 - toxoplasmosis 242
 - varicella 241
- microlissencephaly 155
- microphthalmia, varicella 241
- middle cerebral peduncle 22
- migration/migratory (*see* neuronal migration)
- Miller-Dieker* syndrome 165–166
- molecular heteropias 164
 - cytomegalovirus 164
 - toxoplasmosis 164
- myelination
 - ischaemic lesions 258
 - study of 33, 119–120
- myelomeningocoele 207
 - ventricular dilation 206

N

- neuroblastoma 177
- neuronal migration 124
 - abnormalities 151–173
 - proliferation, and cortical organization, abnormalities of 151–173
- nodular heteropias 160–163
 - cerebellar hypoplasia 161
 - corpus callosum agenesis (CCA) 161
 - megacisterna magna 161
 - ventricular dilation 162

O

- occipitotemporal, external sulcus 19
- olfactory
 - bulbs 123
 - – septal agenesis 143–144, 147
 - sulci 123
 - – septal agenesis 143, 147
- opercular dysplasia
 - lissencephaly, type I 167
 - megalencephaly 158
- optic
 - chiasm 121–122
 - nerves 122
 - – septooptic dysplasia 147
- orbital
 - face of the frontal lobes 123
 - sulci 123

P

- pachygyria 165
- megalencephaly 157
- parenchyma, fetal cerebral, abnormalities, ischemic and hemorrhagic lesions 247–263
- parieto-occipital fissure, internal 15
- pericerebral space 26, 115
- AVM 188
 - haemorrhage 251
 - megalencephaly 157
 - ventricular dilation 206
- periventricular
- calcifications, CMV 237, 239
 - leucomalacia 253, 258
 - - CMV 237, 240
 - - ventricular dilation 214
 - - VGAM 189
- PF (posterior cerebral fossa), abnormalities of 217–234
- arachnoid cysts 229
 - Blake's pouch cyst 229
 - brain stem 217, 228
 - cerebellar hypoplasia 218, 225
 - congenital cystic abnormalities of the posterior fossa 217–231
 - cytomegalovirus (CMV) 225, 228
 - Dandy-Walker malformation 221, 230–231
 - germinal zone 228
 - hydrocephalus 222, 229–230
 - Joubert's syndrome 223, 230
 - mega cisterna magna 229
 - pontocerebellar hypoplasia 225
 - posterior fossa cysts 217
 - rhombencephalosynapsis 231–233
 - - capillar telangiectasia of 233–235
 - ventricular dilation 206
 - ventriculomegaly 228
 - vermian agenesis 218, 221–225, 230
 - Walker-Warburg syndrome 223
- pial AVM 188
- pituitary gland 121
- PNET (primitive neuroectodermal tumour) 177
- polymicrogyria 169–171
- CMV 239
 - HME 159
 - ischaemic lesions 253
 - megalencephaly 158
 - with laminar necrosis 170–171
 - - cytomegalovirus (CMV) 170
 - - toxoplasmosis 170
 - rubella 244
 - schizencephaly 171
 - toxoplasmosis 242
 - varicella 241
 - VGAM 189
 - without laminar necrosis 169–170
 - - cortical ribbon 169
 - - opercular dysplasia 169
 - - polymicrogyria 169
 - - Zellweger syndrome 169
- pons 22
- pontocerebellar hypoplasia posterior cerebral fossa (PF) 225
- porencephaly/porencephalic cavity/cavitations 253
- CMV 237
 - ischaemic lesions 248
- postcentral sulcus 16, 24
- posterior cerebral fossa (*see* PF), abnormalities of 217–234
- precentral sulcus 24
- primitive neuroectodermal tumour (PNET) 177
- Probst bundles 131–132
- CCA 131–132
- proliferation, neuronal migration and cortical organization, abnormalities of 151–173
- proteus syndrome 159
- pseudocysts, subependymal (*see* subependymal pseudocysts) 203, 240
- putamen 23

R

- reference slices 13–24
- results 35–114
- comments on results 115–120
- rhombencephalon, capillary telangiectasia of 233–234
- rhombencephalosynapsis 231–233
- rubella 242–244
- calcifications 244
 - hydrocephalus 244
 - ischaemic lesions 253
 - microcephaly 244
 - polymicrogyria 244
 - subependymal cysts 244

S

- schizencephaly 171–172
- arachnoid cysts 182
 - CMV 171, 241
 - heterotopia 171
 - ischaemic lesions 253
 - polymicrogyria 171
 - septal agenesis 144
 - ventricular dilation 171
- secondary singular sulci 15
- septo-optic dysplasia 141, 146
- aqueductal stenosis 146
 - holoprosencephaly 141, 143
- septum/septal
- agenesis 144
 - - schizencephaly 144
 - - ventricular dilation 203, 209

