

Subject Index

- Acetyl coenzyme A 62
Acetylcholine (ACh) 14, 61, 62, 65, 66, 67,
77, 79, 89, 91, 103
 catabolism 64
 function 65
 levels 64
 receptor 64
 synthesis 62–100
Acetylcholinesterase (AChE) 64
 activity 114
Acetylsalicylic acid 182, 184, 205–211, 214
Acuphenometry 52
Adenosine 154
Adenylate cyclase 70, 82
 α -Adrenergic antagonist 133–145
Adrenocorticotrophic hormone (ACTH) 82,
83
Aging, biological 4
 cerebral 3, 4
 chronological 4
 physiological 4
Alanine 81
 alpha-1 adrenoceptors 161
 alpha-1 blocking activity 225
Alzheimer, dementia
 see Alzheimer's disease
Alzheimer's disease 3, 4, 52, 57, 64–66, 79,
85, 89, 117, 238
Amino acid 80
 neurotransmitters 81
 γ -Aminobutyric acid (GABA) 61, 78–80, 89,
92, 161
 catabolism 79
 function 80
 levels 79
 receptors 80
 synthesis 77
Ancrod 153, 155
Angiography 22
Anoxia 187, 192
Antibiotic 4, 197, 202
Anticoagulants 19
Anti-hypoxic drugs 38, 40
Antiplatelet drugs 19
Apomorphine 70
Arachidonic acid 230
Archimedes spiral 26, 34
Arecoline 65
Aromatic amino acid decarboxylase (DOPA-
 decarboxylase) 66, 67, 71, 74
Arrhythmias 21, 142
Arteriosclerosis 173
Arteritics 227, 229
Arteritis 209
Artial disease 51
Aspartate 80
Aspartic acid 78, 81, 92
Aspirin 19
Batroxobin 153
Benzodiazepines 43, 80
Beta-blocker 145
Biogenic amines 105
Blast 190–192
Bombesin 86
Brain syndrome, psycho-organic 51, 53–56,
58
Brain syndrome, organic (see brain syndrome,
 psycho organic) 51, 52
Bronchpneumonia 6
Butyrylcholinesterase 64
Calcium antagonists 38
cAMP 69, 70, 73, 74
Carbon dioxide tension, intramyocardial
 142
Cardiac glycosides 38
 infarction 194
Cardio-glycosides 39
Cardio-steroids 38, 39
Cardiotonics 4
Carotid stenosis 21
CAT
 see choline-acetyl-transferase
Catecholamines (CAs) 66, 68, 103, 104, 106
Catechol-O-methyl transferase (COMT) 68,
69
Cerebral infarction 21
Cerulein 86
CFF see flicker fusion, critical 26

