

Subject Index

- Adenoviral late mRNA 57
 - polyadenylation at five sites 59
 - 5'-tripartite leader 57
- adenovirus 51, 93, 94, 105, 107-109
 - acceptor sites 53
 - early regions 52
 - mRNA polyadenylation 56
 - splice donor sites 53
 - SV 40 hybrid 8
 - type 2 late genes 56
 - VA RNA genes 28
- alphaviruses DI RNAs 167
- ATPase 18
- autointerference 152

- Brome mosaic virus 95, 100, 107

- Cap (see translation)
- cap-binding protein 106, 108
- capstructure 1
- capped cellular RNAs 142
 - 5'-end heterogeneity 142
- capped fragments 138
 - A cleavage 138
- cellular DNA replication 18
- chromatin structure 30
- cloned SV 40 origin 17
 - hybrid plasmid vectors 18
 - pseudorevertants 17
- conserved replication and encapsidation
 - origins 185
 - minimum sequence 186
 - packaging constraints 187
 - mutational drift 191
- cooperative binding 12
 - three sites 11
- copy-back model 174, 175
 - viral replicase 174
 - fall-off and resumption 175
- coterminal mRNA species 49
 - plus-strand leader RNA 182, 189
 - minus-strand leader RNA 183, 189
 - interferon-inducing 183
 - primary transcription 188
 - secondary transcription 188
- D2 protein 8
 - electron micrographs 12
- defective interfering particles 151
 - occurrence in RNA viruses 153
- definition of DI 154
- DNA binding protein 9
 - filter binding assay 11
 - DNase footprinting 11
 - DMS protection 11
- DNA virus DI particles 194
 - snap-back 194
- double-strand viruses 169
 - reovirus 169
 - S cerevisiae 170
- drosophila heat shock mRNAs 88

- E1A adenoviral polypeptides 53
- E1B coding sequences 53
- edeine 95
- enzymatic properties of T 18
- error-prone RNA polymerase 174
- eukaryotic genetic expression 1

- Flavivirus 101
- foot-and-mouth disease virus 94, 99, 105, 109

- Generation of DI RNAs 170, 171
- genome rearrangements 152, 155, 177
 - negative-strand viruses 156
 - rhabdovirus 156
 - paramyxoviruses 156
 - positive-strand RNA virus 156
 - double-strand RNA viruses 156
- globin mRNA 92, 93, 99, 107-108

- Helper virus 154

- DI RNA transcriptional and translational activities 182

- Influenza 163
 DI RNAs 164
 m RNA synthesis 126
 mRNAs 54
 NS1 54
 NS2 54
 Segment 8 RNA 55
 virus 125
 inhibitors of influenza transcription 141
 secondary structures 141
 multistranded polyA. polyU 141
 polyS⁴U 141
 initiating SV 40 DNA replication 17
 deletion mapping 17
 initiation codon 89
 failure to initiate at GUG 91
 redundant AUG codons 105
 initiation factors (see translation)
 initiator oligonucleotides 3
 RNA priming 3
 preformed 5'-ends 3
 interference mechanisms 187
 replicase competition 187
 replicative advantage 187
 heterotypic interference 189
 interfering properties of DI RNAs 181
 low vs. high interference cells 181
 internal genome deletions 161, 162, 177
 splicing 177
 breakage and union 177
 transcriptive or replicative error 177
- Large T antigen 7
 primary structure 7
 purification 7
 levels from different cells 9
 SV 80 7
 monoclonal antibodies 18
 late SV 40 transcription control 16
- m 7 G(5')ppp(5')N 1
 mechanism for recombination 179, 180
 mechanism of splicing 64
 signals 64
 consensus sequences 65
 components 67
 small nuclear RNAs 68
- messenger RNA
 monocistronic character 96-98
 ribosome-protected fragments 85, 95,
 100, 102
 secondary structure 92, 93, 99, 107
 5' cap (see translation)
 5' terminal heterogeneity 84, 88, 104
 poly(A) tail, role in translation 108
 differences between viral and cellular
 88, 108-109
 5'-linked protein 109
 denaturation 92, 92, 99, 103, 106-107
 fragmentation 92, 93, 94, 100
 6-methyladenosine 144
 methylated cap 126
 2'-O-methyl group 128
 mRNA capping 2
 cap binding protein 2
 enzyme activities 2
 steps involved 2
 mRNA structure 48
 translated sequences 48
- Nucleus 145
 primary transcription site 146
 cellular transcription 146
- Origin of DI RNAs 170
 host cell effects 170
 origin of viral DNA replication 10
 BK 10
 papovaviruses 10
 polyoma 10
 T antigen binding sites 10
- Papovavirus early mRNA 56
 parvoviruses 63
 RNA species 63
 AAV genome 63
- picornaviruses 168
 poliovirus 168
 mengovirus 168
 poliovirus 97-98, 100, 105, 108, 109
 poly(A) tail on mRNA
 role in translation 108
 polyoma late mRNA 62
 3'-coterminal family 62
 heterogeneous 5'-terminal leader 62
 polymerase II control region 33
 TATAA box 33
 5'-flanking regions 34
 conserved sequences 34
 polymerase II in vivo 37
 initiation 37
 regulatory polypeptides 38
 polymerase III control regions 26
 polyoma 50
 early region 50
 small T antigen 50
 middle T antigen 50
 large T antigen 50
 posttranscriptional processing 47
 primer RNAs 127

