

Subject Index

- adeno-associated virus (AAV) 150
 - helper effect 150ff., 157, 163
 - - -, role of E1A + E1B 151ff.
 - - -, role of E2A 157f.
 - - -, role of E4 158ff.
- adenovirus(es)
- adenovirus assembly 30
 - as tool in fundamental biological research 107
 - capsid protein 23
 - classification of 4
 - core 5, 7
 - DNA 54ff., 75ff., 193ff.
 - - integration, model of 211
 - DNA, packaging of 8
 - - polymerase 57ff., 61
 - - replication 54ff., 67, 77, 96
 - - -, origin of 75ff., 82
 - fiber 3, 17ff.
 - gene regulation 147ff.
 - genes, in vitro transcription 125ff.
 - genome 7, 28
 - -, genetic organization of 171ff.
 - hexagon 5
 - hexon 2ff., 11, 13ff., 31
 - highly oncogenic (Ad 12) 118
 - icosahedron 2
 - -induced tumors 194ff.
 - mutants 117f.
 - nononcogenic 118
 - nucleoproteins 7
 - penton 2ff., 20, 31f.
 - structure 1ff.
 - system 76ff.
 - transformation 116f.
 - transformed cell lines 194ff.
 - transforming gene 175ff.
 - - proteins 187
 - - region of human 108, 118
 - 2 E1 region, organization of 178f.
 - weakly oncogenic (Ad 7) 118
- agnoprotein 174
- antibodies 169ff., 171ff., 178ff.
 - , anti-peptide 169ff., 178ff.
 - , monoclonal 16
 - technology, synthetic peptide 169f.
 - to synthetic peptides 167ff.
- antigen(s) 15f., 115ff., 152
 - , AAV 152
 - , major structural protein 15f.
 - , T 115ff.
 - , -, region E1A 115f.
 - , -, region E1B 116
- antigenic determinant β 21
 - specificity 15
- aphidicolin 60
- arginine, catalytic amounts 37
- assembly arrest 37
 - pathway for adenoviruses 40
- ATP dependency 60
- bacteriophage Φ 29 (from *Bacillus subtilis*) 89ff.
 - - - DNA 89ff., 92
 - - - -, circularization of 90
 - - - -, initiation of replication 96, 103
 - - - -, map of 93
 - - - - -protein p 3 complex 91
 - - - - replication, mechanism of 90, 95ff.
 - - - -, replicative intermediates 95f.
 - - -, mechanism for initiation of replication 102f.
- calcium phosphate coprecipitation technique 108
- capsid 6, 9ff., 23ff., 32ff.
 - , adenovirus, structure 23
 - , -, components 24
 - , formation of empty 32ff.
 - , organization of virus 6
 - proteins, major 9ff.
- cap site 128
- capsomer(s) 2, 30
 - , assembly of 30
- cell lines 194ff.
 - -, adenovirus-transformed 194, 196
 - -, BHK268-C31 212
 - -, F4 203
 - -, 5RK20 213
 - -, HA 12/7 217
 - -, HE5 205ff.

- cell lines, T637 218ff.
 – –, tumor 194ff.
 – –, CLAC1 208ff.
 – –, CLAC3 203f.
- cellular growth control 175
 – sequence(s) at junction sites 219
- chain elongation 60ff.
 – –, DNA 60ff.
 – –, –, role of TP and pTP in 62ff.
 – –, –, role of DBP in 62
- cleavage, proteolytic 36
- cloned sequences of the adenovirus origin
 plasmids containing 81
- cloning vector pBR322 220
- computer-aided analysis 219
- core (adenovirus) 5, 7, 22f.
 – proteins 22f.
 – protein μ 9,
 – –, basic 22
 –, sarcosyl-generated 28
 –, spherical subunits of the 28
- cosmids 36
- cross-linking studies 28
- cruciform structure 217
- crystallography, X-ray 4
- cytopathic effect 21
- DRB (5,6-dichloro-1- β -D-xibofuranosyl-
 benzimidazole)
 – affects initiation of transcription
 135f.
 –, mechanism of action 131f.
 – -resistant cell mutants 137f.
- DBP (DNA-binding-protein) 54
 –, distinct domains 66
 –, in elongation, role of 62
 –, relation between structure and function of
 65ff.
- DNA, adenovirus 54ff., 75ff., 193ff.
 –, arms of λ vector 198
 – -binding protein DBP 54
 –, cellular 28ff., 193ff.
 –, chain elongation 60ff.
 –, circular viral 197
 –, human Hinf 215
 – hybridization 202
 –, insertion of viral 34ff., 197
 – integration, model of adenovirus 211
 –, plasmid 80ff.
 – polymerase 57, 77f.
 – – α 60
 – –, functions of the adenovirus 57
 – -protein complexes 80
 – replication 54ff., 75ff., 203ff.
 –, structural organization of 28ff.
- displacement synthesis 69
- dyad symmetry 204, 207
- elongation, chain 60f., 62ff.
 – steps 69
 –, strand 69
- empty capsids, formation of 32ff.
- endonuclease activity 21
 – VII 218
- exonuclease III 29
- fiber(s) (adenovirus) 3, 17ff.
 –, biochemistry of 17ff.
 –, dimers of 7
 –, immunology of 18
 –, trimeric 17
 –, type-specific determinant γ of the 18
- gene(s), adenovirus transforming 175ff.
 –, early viral 171ff.
 – expression, early 177
 – –, late 177
 – 4 of Φ 29, nucleotide sequence 94
 –, late viral 174ff.
 – regulation, adenovirus 147ff.
 –, RNA polymerase III-transcribed VA
 RNA 126
 – 3 of Φ 29, nucleotide sequence 93ff.
 –, transcription of adenovirus 125ff.
 –, transforming, of human adenoviruses
 167ff.
- genome, adenoviral 195
 –, adenovirus 171f., 215
 –, integrated viral 197
 – of human adenoviruses, replication of 53
- glycoprotein 18
- Goldberg-Hogness consensus sequences 127
- hemagglutination 19
- hexagon (adenovirus) 5
- hexon (adenovirus) 2ff., 11, 13ff., 31
 –, peripentonal 24
 –, primary structure of Ad2 13
 –, slowly migrating 16
 – units, nonameric 27
- Hinf DNA family, human 215
- homologies, patch 203ff., 209, 211, 215, 219,
 223
 –, patchy 197
- host cell protein 78
- hybridization, DNA 202
- icosahedral shell 3
- i-leader, Ad2 174
- immunoprecipitation 186
- initiation complex 97
 – – (protein p3-dAMP) 97
 –, enzymology of 56ff.
- , functions of the adenovirus DNA polymer-
 ase in 57

