
Subject Index

A

- ACE inhibitor 19
- adenosine 45, 69
 - ATP (adenosine triphosphate) 45, 71, 92
 - cAMP (cyclic adenosine monophosphate) 45, 47, 48
- adenyl cyclase 45
- afterload 7, 218
 - LV afterload 14 ff., 56
 - - and ventriculo-arterial coupling 14 ff.
 - reduction 8
- airway obstruction 57
- aldosteron, renin-angiotensin-aldosteron axis 209, 210
- alveolo-capillary membrane 65
- amrinone 47, 219
- anemic hypoxia 180
- angiotensin 80
 - renin-angiotensin-aldosteron axis 209, 210
- aortic input impedance 14
- ARDS (acute respiratory distress syndrome) 124, 125, 248
- arterial
 - arterial load
 - - characteristics, reflection indexes and mechanical power data 20
 - - in describing instantaneous pressure-flow relations 17
 - blood pressure 133, 134, 142
 - - systolic variations 142
 - catheterization 116
 - effective elastance of the arterial system (Ea) 23, 24
 - MAP (mean arterial pressure) 118
 - oxygen content (CaO₂) 177
 - oxygen saturation (SaO₂) 177
 - ventriculo-arterial coupling 14 ff.
- arteriolar tone 69
- atenol 19
- ATP (adenosine triphosphate) 45, 71, 92
 - ATP synthesis 71

- autonomic control, peripheral 52
- auto-PEEP 122
- autoregulation 80
 - autoregulatory escape 80

B

- backward failure (congestion) 197
- balloon counterpulsation, intraaortic 222
- balloon-tip pulmonary artery catheter 120
- beta
 - β -agonist drugs 46
 - β -receptor 45
 - β_1 -receptors 46
 - β_1 -stimulation 46
- blood flow
 - cerebral 144
 - compromise myocardial blood flow 33
 - distribution 68, 69, 109
 - Doppler flow velocity and echocardiography 142
 - femoral 83
 - gut blood flow, regulation 79
 - hepatic, regulation 80, 81
 - intestinal, intrinsic and extrinsic control 79
 - passive pressure-flow relationships 109
 - pulmonary 150, 153
 - regional 69
 - renal 144
 - splanchnic 76 ff.
- blood loss 211
- blood pressure 116, 141
 - arterial 133, 134, 142
 - automated noninvasive blood pressure measurement 141
- breath, spontaneous 132
- breath-holding methods 150 ff.
 - rebreathing method (*see also there*) 151 ff.
 - single-breath method 153
- bypass surgery, cardiopulmonary 163, 164, 223

C

CABG reports, cardiogenic shock 225
calcium channel blocker 19
cAMP (cyclic adenosine monophosphate) 45, 47, 48
CaO₂ (arterial oxygen content) 177
capnography 146
carbon
– dioxide 150
– monoxide transfer factor 155
cardiac
– cycle 3
– function curve 32, 33
– output (CO) 94, 95, 123, 158, 177
– – CO₂ rebreathing cardiac output 144
– – pulse contour cardiac output 144
– – TEE 158
– – thermo-dilution cardiac output 142
– performance 198
– tamponade 119
cardiogenic shock 71, 217 ff., 247
– CABG reports 225
– causes of 221
– following acute myocardial infarction 247
– post MI 226
– postcardiotomy 223
– reperfusion therapy 224, 225
cardiovascular
– management of the critically ill patient 28 ff.
– support by hemodynamic subsets 207 ff.
– – sepsis 230 ff.
carotid artery puncture 119
catechol 218
catecholamines 47, 231
catheterization, arterial 116
catheters
– central venous 119
– intravascular 114
– pulmonary artery 120
– – balloon-tip pulmonary artery catheter 120
– – complications 125
cellular
– events during myocyte contraction 45
– respiration 92
central venous
– catheters 119
– pressure (CVP) 130
cerebral blood flow 144
characteristic impedance 18
circulatory
– failure 198
– hypoxia 180