- priming, mechanism of 129
 - hydrogen bonding 129
 - capped ribopolymers 129
 - dinucleotides 131
- protein synthesis (see translation)
- provirus hypothesis 173
- psoralen 92

- Regulation of early SV 40 transcription 13
 - autoregulation 16
 - in vitro system 14
 - RNA polymerase II promoter 14
 - run off products 14
 - T antigen as repressor 13
 - TATA box 14
- reovirus 92-95, 100, 107-109
- replication of DI RNAs 181
 - host cell modulation 181
- retrovirus proviral DNA 59
 - mRNA species 60
 - long terminal repeats 60
 - 5'-terminal leader 61
- ribosomal RNA
 - complementarity to messenger RNA 81, 92-93
- ribosome binding sites in mRNA 85
- ribosomes 81
 - protection of initiation sites in mRNA 85, 95, 100, 102
- RNA polymerase II 31, 126
 - heterogeneous nuclear RNA 31
 - initiation sites 31
 - cap sites 31
 - cell-free transcription 32
- RNA polymerase III 26
 - cell free transcription 26
- RNA virus persistence 155
- Rous sarcoma virus 94, 102, 104

- 7S ribonucleoprotein complex 30
- scanning mechanism for translational initiation 91, 94-99
 - messages in which initiation is not limited to first AUG 101-102
 - relaxed scanning mechanism 103
- semliki forest virus 101, 102
- sendai 163
- silkworm tRNA ala gene 30
- simian virus 40 5, 92, 99, 102-104
 - agnoprotein 103
 - gene regulation 5
 - lytic infection 5
 - replication 5
 - transcription 5, 36
- snap-back hairpin molecules 159, 161

- sparsomycin 95, 100
- splice junctions 65, 67, 69, 70
- spliced viral mRNA 47
 - structure 47
 - synthesis 47
 - processing patterns 47
 - leaders 47
- SV 40 A gene 6
- SV 40 early mRNA 48
 - small T antigen 48
 - large T antigen 48
- SV 40 late mRNA 61
 - multiple leaders 62
- SV 40 transcription 36
 - control regions 36
 - deletion mutants 36

- Terminal sequence complementarity 159
 - stem molecules 159
- tobacco mosaic virus 89, 95
- togaviruses 165
 - Sindbis 165
 - Semliki Forest 165
- transfer RNA, initiator species 91, 95, 107
- transformation, virally induced 6
- transcription in vitro 139
 - cleavage 139
 - initiation 139
 - elongation 139
 - GpppG 140
 - viral cores 140
- translation in eukaryotes 81-123
 - initiation factors 106
 - role of 5'-terminal cap 85, 92, 94, 106
 - synthetic ribopolymers 91, 92, 94, 95
 - efficiency 92, 99, 106-108
 - differences between prokaryotes and eukaryotes 81, 89-91
 - using prokaryotic mRNA 98
 - shut-off of host protein synthesis 108-109
- U1 RNA 68, 69
- 5'-untranslated leader sequences in mRNA 82-91
 - length 85, 88-89, 95, 101, 107
 - composition 88-89
 - (occurrence of) terminator codons 90, 102, 103
 - nucleotides flanking initiator codon 89, 90, 92, 96, 107-108
 - occurrence of introns 91
 - absence of AUG codons 91, 96
 - perturbations 96, 99

