282, 296

Subject Index

A

Acceleration effect, 80–81
Activation energy, 263, 280
Applying the II-theorem to transform PDE into ODE, 63
Archimedes number, 19
Arrhenius law, 261, 263–264, 267, 270

B

Bessel function, 123, 272
Biot number, 19
Bond number, 19
Brinkman number, 14, 19
Buoyant jet, 149–154

C

Capillary number, 19, 95
Capillary waves in liquid lamella after a weak drop impact onto a thin liquid film, 58–60
Clausius–Clapeyron equation, 289, 293
Co-flowing turbulent jets, 238–239, 242–244
Combustion of non-premixed gases, 264, 271–274, 278
Combustion waves, 268–271
Continuity equation, 7, 13, 31–34, 49, 52, 56, 67, 68, 71, 77, 85, 104, 134, 168, 239
Convective heat and mass transfer, 2, 160, 166
Couette flow, 178–179
Critical conditions, 268

D

Damkohler number, 17, 19, 21
Darcy number, 19

Dean number, 19, 118–120
Deborah number, 19
Delta function, 160
Diffusion boundary layer over a flat reactive plate, 65–67
Diffusion flame, 273–281, 284, 288, 291, 293, 294
Dimensional and dimensionless parameters, 3–7
Dimensionless groups, 1, 3, 9, 13, 18–22, 26, 29, 40, 45, 48, 51, 53, 73, 81, 84, 87, 90–91, 110, 111, 115, 117, 118, 120, 122, 124, 139–141, 167, 179, 188, 189, 196, 202, 207, 220, 242, 249, 255, 256, 270, 273, 295
Dorodnitsyn–Illingworth–Stewardson transformation, 197, 276, 278
Drag
 of a body partially dipped in liquid, 87
 of a deformable particle, 84–86
 on a flat plate, 73–76
 force, 1, 4, 7, 23–28, 71–101, 145
 of an irregular particle, 82–84
 on a solid particle, 76–82
 of a spherical particle at low, moderate and high Reynolds number, 1, 76–79

E

Eckert number, 19, 179
Eddy viscosity and thermal conductivity, 224–229
Effect
 of energy dissipation, 112
 of the free-stream turbulence, 1, 81, 171–173
 of particle acceleration, 80

Effect (*cont.*)

- of particle-fluid temperature difference, 1, 82
- of particle rotation, 1, 79, 169–171
- of velocity gradient, 174–175

Ekman number, 19

Enthalpy, 5, 16, 17, 134, 135, 184, 195, 196, 237, 261–263, 278, 280, 295

Entrance

- flow regime, 106–108
- region of pipe, 106, 107, 180–181

Euler number, 14, 17, 19, 22

F

Flow

- in curved pipes, 116–120
- in irregular pipes, 111–112
- over a plane wall which has instantaneously started moving from rest, 44–47
- in straight rough pipes, 1

Fourier number, 122

Frank-Kamenetskii

- approximation, 263, 264
- parameter, 266, 267

Freezing of a pure liquid, 202–205

Froude number, 14, 17, 73, 86, 87, 256

Fully developed flow

- in rough pipes, 109–111
- in smooth pipes, 109

G

Gas torches, 2, 280–287

Grashof number, 19, 170, 186, 188–190, 193

H

Hadamard–Rybczinskii formula, 85

Heat

- of reaction, 265, 267, 279, 290, 295
- release, 19, 21, 66, 162, 261, 265, 266, 268, 269, 288, 294

Heat transfer

- accompanying condensation of saturated vapor on a vertical wall, 199–201
- in channel and pipe flows, 2, 178–183
- under the conditions of phase change, 160
- from a flat plate in a uniform stream of viscous high-speed perfect gas, 195–199
- in forced convection, 165–178