- Cholecystokinin octapeptide 86
 Choline 7, 62, 64–67
 Choline acetyl-transferase (CAT) 7, 62, 64, 67
 inhibitors 7
 lowering 7
 Citrate synthase 114, 115, 116
 Claudicatio intermittens 159, 227
 Compliance 5, 248, 252
 Coronary artery occlusion 133–145
 Corticosteroid 197, 202
 Cytochrome oxidase 114–116
- Deafness, cochlear 187, 188, 192
 idiopathic 188
 sudden 188, 190, 191
 Defibrination 153
 Degeneration of the retina 196
 Dehydration 6
 Dementia, multiple infarction 57, 79, 117, 238
 senile 45, 48, 57, 63, 65, 103, 161, 218
 secondary 52
 Depression 6
 endogenous 5
 Diabetes mellitus 158
 Dihydroergotoxine 107–109
 Dihydroxyphenylalanine (DOPA) 66, 68
 Dipryridamol 182
 Disorders, cardiac 52
 chronic cerebrovascular 57
 cochlear 58
 metabolic 52
 renal 52
 vestibular 58
 Disturbances, mnestic 7
 Diuretics 4
 Dizziness 236–239, 242, 244, 247, 248
 DOPA 66
 Dopamine (DA) 59, 61, 66–68, 70–76, 79, 88, 89, 91, 103, 104, 107–109
 catabolism 68
 function 69
 levels 68, 69
 receptors 69, 70
 synthesis 66
 Dopamin- β -hydroxylase (DBH) 72
- EEG 14, 25, 27, 37, 38, 40, 42–48, 205–214, 216–219, 235
 resting 28–31
 vigilance-controlled 26–29
 Electronystagmography 52
 Eledoisin 86
 Emergencies, cochlear 187, 191, 192
 Endorphin 82–84, 89, 91, 119
 Enkephalin 82–84
- Ergoline derivatives 103–109
 Erythrocyte, deformability (see red-cell deformability)
 filterability (see red-cell, filterability)
 Ethamivan 38
 Ethophyllin 38
- Fever 6
 Fibrinogen 151, 153, 155, 159
 Fine-motor movements test 26, 34
 Flicker, critical 34
 Flicker fusion, critical 26, 39, 40, 196
 numerical 26
 Fluorescenceangiography 202
 Fusion, critical 34
- Gastric inhibitory peptide (GIP) 86
 Gastrin 86
 Geriatric drugs 7
 Glaucoma 199, 200
 Glutamate 77, 80, 81, 82
 dehydrogenase 81, 114, 115, 116
 Glutamic acid 78, 92
 acidemia 81
 Glutamin acid decarboxylase (GAD) 78–80
 Glycine 80, 81
- Haematocrit 153, 157, 159, 161, 162, 169
 Haemoderivatives 38
 Haemodilution 153
 Haemorrhology 149–183
 Haemostasiology 149–183
 Hallucinogens 119
 Hamilton rating scale 52, 56, 57, 210, 219, 220
 Histamine 82
 Huntington's disease 89
 Hydergin 38
 Hypertension 20, 52, 133, 144, 158
 Hypertonus, extrapyramidal 51
 Hypoacusis 189
 Hypomania 5
 Hypotension, orthostatic 52
 Hypotensives 4
 Hypoxaemia 235
 Hypoxia 111–118, 207
- Idiopathic 187, 192
 Impaired brain function 235–247
 Infections 6
 Insufficiency, vascular 160 -
 Insult, apoplectic 205, 207
 ischaemic 205, 208
 Intra-ocular pressure 200
 Ischemia, cerebral 17, 19, 20
 coresvale 103
 Ischaemic score 46

- Lactat 226
 Lecithin 7, 66
 Leucine 104, 108, 109
 incorporation 119, 120, 122, 124, 126
 Lipofuscin 88
 Lipotropin 82
 Luteinizing hormone (LH) 70, 74

 Macroglobulinaemia 153
 Malate dehydrogenase 115
 Maleicdehydrogenase 14
 Maze recall 63
 Melanocyte-stimulating hormone (MSH) 82, 83
 Memory test, numerical 26
 Microangiopathies 213
 Monoamine oxidase (MAO) 68, 69, 72, 75–77
 Monoamines 77
 Multiple sclerosis 194
 Muscarinic binding 65
 Myocardial blood flow 135, 141
 Myocardial infarction 19, 21, 144, 194
 acute 133
 Myocardial ischaemia, acute 133

 NAD-cytochrome-C reductase 14, 114
 N-Aminobutyric acid (GABA) 77
 Neuropeptides 92
 Neurorehabilitation 215, 216, 218, 219
 Neurotensin 85, 86
 Neurotransmitters 14, 48, 61, 70, 74, 77, 79, 80, 83, 85, 252
 alterations 61–91
 changes 89
 metabolism 59, 87, 102
 receptors 105
 research 59–102
 Neurotransmittersystems, aging of 61–91
 Nicotinic cholinergic, receptors 65
 Noradrenaline 104, 105, 107–109
 Norepinephrine (NE) 61, 70–76, 79, 88, 89, 91
 agonists 73
 catabolism 72
 function 73
 levels 72
 receptors 73
 synthesis 71
 Nosology, psychogeriatric 5, 11
 Nucleus basalis of Meynert 7