- destruction 146
 - - pellucidum, absence of 144–148
 - - ventricular dilation 209
- subcortical heteropia 163
- subcortical band heteropia/double cortex syndrome (DCX) 164
- subependymal
- cysts 253
 - - haemorrhage 172, 248, 253
 - - rubella 244
 - heteropias 160, 163
 - pseudocysts 240
 - - CMV 240
 - - rubella 244
 - - ventricular dilation 203
- sulcus/sulci
- calcarina fissure 15
 - callosal sulcus 18–20
 - central sulcus 16, 24
 - cingular sulcus 15, 18–20
 - collateral sulcus 19–20
 - external occipitotemporal sulcus 19
 - interhemisphere fissure 18
 - inferior
 - - frontal sulcus 18
 - - temporal sulcus 19
 - internal parieto-occipital fissure 15
 - intraparietal sulcus 21
 - lateral sulcus 17, 19–20
 - marginal sulcus 15
 - olfactory sulci 123, 143, 147
 - orbital sulci 123
 - postcentral sulcus 16, 24
 - precentral sulcus 24
 - secondary singular sulci 15
 - superior
 - - frontal sulcus 18
 - - temporal sulcus 19–20
- superior
- frontal sulcus 18
 - temporal sulcus 19–20
- syndromes
- Dandy-Walker 135, 167, 195, 221, 230–231
 - Foix-Chavany-Mary 170
 - Fryns 144
 - Ito 159
 - Joubert's 223, 230
 - Klippel-Trenaunay-Weber 159
 - Meckel-Gruber 195
 - Miller-Dieker 165–166
 - Walker-Warburg 167, 195–196, 223
 - Zellweger (*see there*) 160, 163, 169–170, 253

T

- T1-weighted sequences 7–8
 - advances and drawbacks 7
 - applications 7–8
 - techniques 7
- T2-weighted sequences 5–7
 - advances and drawbacks 5–6
 - applications 6–7
 - gradient-echo T2-weighted sequences 9
 - techniques 5
- TCD (transverse cerebellar diameter) 31, 97, 116
- techniques 5–10
- tegmenum 22
- teratoma 177
- thalamus 23
- toxoplasmosis 242
 - aqueductal stenosis 242
 - cavitations 242
 - hydraencephaly 242
 - microcephaly 242
 - molecular and meningeal heteropias 164
 - polymicrogyria 242
 - ventricular dilation 242
- transverse cerebellar diameter (TCD) 31, 97, 116
- tuberous sclerosis/
 - tuberous sclerosis complex (TSC) 172–173
 - HME 159, 172
 - subependymal haemorrhages 172

V

- varicella 241
 - calcifications 241
 - cerebellar atrophy 241
 - hydrocephalus 241
 - ischaemic lesions 241
 - microcephaly 241
 - microphthalmia 241
 - polymicrogyria 241
- vein of *Galen* aneurysmal malformation (*see* VGAM) 188–192
- ventricular dilation 201–215
 - aqueductal stenosis 207, 209, 211
 - arachnoid cysts 181, 209
 - CCA 132, 203, 209
 - craniocerebral index 206
 - CMV 209, 237
 - hemimegalencephaly 206
 - hemorrhage 203, 209, 248
 - heterotopia 203, 209
 - holoprosencephaly 209
 - in vacuo dilation of the ventricles 206, 211
 - ischaemic lesions 209, 253, 256
 - lissencephaly 168, 203, 209
 - myelomeningocele 206
 - pericerebral space 206
 - periventricular leucomalacia 214
 - PF 206
 - schizencephaly 171
 - septal
 - – agenesis 203, 209
 - – destruction 209
 - subependymal pseudocysts 203

- toxoplasmosis 242
- VGAM 189
- ventriculomegaly (*see* ventricular dilation) 201
- arachnoid cysts 181
- PF 228
- vermis/vermian 22, 217
 - agenesis
 - – meningocoeles and encephalocoeles 195
 - – PF 218, 221–225, 230
 - anteroposterior diameter of 30, 96, 116
 - height of 30, 95, 221
 - surface of 31, 98, 116
- VGAM (vein of *Galen* aneurysmal malformation) 188–192
 - ischaemic lesions 189
 - macrocrania 189
 - periventricular leucomalacia 189
 - polymicrogyria 189
 - ventricular dilation 189

W

- Walker-Warburg* syndrome 167, 195–196
 - PF 223

Z

- Zellweger* syndrome 160, 163, 169–170
 - ischaemic lesions 253
 - polymicrogyria (*see there*) 169