- , mechanism and enzymology of 56ff.
- of adenovirus DNA replication 96
- - - replication, host cell proteins in 78
- - DNA replication 75
- - Φ 29 DNA replication 96
- - Φ 29, DNA replication, mechanism for 102f.
- - transcription 130
- , proteins involved in 58, 99ff.
- proteins p 3 and p 2, overproduction and purification 100ff.
- reaction 56
- , role of pTP in 56f.
- , site of transcription 128ff.
- insertion, foreign (viral) DNA 197
- , mode of 195
- of nucleotides of unknown origin 224
- integration, model of adenovirus DNA 211
- of bacteriophage λ DNA 224
- , patterns of 195
- intermediates in assembly 38ff.
- , replicative 53, 60
- , -, of Φ 29 DNA 95ff.
- intervening sequences 110

- junction fragment 199
- junction site(s) 201
- -, internal viral 207
- , sequences, cloning of 199
- -, comparison of 221f.
- -, structure of 193ff.

- lambda DNA replication 76
- O protein 76
- l-strand 29

- mammalian cells, transformed 185ff.
- -, DNA insertion in 197
- microinjection technique 149, 161
- mutant(s), adenovirus 117f., 183ff.
- , cell 137f.
- , E1 117
- H5ts125 157
- , ts 36
- mutagenesis of cloned origin 83
- of gene 3 101f.
- , region-specific point 140
- , site-directed 59

- nucleotide sequence 203, 210
- - at the end of Φ 29 DNA 92f.
- - of gene 3 and gene 4 93ff.
- nucleotides of unknown origin, insertion of 224
- nucleocapsid 2ff., 8
- , organization of 8
- off-size fragments 198
- oncogenic adenoviruses \rightarrow adenovirus
 - oncogenic subgroups 118f.
- open reading frames 221
- organization of Ad2 E1 region 178f.
- of the DNA, structural 28ff.
- origin sequence 75

- packaging of adenovirus DNA 8
- signal 35f.
- palindromic sequences 218
- parvovirus 150
- patch homologies \rightarrow homologies
- penton (adenovirus) 2ff., 20f., 31f.
- hexon interaction 6
- base 21, 32
- peptide 23
- , synthetic 169ff.
- , -, antibody 168
- , -, antibody technology 169ff.
- permissivity 195
- plasmid containing, cloned sequences of the adenovirus origin 81
- plasmid DNA \rightarrow DNA
- polymerase, adenovirus DNA 57
- polypeptide V 23
- IIIa 23
- VIII 25
- IX 25, 112, 120
- posttranslational modifications 18
- precursor 25, 30, 56f., 77
- promoter, major late 126
- protein III 23
- VI 24
- VII 23
- VIII 25
- IX 25
- IX mRNA, transcription of adenovirus 134
- X-XII 26
- , Ad-coded early 168
- , adenovirus-transforming 187ff.
- , characterization of replication 53ff.
- composition 8f.
- , core 7, 22
- , covalently bound 56
- , cross-linkage of 27
- , early 172
- , E1A and E1B 176
- , E1A-encoded 185
- gene 100K, 31
- , lambda O 76
- , major capsid 9ff.
- , molecular characterization of 178ff.
- , multifunctional 65
- , neighbor analysis 26ff.
- , precursor 30