212 Subject Index

- Vaccinia virus 109
- VA-RNA 69, 70
- vesicular stomatitis DI RNAs 157
 - types of rearrangements 158
- vesicular stomatitis virus 89, 100, 105, 107-109
- viral DNA replication 18
 - mechanisms 18
 - unwinding proteins 19
 - cellular 53,000 dalton phosphoprotein 19
- virion-associated nuclease 131
 - endonuclease 135
 - cap-dependent 135
 - cleavage products 135
 - purines 137
- Xenopus 5S RNA gene 27
 - 37K dalton polypeptide 27
- Yeast cytochrome c mutants 93, 96, 99, 108

Of Further Interest from this Series

Volume 86

1979. 29 figures, 22 tables. III, 168 pages
ISBN 3-540-09432-6

Contents: H.L. Bishop: Genetic Potential of Bunyaviruses. – V. Stollar: Defective Interfering Particles of Togaviruses. – P. Jolicoeur: The Fv-1 Gene of the Mouse and its Control of Murine Leukemia Virus Replication. – M.E. Reichmann, W.M. Schnitzlein: Defective Interfering Particles of Rhabdoviruses.

Volume 87

1979. 24 figures, 13 tables. III, 172 pages
ISBN 3-540-09433-4

Contents: A. Graessmann, M. Graessmann, C. Müller: Simian Virus 40 and Polyoma Virus Gene Expression Explored by the Microinjection Technique. – J.M. Taylor: DNA Intermediates of Avian RNA Tumor Viruses. – P. Lebowitz, S.M. Weissmann: Organization and Transcription of the Simian Virus 40 Genome.

Volume 88

1979. 25 figures (one in color), 15 tables.
III, 142 pages
ISBN 3-540-09415-6

Contents: W. Heumann: Rhizobium lupini Genetics. – R.G.Q. Leslie, M.D. Alexander: Cytophilic Antibodies. – M. Bustin: Immunological Approaches to Chromatin and Chromosome Structure and Function.

Volume 89

D. W. Weiss:

Tumor Antigenicity and Approaches to Tumor Immunotherapy

1980. IX, 83 pages
ISBN 3-540-09789-9

Contents: Tumor-Associated Antigenicity and Host Responsiveness: Basic Questions and Considerations. – Tumor Etiology and Antigenicity. – Approaches to Immunotherapy.

Volume 90

1980. 32 figures, 17 tables. III, 147 pages
ISBN 3-540-10181-0

Contents: J.H. Miller: Genetic Analysis of the lac Repressor. – H.-D. Klenk, R. Rott: Cotranslational and Posttranslational Processing of Viral Glycoproteins. – J. Rothman Scott: Immunity and Repression in Bacteriophages P1 and P7. – B. Norrild: Immunochemistry of Herpes Simplex Virus Glycoproteins. – H. Becht: Infectious Bursal Disease Virus. – D. Mergenhagen: Circadian Rhythms in Unicellular Organisms.

Volume 91

1981. Approx. 96 figures. Approx. 260 pages
ISBN 3-540-10722-3

Contents: B.N. Fields: Genetics of Reovirus. – R.L. Erikson: The Transforming Protein of Avian Sarcoma Viruses and Its Homologue in Normal Cells. – D.H. Spector: Gene-Specific Probes for Avian Retroviruses. – T. Ben-Porat: Replication of Herpes Virus DNA. – G. Wick, R. Boyd, L. de Carvalho, R.K. Cole, K. Hála, R. Kofler, P.U. Müller: The Obese Strain (OS) of Chicken with Spontaneous Autoimmune Thyroiditis: Review of the Recent Data. – H. Kleinkauf, H. von Döhren: Nucleic Acid-independent Synthesis of Peptides. – P.H. Kramer: The T-Cell Receptor Problem. – W.S. Hayward, B.G. Neel: Retroviral Gene Expression.

Volume 92

Natural Resistance to Tumors and Viruses

Editor: O. Haller

1981. 23 figures, approx. 28 tables.
Approx. 150 pages
ISBN 3-540-10732-0

Contents: M.A. Brinton: Genetically Controlled Resistance to Flavivirus and Lactate-Dehydrogenase-Elevating Virus. – C. Lopez: Resistance to Herpes Simplex Virus-Type 1 (HSV-1). – O. Haller: Inborn Resistance of Mice to Orthomyxovirus. – J.-L. Virelizier: Role of Macrophages and Interferon in Natural Resistance to Mouse Hepatitis Virus Infection. – V. Kumar, M. Bennett: Genetic Resistance to Friend Virus-Induced Erythroleukemia and Immunosuppression. – R.M. Welsh: Natural Cell-Mediated Immunity During Viral Infections. – R. Kiessling, H. Wigzell: Surveillance of Primitive Cells by Natural Killer Cells.