 Opiate peptides, catabolism 84
 function 84
 receptors 84
 Opioid peptides 61, 82, 84, 85
 levels 83
 synthesis 83

 Parkinsonism (see Parkinson's disease)
 Parkinson's disease 68, 69, 89
 Pentoxifylline 154, 155, 172
 Peptide neurotransmitters 85
 Peripheral obliterative arterial disease (POAD) 159–161
 Pharmacokinetics, geriatric 6
 Phasalaemin 86
 Phentolamine 132, 142, 228, 229
 Phenylephrine 140
 Physostigmine 7, 65
 Piracetam 66
 Plasma viscosity 151, 153, 157, 159, 161, 162
 Platelet aggregation 173, 175, 177, 181–183, 207, 211, 229, 230, 235
 Plethysmography 161
 Polycythaemia 153, 157, 193, 209
 Polymorbidity 4, 11
 Post-mortem change 90
 Prazosin 133, 142, 147, 166
 Pressure injury 188, 190, 191, 192
 Prolactin 70
 Pseudo dementia, depressive 5
 Pseudobulbar symptoms 51
 Psychosis, delirious 6
 P-TIA 17–19
 Pyridoxine 38
 Pyrrolidine derivative 38
 Pyruvate dehydrogenase 114

 Quinuclidinyl benzilate (QNB) 64

 Re-adaptation 3, 11
 Red-cell, aggregation 151–153
 deformability 151–154, 157, 169–171, 173, 175, 177, 181–183
 filterability 169, 171, 173, 184
 Resting tremor 51
 Retinal degeneration 202
 Retinopathy 52
 RIA 18, 19, 21

 SCAG-scales 38, 39, 47, 57, 219, 239, 242, 243, 247, 250, 251
 Scales, bidimensional 9
 pluridimensional 9
 unidimensional 9
 Schizophrenia, paranoid 5
 Scopolamine 65
 SDAT
 see Alzheimer's disease 3–7
 Secretin 86
 Serotonin (5-HT) 61, 74–77, 92, 104, 107, 108, 119
 catabolism 75
 function 77
 levels 75

- Serotonin (5-HT), receptors 76
 synthesis 74
 Sickle-cell anaemia 154
 Somatostatin 85
 Sound injury 192
 acute 188, 190, 191
 Streptokinase 153
 Stroke 52
 Substance P 85, 86
 Succinate dehydrogenase 14
 Syndromes, psychoorganic 5
- Tachycardia 230
 ventricular 139, 140, 142–144
 Taurine 80–82
 Tests, psychological 9
 visuomotor 237
 Thrombocyte aggregation 184, 195, 201,
 206, 207
 TIA
 see transitory ischaemic attacks
 TIA-IR 17–19
 Tinnitus 58, 189, 236, 238, 239, 242, 244, 248
 Transitory ischaemic attacks (TIA) 17,
 19–21, 203, 205–209, 211–214
 high risk 17
 low risk 17
- Tryptophan 74
 hydroxylase 74
 Tyrosine 66
 hydroxylase 66, 67, 71, 72
- Urinary infections 6
 Urokinase 153
- Vasoactive intestinal polypeptide (VIP) 85,
 86
 Vasopressin 85–87
 Ventricular fibrillation 143, 144
 Vigilance 25, 26, 42–44, 194, 208, 210–212,
 214, 235
 increased 25
 promoting 25
 promotion of 39
 Visuomotor coordination 236
 tests 243, 245
- Wellbeing scale 208
 Whole blood filterability 159, 161–163
 filtration 169
 viscosity 153, 159, 161–163
- Xanthine derivative 38
- von Zerssen, wellbeing-scales 26, 35