CO₂

– extracorporeal CO₂ removal (ECCO₂R) 249
– rebreathing
– – cardiac output 144
– – method, partial 152
compromise myocardial blood flow 33
congestion (backward failure) 197
contractility 7
cor pulmonale
– acute 54
– chronic obstructive pulmonary disease with cor-pulmonale 119
coronary perfusion pressure 57
CPAP 53, 58
CVP (central venous pressure) 130 ff., 222
cytokines 212

D

damping coefficient 114
diastole/diastolic
– failure 44
– LV end-diastolic volume (EDV) 119
– RV diastole 37
diffusion 65
2,3-diphosphoglycerate (2,3-DPG) 66
DO₂ (oxygen delivery) 51, 64 ff., 96, 97, 177, 186, 198, 209, 220, 230
– critical 198
– impaired DO₂ 209
– regional oxygen delivery 68
– tissue oxygen delivery (DO₂) 64 ff.
– VO₂/DO₂ (see there) 96, 97
– whole body DO₂ 186
dobutamine 46, 182, 219, 231, 236
dopamine 46, 86, 219, 236, 237
dopexamine 47, 86, 87, 238, 239
Doppler
– Doppler echocardiography 159
– Doppler flow velocity and echocardiography 142
– transcranial Doppler 144

E

echocardiography
– Doppler echocardiography 159
– Doppler flow velocity and echocardiography 142
– echocardiographic automated border detection 167
– novel echocardiographic approaches to assess ventricular function 163
– transesophageal (TEE) 157 ff.
– twodimensional 142
ECLS technique 249
EDHF (endothelium-dependent hyperpolarizing factor) 69

- EDRF (endothelium derived relaxing factor) 69, 188
- elastance 8, 9
- effective elastance of the arterial system (Ea) 23
 - end-systolic elastance (Ees) 8
- embolism, pulmonary 119
- emoximone 47, 48
- enalapril 88
- endotoxin 192
- end-systolic elastance (Ees) 8
- energy dissipation in the arteries 16-18
- epinephrine 36, 80, 219, 234, 235
- ESPVR 8
- exercise 58
- ventilation as exercise 58
- extracorporeal
- CO₂ removal (ECCO₂R) 249
 - indications for extracorporeal cardiac assist 247
 - lung assist (ECLA) 249
 - membrane oxygenation (ECMO) 220, 246, 249
 - support 246 ff.
- F**
- FAD⁺ (flavine-adenine dinucleotide) 92
- femoral blood flow 83
- Fick's* equation 96, 178
- forward failure (hypoperfusion) 197
- Frank-Starling* relation 5
- FRC (functional residual capacity) 54
- frequency, natural (FN in hertz) 114
- G**
- G protein 45
- gastric
- intramucosal pH (pHi) 77, 87
 - mucosal acidosis 88
- gut blood flow, regulation 79
- H**
- heart
- total artificial hearts (TAH) 247
 - transplantation 224
- heart-lung interactions 51 ff.
- mechanical 55
- heat shock protein (HSP 72) 214
- hematocrit, capillary 69
- hemoconcentration 68
- hemodilution 68
- hemodynamic
- data 114
 - cardiovascular support by hemodynamic subsets 207 ff.
 - effects
 - - of changes in intrathoracic pressure 55
 - - of ventilation 52
 - management 200
 - monitoring
 - - invasive hemodynamic monitoring 113 ff.
 - - non-invasive hemodynamic and metabolic monitoring 141 ff.
 - - rationale for hemodynamic monitoring 105 ff.
 - - - limitations 108
 - RV hemodynamics 36
- hemoglobin
- concentration 94
 - optimal hemoglobin level 182
 - oxygen-hemoglobin binding and dissociation curve 66
- hemorrhagic shock 209 ff.
- molecular responses 212
 - in trauma patient 211
- hepatic
- blood flow, regulation 80, 81
 - indocyanine green 82
- hepatosplanchnic region 76
- hibernating myocardium 98
- hydraulic power, total 21
- hyperbaric oxygen 94
- hyperdynamic septic shock 86
- hypertension
- pulmonary artery hypertension 119
 - treatment of systemic hypertension 18, 19
- hypoperfusion 84
- (forward failure) 197
- hypotension 201 ff.
- hypovolemia 84, 201
- hypovolemic shock 71
- hypoxia/hypoxic
- anemic 180
 - anoxic (hypoxemic) 180
 - circulatory 180
 - pulmonary vasoconstriction 53
- I**
- IL (interleukin)
- IL-1 213
 - IL-6 213
- indocyanine green 81, 82
- inert gas 154, 155
- open circuit washin of inert gas 155
 - rebreathing method 154
 - single-breath breath-holding method 155
- inflammatory response 209
- SIRS (systemic inflammatory response syndrome) 85
- inodilators 47
- inotropic support 219
- inspiratory efforts, spontaneous 56