from a hot particle immersed in fluid flow, 2, 165–169

in mixed convection, 2, 187–188

in natural convection, 186–194

from a spherical particle, 186–187

from a spinning particle, 170, 187–188

from a vertical hot wall, 190–193

I

Ideally stirred reactor, 265

Immersed flame, 288–294

Impinging turbulent jet, 252–254

Inhomogeneous turbulent jet, 232–238

J

Jacob number, 19

Jet flow, 43, 51, 131–156, 160, 225, 228, 229, 231, 245, 248, 287, 288

K

Knudsen number, 19, 112, 113

Kutateladze number, 19

L

Laminar

boundary layer over a flat plate, 14, 47–51

flow near a rotating disk, 55–58

flows in channels and pipes, 103–129

jets issuing from a thin pipe, 134

submerged jet, 51–54, 131, 141–143, 154–156, 185

wake of a solid body, 143–146

Lewis number, 18, 19, 262, 263, 269, 290, 295

M

Mach number, 19, 275, 278, 279

Mass

diffusivity coefficient, 262

flux, 23, 190, 194, 206, 208, 235, 247, 271, 285

transfer from a spherical particle in natural and mixed convection, 189–190

transfer in forced convection, 165–178

transfer to a vertical reactive plate in natural convection, 193–194

transfer to solid particles and drops immersed in fluid flow, 176–178

Micro-channel flows, 112–113
 Microkinetic law, 262
 Mixing length, 153, 225, 226

N

Navier–Stokes equations, 7, 13, 27, 28, 31, 32, 34, 39, 52, 56, 67, 71, 77, 96, 104, 105, 112, 118, 120, 124, 136, 168, 261
 Newton's law, 28, 79
 Nondimensionalization of the governing equations, 1, 16
 Non-Newtonian fluid flows, 1, 18, 113–116
 Nusselt number, 15, 20, 166, 168–172, 175, 179, 181–183, 186–189, 193, 199

O

Oscillatory motion, 75–76

P

Peclet number, 14, 17, 20, 21, 166, 168, 169, 175–178, 190, 207, 274
 Plane jet, 137, 147, 183, 250, 252
 Prandtl number, 18, 20, 65, 82, 151, 168–170, 172–174, 179, 180, 182, 183, 186–188, 192, 193, 225, 228–229
 Pre-exponential, 280, 289
 Propagation of viscous-gravity currents over a solid horizontal surface, 60–63

R

Rate of conversion, 262
 Rayleigh number, 20, 187
 Reynolds number, 1, 2, 14, 17, 18, 20–22, 25, 27, 28, 34, 72–84, 86, 88, 89, 91, 96, 97, 103, 105, 107, 110–111, 113, 115, 117, 118, 120, 124, 128, 142, 143, 153, 155, 168–170, 172–176, 180, 182, 188, 189, 211, 213, 219
 Richardson number, 20
 Rossby number, 20

S

Schmidt number, 18, 20, 30, 67, 194, 228, 229
 Schvab–Zel'dovich transformation, 264, 272
 Sedimentation, 1, 90–93
 Self-similar solution, 39, 41–43, 58, 63, 67, 149, 152, 191, 201, 204, 205, 242, 249, 276, 279, 286

Semenov number,
 Shear stress, 33, 36, 45, 50, 74, 77, 78, 88, 113, 114, 217, 221, 231, 234, 285
 Sherwood number, 20, 176–178, 190, 207
 Similarity, 1, 3, 11, 21–22, 211, 226, 245, 281
 Single-one-step chemical reaction, 262
 Spalding transfer number, 296
 Stoichiometric coefficient, 264, 276
 Stokes equations, 97
 Strouhal number, 14, 17, 20, 75

T

Taylor number, 20
 Temperature field, 150, 151, 153, 160–165, 183, 184, 191, 204, 205, 265
 induced by a plane instantaneous thermal source, 160–161
 induced by a pointwise instantaneous thermal source, 161–162
 Terminal velocity of small heavy spherical particle in viscous liquid, 87–90
 Thermal
 boundary layer over a flat plate, 63–65
 characteristics of laminar jets, 183–185
 diffusivity coefficient, 162, 163, 205, 262
 explosion, 2, 263–268
 particle in viscous liquid, 87–90
 Thin liquid film on a plane withdrawn from a pool filled with viscous liquid, 93–96
 Total enthalpy, 263, 295
 Total momentum flux, 52, 54, 133, 135, 136, 143, 146, 227, 229, 235, 241, 252, 256, 258, 285
 Transfer in turbulent jet, 224
 Turbulent
 jet, 2, 135, 147, 153, 215, 224–254
 wall jet, 248–251
 Two-phase flow, 19, 71, 93

U

Unsteady flows in straight pipes, 120–123

V

Van-der Waals equation, 30–31

W

Wall jet over plane and curved surfaces, 146–149
 Weber number, 20, 84, 100, 256