Springer-Verlag Berlin Heidelberg New York

Reviews of Physiology, Biochemistry and Pharmacology

Editors: R.H. Adrian, H. zur Hausen,
E. Helmreich, H. Holzer, R. Jung, O. Krayer,
R.J. Linden, P.A. Miescher, J. Piiper,
H. Rasmussen, A.E. Renold, U. Trendelenburg,
K. Ullrich, W. Vogt, A. Weber

Volume 83

1978. 45 figures, 15 tables. IV, 196 pages
ISBN 3-540-08907-1

Contents: E. M. Wright: Transport Processes in the Formation of the Cerebrospinal Fluid. - L. B. Cohen, B. M. Salzberg: Optical Measurement of Membrane Potential. - L. Glaser: Cell-Cell Adhesion Studies with Embryonal and Cultured Cells. - P. Propping: Pharmacogenetics.

Volume 84

1978. 23 figures, 2 tables. III, 240 pages
ISBN 3-540-08984-5

Contents: H. P. Godfrey, P. G. H. Gell: Cellular and Molecular Events in the Delayed-Onset Hypersensitivities. - E. Wintersberger: DNA Replication in Eukaryotes. - H. Z. Movat: The Kinin System: Its Relation to Blood Coagulation, Fibrinolysis and the Formed Elements of the Blood.

Volume 85

1979. 64 figures, 7 tables. III, 231 pages (58 pages in German).
ISBN 3-540-09225-0

Contents: M. Lindauer: Orientierung der Tiere in Raum und Zeit. - U. E. Nydegger: Biologic Properties and Detection of Immune Complexes in Animal and Human Pathology. - S. Matern, W. Gerok: Pathophysiology of the Enterohepatic Circulation of Bile Acids.

Springer-Verlag
Berlin
Heidelberg
New York

Volume 86

1979. 44 figures, 3 tables. III, 206 pages
ISBN 3-540-09488-1

Contents: P. Thorén: Role of Cardiac Vagal C-Fibers in Cardiovascular Control. - R. J. Hogg, J. P. Kokko: Renal Countercurrent Multiplication System. - P. Scheid: Mechanisms of Gas Exchange in Bird Lungs.

Volume 87

1980. 26 figures, 6 tables. V, 232 pages (8 pages in German).
ISBN 3-540-09944-1

Contents: G. Moruzzi: In Memoriam Lord Adrian. - D. E. W. Trincker: Wilhelm Steinhäusen. - U. Trendelenburg: A Kinetic Analysis of the Extraneuronal Uptake and Metabolism of Catecholamines. - J. T. Fitzsimons: Angiotensin Stimulation of the Central Nervous System. - L. D. Strawser, O. Touster: The Cellular Processing of Lysosomal Enzymes and Related Proteins.

Volume 88

1981. 29 figures. V, 264 pages (23 pages in German)
ISBN 3-540-10408-9

Contents: R. Jung: Walter R. Hess 1881-1973. - K. M. Spyer: Neural Organisation and Control of the Baroreceptor Reflex. - M. Haider, E. Groll-Knapp, J. A. Ganglberger: Event-Related Slow (DC) Potentials in the Human Brain. - K. Starke: α -Adrenoceptor Subclassification.

Volume 89

1981. 39 figures. V, 254 pages
ISBN 3-540-10495-X

Contents: E. H. Heinz: Walter Wildbrandt. - P. D. Snashall, J. M. B. Hughes: Lung Water Balance. - D. D. Bikle, R. L. Morrissey, D. T. Zolock, H. H. Rasmussen: The Intestinal Response to Vitamin D. - P. E. di Prampero: Energetics of Muscular Exercise.

Volume 90

1981. 31 figures, approx. 32 tables.
Approx. 300 pages
ISBN 3-540-10657-X

Contents: K. Decker: Feodor Lynen (1911-1979) - A. B. Borle: Control, Modulation, and Regulation of Cell Calcium - Z. S. Agus, S. Goldfarb, A. Wasserstein: Calcium Transport in the Kidney - M. E. Schläefke: Central Chemosensitivity: A Respiratory Drive