intestinal blood flow, intrinsic and extrinsic control 79
 intraaortic balloon counterpulsation 222
 intracranial hemorrhage 252
 intramucosal
 – pCO₂ monitoring 77
 – pH (pH_i) 77, 87, 192
 – – gastric 77, 87
 intrathoracic pressure (ITP) 34, 51, 55
 – hemodynamic effects of changes in intrathoracic pressure 55
 intravascular catheters 114
 ischemia 12
 isoproterenol 46

L

lactate 69
 – blood lactate levels 71
 law
 – of *Henry* 66
 – of *Ohm* 16
 – of *Starling* 6
 left ventricular (see LV)
 lipopolysaccharide (LPS) 189
 liver disease, end-stage 124
 local metabolic demand 109
 lung
 – acute lung injury 53
 – extracorporeal lung assist (ECLA) 249
 – total static lung compliance (TSLC) 248
 – volume 54

LV

– afterload 14 ff., 56
 – – and ventriculo-arterial coupling 14 ff.
 – diastolic compliance 54, 55
 – ejection efficiency 58
 – end-diastolic volume (EDV) 119
 – end-systolic pressure-volume relationship 163
 – failure 198
 – function 217
 – pressure-volume relations 3, 4, 163
 – volume 157

M

MAP (mean arterial pressure) 118, 218
Marfan syndrome 18
 MCFP (mean circulatory filling pressure) 29 ff.
 mediators of inflammation 77
 metabolic
 – monitoring 141 ff.
 – targets in acute resuscitation 197 ff.
 metallothionein 214
 microcirculation 70, 86

microcirculatory

– flow 187
 – oxygen exchange 70
 microvascular tone 188
 milrinone 47, 48, 219
 mitral insufficiency 133
 monitoring
 – hemodynamic monitoring (see there) 105 ff., 113 ff., 141 ff.
 – intramucosal pCO₂ monitoring 77
 – metabolic 141 ff.
 – transcutaneous oxygen tension monitoring 145
 multiple organ failure (MOP) 77, 230, 252
 – and secondary sepsis 252
 MVO₂ 48
 myocardial
 – blood flow, compromise 33
 – contraction, cellular anatomy 45
 – infarction, acute 247
 – septic shock, myocardial depression 143
 – hibernating myocardium 98
 – work 218
 myogenic tone 69

N

NAD⁺ (nicotinamide dinucleotide) 92
 natural frequency (FN in hertz) 114
 nifedipine 19
 nitric oxide (NO) 69, 188, 215
 norepinephrine 46, 80, 86, 232–236