- protein precursor, terminal 56f., 77
 – -priming mechanism 76
 – -protein interaction 90
 – p3 and p2 100
 –, replication 76
 –, scaffolding 31, 33
 –, terminal 29, 77, 89ff.
 –, virion 23
 protein kinase 9
 proteolytic cleavage 36f.
- recombinant DNA technology 59
 recombination between adenoviral and cellular DNAs 193ff.
 recombination event, invasive 211
 region E1, early 175
 – – expression, kinetics of 113f.
 repetition, inverted 69
 –, – terminal 78ff.
 replication, adenovirus DNA 53ff., 75ff., 80ff., 95ff.
 –, defective DNA 35
 –, host cell protein in initiation of adenovirus 78
 –, in vitro 59
 –, nature of origin of 58
 – of Φ 29 DNA 95ff.
 – of the genome of human adenoviruses 53
 – origins 75, 92
 – proteins 76
 restriction map 209
 revertants, morphological 196, 218
 RNA capping and methylation 128
 –, messenger 109ff., 114f., 134f.
 –, –, nonsequential splicing of 114f.
 –, –, transcription of adenovirus protein IX 134f.
 – splicing pathways 114
 r-strand 29
- sequencing technique, Maxam and Gilbert 200
 splicing of E1A mRNAs 114f.
 stemmed loop 204
 structural peculiarities 220
 symmetric recombinant (SYREC) 200f., 213
- TATA box 139ff.
 – motif 111
- terminal adenoviral nucleotides, deletion of 206
 terminal protein (TP) 29, 54ff., 56, 77, 89ff., 93f.
 – –, adenovirus DNA replication in vitro with DNA- 54ff.
 – – of Φ 29 89ff.
 – –, precursor (pTP) 56f., 77, 172
 terminal repetition, inverted 29, 78ff., 92
 – –, –, structure of 79
 terminal viral protein 223
 ternary complexes, formation of 138f.
 transcription, effect of DRB on in vitro 130ff.
 – initiation, mechanism of 141ff.
 – –, site of 128ff., 218
 – of adenovirus protein IX mRNA 134f.
 – unit, early (E2B) 173
 – units 108
 transcriptional signals 139f.
 transformation, adenovirus 116f.
 transforming genes → genes
 transforming region 108, 112f.
 – – of human adenoviruses 108, 118
 – –, structure and gene products of the Ad 2 179
 tumor(s), adenovirus-induced 194, 215, 216f.
 tumor CBA-12-1-T 216f.
 – T1111(2) 215f.
- viral DNA 28ff., 34ff., 197
 – –, analysis of inserted 198
 – –, excision of amplified 218
 – –, insertion of 34ff.
 – gene(s) 171ff.
 – – expression, late 174
 – – function, early 167ff.
 – genome 197, 198ff., 215
 – nucleotides, deletions of 223
 – sequences, rearrangement and amplification of 225
 – –, integrated 112
 virion 2, 10, 23
 virion, architecture of 2
 – maturation 23, 36
 – proteins 23
 virus capsid, organization of 6
 – particles, incomplete 34

The Molecular Biology of Adenoviruses 2

**30 Years of Adenoviruses Research
1953-1983**

Edited by Walter Doerfler

1984. (Current Topics in Microbiology and
Immunology, Volume 110)
ISBN 3-540-13127-2. In preparation

Contents:

A. M. Lewis, Jr., J. L. Cook: The Interface between
Adenovirus-Transformed Cells and Cellular
Immune Response in the Challenged Host

A. van der Eb, R. Bernards: Transformation and
Oncogenicity by Adenoviruses

K. Fujinaga, K. Yoshida, T. Yamashita, Y. Shimizu:
Organization, Integration, and Transcription of
Transforming Genes of Oncogenic Human
Adenovirus Type 12 and 7

H. van Ormondt, F. Galibert: Nucleotide Se-
quences of Adenovirus DNAs

A. J. Levine: The Adenovirus Early Proteins

T. I. Tikchonenko: Molecular Biology of S16
(SA7) and Some Other Simian Adenoviruses

G. Wadell: Molecular Epidemiology of Adeno-
viruses

B. R. Freifeld, J. H. Lichy, J. Field,

R. M. Gronostajski, R. A. Guggenheimer,

M. D. Krevolin, Kyosuke Nagata, J. Hurwitz,

M. S. Horwitz: The In Vitro Replication of Adeno-
virus DNA

Springer-Verlag
Berlin
Heidelberg
New York
Tokyo

The Molecular Biology of Adenoviruses 3

Edited by Walter Doerfler

1984. (Current Topics in Microbiology and
Immunology, Volume 111)
ISBN 3-540-13138-8
In preparation

Contents:

T. Shenk and J. Williams: Genetic Analysis of
Adenoviruses

J. Fütterer and E.-L. Winnacker: Adenovirus
DNA Replication

E. I. Frolova and E. S. Zalmanzon: A Study of
Viral Genomes in Cells Transformed by the
Nononcogenic Human Adenovirus Type 5
and Highly Oncogenic Bovine Adenovirus
Type 3

H. Esche, M. Reuther, and K. Schughart: The
Early and Late Proteins of Adenovirus Type
12: Translation Mapping with RNA Isolated
from Infected and Transformed Cells.

T. Grodzicker: Expression of Foreign Genes
Using Adenovirus Controlling Elements

Springer-Verlag
Berlin
Heidelberg
New York
Tokyo
