M

- Madelung energy, 37, 40
- Madelung potential, 31, 33, 37, 140, 146
 - auxiliary density, 146
- Mean-value point, 331
- Microcell, 337, 338
- Minimal basis set, 14, 114
- Moment analysis, *see* Density of states
- Moments, *see* Density of states
- Momentum operator, 155, 162–166
 - canonical, 155
- Mott formula, 171
- MTA, *see* Muffin-tin approximation
- MTZ, *see* Muffin-tin zero
- Muffin-tin approximation, 1, 6–9, 46, 113–115, 120, 186
- Muffin-tin potential, 6, 7, 24, 114
- Muffin-tin sphere, 6, 7, 117, 174
- Muffin-tin zero, 6, 8, 17, 24, 33, 132, 146
- Multiple-1 set, 9, 174
- Multipole moment, *see* Total density, 234, 235

N

- Neumann function, 8, 10, 45–69, 74–104
 - augmented pseudo, 105
 - barred, 47–69
 - derivative, 52–55
 - explicit expression, 48
 - integral, 59–69
 - recursion relation, 51, 52
 - small argument, 50
 - Wronskian, 55–57

- Bloch sum, 74–83, 87–91
 - energy derivative, 81, 82
 - symmetry, 82, 83
 - envelope, 45–69, 74–106, 115, 173, 296–300
 - Bloch sum, 70, 74–83, 87–91
 - expansion theorem, 83–91
 - gradient, 57–59, 90, 91
 - overlap integrals, 91–104
 - Ewald method, 74–83
 - expansion theorem, 83–91
 - gradient, 57–59, 90, 91
 - overlap integrals, 91–104
 - pseudo, 104–106
 - Bloch sum, 105, 106
 - Fourier transform, 107–110
 - overlap integral, 106, 107
 - spherical, 8, 45–69, 83–87
 - calculation, 263–265
 - derivative, 52–55
 - explicit expression, 48
 - integral, 59–69
 - large argument, 50
 - recursion relation, 51, 52, 63
 - small argument, 50
 - Wronskian, 55–57, 61
 - symmetry, 51
 - Norm, *see* Wave function
 - Nucleus
 - dipole moment, 234, 235
 - electric field at, 233
 - multipole moment, 234, 235
 - quadrupole moment, 233–235
- O**
- Obs*, *see* Orbital basis set
 - Occupation matrix, *see* Local occupation matrix
 - Off-center sphere, 11–13, 115, 116
 - On-center sphere, 10, 13, 115, 116
 - One-center expansion, 13, 115, 174
 - One-center integral, 20, 21, 23
 - Optical absorption, 158
 - Optical conductivity, 155–167
 - absorptive part, 157
 - dispersive part, 157
 - interband transition, 155
 - intraband transition, 155
 - Optical properties, 155–167
 - Optical reflectivity, 158
 - Orbital basis set, 175, 176
 - envelope function, 176
 - Oscillator strength, 156, 158–167
 - calculation, 270, 278

Overlap integral, 45
 Overlap matrix, 18, 22–24, 27, 106, 115, 129, 130, 194, 195
 phase factor, 131, 132, 195
 product basis set, 176, 185
 pseudo function, 106

P

Partial wave, 7, 114
 higher, 13, 115, 118, 119, 123
 intermediate, 13, 20, 115, 118, 119, 123
 lower, 11, 20, 115, 118, 119, 123
 Partial-wave method, 1, 6
Pbs, *see* Product basis set
 Phase factor, *see* Secular matrix
 Plane wave, 8
 Plane-wave cutoff, 121, 186
 Plane-wave method, 1
 Plasma frequency, 155
 Poisson equation, 138, 177, 207
 solution, 173
 intraatomic, 255–259
 Poisson sum formula, 278–281
 Poisson transform, 74–76, 141, 280, 300
 Potential, 174
 electrostatic, *see* Electrostatic potential
 exchange-correlation, *see*
 Exchange-correlation potential
 external, *see* External potential
 Hartree, *see* Hartree potential
 Madelung, *see* Madelung potential
 plane-wave representation, 173
 representation, 173
 spherical-wave representation, 173, 175
 Power factor, 167
 Principal quantum number, 11, 13, 16
 Product basis set, 175–177, 186, 197
 envelope function, 176, 177
 overlap matrix, 176, 185
 projection matrix, 179, 198
 Projection matrix, 179, 198
 Projection operator, 177, 178
 Pseudo function, 45, 104–106, 115–117
 augmented, 105
 integral, 304–306
 Bloch sum, 105–110, 116
 Fourier transform, 107–110
 one-center expansion, 117, 118
 overlap integral, 106, 107, 125
 product, 119
 Pseudo part, 113
 basis function, 115, 117, 120
 plane-wave expansion, 126
 electron density, 113

 plane-wave expansion, 144
 electrostatic potential, 138
 interstitial region, 139
 plane-wave expansion, 138
 exchange-correlation energy density, 152
 plane-wave expansion, 152
 exchange-correlation potential, 144
 plane-wave expansion, 144
 full potential, 120
 one-center expansion, 121
 plane-wave expansion, 121, 126
 spherical-harmonics expansion, 121
 plane-wave expansion, 114
 potential, 7, 113
 secular matrix, 19, 113
 total density, 137
 plane-wave expansion, 138
 total energy, 114
 Pseudopotential method, 1

Q

Quadrupole moment, 233–235

R

Radial mesh, 253–255
 Refraction index, 158
 real, 158
 Relaxation time, 168
 Renormalized atom, 34
 Riccati-Bessel function, 47, 56
 orthonormality, 69
 Wronskian, 56
 Rodrigues's formula, 268, 335
 Root tracing, 9

S

Sampling methods, 245, 247, 332–337
 Schrödinger's equation, 5, 6, 17, 26, 33, 92, 114
 energy derivative, 92, 93
 radial, 10, 12, 16, 26, 28, 29, 47, 242
 Secular matrix, 17–24, 29, 113, 120–132, 174, 185–195
 phase factor, 131, 132, 195
 Seebeck coefficient, *see* Thermopower
 Self-consistency, 24
 Self-consistency cycle, 29, 33, 34, 137, 147, 202, 214
 Self-consistent field, 30
 Self-interaction, 222, 224
 Semi-core state, 117
 Shape approximation, 24, 30, 132, 136
 Simple-sampling method, 332, 333

- Single-particle energy, 17, 36, 37
 - Lagrange multiplier, 17
- Single-particle equation, 17
- Single-particle Hamiltonian, 17
- Single-particle potential, 5, 6, 29
- Single-particle states, 17
- Single-particle wave function, 17
- Slater integral, 224, 225
- Sommerfeld expansion, 171
- Special points, 325, 331, 332, 338