O

Ohm's law 16
 oxygen (O₂)
 – arterial oxygen content (CaO₂) 177
 – arterial oxygen saturation (SaO₂) 177
 – carriage 93
 – consumption (see VO₂) 9, 10, 95, 145, 178, 185, 209
 – delivery (see DO₂) 51, 64 ff., 96, 97, 177, 186, 198, 209, 220, 230
 – demand 66
 – diffusion 70
 – ECMO (extracorporeal membrane oxygenation) 220, 246, 249
 – extraction 67, 96, 178, 183, 185, 187
 – – oxygen extraction ratio (O₂ER) 96, 178, 183
 – hyperbaric oxygen 94
 – microcirculatory oxygen exchange 70
 – mixed venous oxygen saturation (SvO₂) 124
 – MVO₂ 48
 – oxygen-hemoglobin binding and dissociation curve 66
 – oxygen supply, measures 109

- splanchnic oxygenation 237
- supply-independency 198, 199
- tissue hypoxia 71
- tissue oxygenation 92 ff., 145
- transcutaneous oxygen tension monitoring 145
- transport of oxygen (TO₂) 64 ff., 95
 - - in blood 66
 - - and delivery 66, 67
 - - rationale for assessing oxygen transport 110
- uptake (see VO₂)

P

- passive pressure-flow relationships 109
- pCO₂
 - monitoring, intramucosal 77
 - transcutaneous 146
- PDE (phosphodiesterases) 45
- PEEP 53, 54, 58, 122, 130
 - auto-PEEP 122
- perfused capillary surface density 193
- pericardium 33, 41
- peripheral
 - autonomic control 52
 - resistance 7, 15, 68
- pharmacologic support of critically ill patients 44 ff.
- phosphodiesterase inhibitors 47, 49, 218
- piroximone 48
- plethysmography
 - inductive 144
 - plethysmographic signal 139
- pneumothorax 119
- PO₂, transcutaneous 145
- Poiseuille's* equation 68
- preload 5
- pressure
 - blood pressure, monitoring 141
 - central venous pressure (CVP) 130, 222
 - intrathoracic pressure (ITP) 34, 51
 - LV pressure-volume relations 3, 4, 163
 - MAP (mean arterial pressure) 118, 218
 - MCFP (mean circulatory filling pressure) 29 ff.
 - passive pressure-flow relationships 109
 - pressure-area relations 168
 - pressure-volume relationship 23, 168
 - - and ventriculo-arterial coupling 23
 - pulmonary arterial pressure (Ppa) 53
 - pulmonary artery occlusion pressure (Ppao) 120
 - right atrial pressure 29, 33, 53
 - RV response to pressure overload 39
 - SPV (systolic pressure variation) 134-137
 - wedge pressure (see also there) 121, 129, 133

- work 11
- prostacyclin 69, 188
- prostaglandins 69
- PTCA (percutaneous transluminal coronary angioplasty) 225, 226
- pulmonary
 - arterial pressure (Ppa) 53
 - artery catheter 120
 - artery hypertension 119
 - artery occlusion pressure (Ppao) 120
 - blood flow 153
 - capillary wedge pressure (PCWP) 129, 133
 - chronic obstructive pulmonary disease with cor-pulmonale 119
 - embolism 119
 - hypoxic pulmonary vasoconstriction 53
 - shunt 150
 - vascular resistance 53, 54
- pulse
 - contour cardiac output 144
 - oxymeters 139
 - oxymetry 145
- pulsus paradoxus 57

R

- radionuclide imaging 143
 - fist pass radionuclide ventriculography 157
- ramipril 19
- rebreathing method 151 ff.
 - inert gas 154
 - one-step 151
 - partial CO₂ 152
- renal blood flow 144
- renin-angiotensin-aldosterone axis 209, 210
- reperfusion therapy 224, 225
- resistance
 - peripheral 15, 68
 - - total peripheral resistance (TPR) 7, 15
 - pulmonary vascular resistance 53
 - systemic vascular resistance 7
- respiration/respiratory 64 ff.
 - muscles 58
 - oxygen membrane 65
 - RSVT (respiratory systolic variation test) 137, 138
- resuscitation, goals of 175 ff., 213
 - metabolic targets in acute resuscitation 197 ff.
- reverse T₃ 49
- rib cage 64
- right
 - atrial pressure 29, 33, 53
 - right heart as an endocrine organ 42
 - right ventricular (see RV)

- ringing 116
 RV
 - diastole 37
 - - RV end-diastolic volume 54
 - dysfunction 119, 197
 - function 36 ff.
 - hemodynamics 36
 - response
 - - to decreased contractile state 41
 - - to pressure-overload 39
 - - of right coronary circulation to RV over-
 load 40
 - stressed volume 38
 - systole 37
- S**
 sarcomeres 6
 sepsis 185 ff., 192
 - multiple organ failure and secondary
 sepsis 252
 - pathophysiology of VO_2/DO_2 185 ff.
 septic shock 18, 21, 86, 143
 - hyperdynamic septic shock 86
 - myocardial depression 143
 shock
 - cardiogenic 71, 217 ff., 247
 - compensated 209
 - decompensated 210
 - heat shock protein (HSP) 214
 - hemorrhagic 209 ff.
 - hypovolemic 71
 - septic 18, 21, 86, 143
 shunt, pulmonary 150
 signal damping 116
 Simpson's rule 166
 SIRS (systemic inflammatory response
 syndrome) 85
 splanchnic
 - blood flow 76 ff.
 - oxygenation 237
 - perfusion 233
 - tonometry 146
 spontaneous
 - breath 132
 - inspiratory efforts 56
 Starling
 - Frank-Starling relation 5
 - Starling's law 6
 - Starling resistor 29
 stress proteins 214
 stressed volume 31
 - RV stressed volume 38
 stunning 12
 subclavian artery puncture 119
 sympathetic tone 109
 systemic
 - vascular resistance 7
 - venous return 55
 systole/systolic
 - arterial blood pressure, systolic variations
 142
 - failure 44
 - RSVT (respiratory systolic variation test)
 137, 138
 - RV systole 37
 - SPV (systolic pressure variation) 134-137
- T**
 thermodilution
 - cardiac output 142
 - technique 123
 thoracic electric(al)
 - bioimpedance (TEI) 144
 - impedance 142
 thoracography 144
 tidal volume 64
 tissue oxygenation/tissue oxygen delivery
 64 ff., 92 ff.
 - tissue hypoxia 71
 TNF 213
 tonometry 146
 total
 - artificial hearts (TAH) 247
 - hydraulic power 21
 - peripheral resistance (TPR) 7, 15
 - static lung compliance (TSLC) 248
 transcranial Doppler 144
 transesophageal echocardiography (TEE)
 157 ff.
 transplantation, heart 224
 trauma patient 211
 tricuspid insufficiency 130
 triiodothyronine (T3) 49, 219
 - reverse T3 49
 troponin 48
 twodimensional echocardiography 142
- U**
 unstressed volume 31
- V**
 vascular waterfall 29
 vasoconstriction 53, 69, 81
 - hypoxic pulmonary vasoconstriction 53
 vasopressine 80
 venous
 - mixed venous oxygen saturation (SvO_2)
 124
 - venous return
 - - determinants 28, 29
 - - systemic venous return 55
 - - venous return curve 32

- ventilation 52, 58, 64 ff.
 - as exercise 58
 - hemodynamic effects 52
 - mechanical 132
- ventricular
 - assist device (VAD) 220, 247
 - functions 201
 - - left ventricular (see LV)
 - - right ventricular (see RV)
 - interdependence 54
 - septum 39
- ventriculo-arterial coupling 14 ff.
 - pressure-volume relationship and ventriculo-arterial coupling 23
- ventriculography, first pass radionuclide 157
- vesnarinone 49
- viscosity 68
- VO₂ (oxygen uptake/oxygen consumption) 9, 10, 95, 145, 178, 185, 209
- VO₂/DO₂
 - pathophysiology of VO₂/DO₂ in sepsis 185 ff.
 - physiology 177 ff.
 - relationship 96, 97, 179
- volume
 - pressure-volume relationship 23, 168
