

Index

A. polyphemus	66
A/D resolution	297
absorption	317
acetophenone	2,24,38,250
acetylcholine	183
across fiber patterns	22,25,202
action potentials	3
activation	251
activity profile	367
actuators	109
adaptation	1,19,78
adaptive filter,	389
adenylate cyclase	27,34,36,37,41,49,78
ADP	60
air pollution	110
amber	98
American cockroach	202,206,215
amiloride	2
amino acids	16,35,39
AMP	60
amperometric sensor	120
amphibians	22
amplifying role	240
amyl acetate	38
anatomical units	247
androstene receptor	27
anisole	2,24,98
anisole-binding protein	27
annelids	204
anosmia	21
antenna(e)	216,202,230,51,59
antennal lobe	201,229
anterior commissure	319
Antheraea pernyi	53,83
Antheraea polyphemus	39,53,83
aquatic odorants	39
array of photodiodes	317
array processors	298
arthropods	48
artificial neural network	168
artificial odour transducers	145
artificial olfactory system	131,164
aspartate	183
association fibers	320,321,324
ATP	60
autoradiography	185,186,208
axon collaterals	178,179,181,182,186,187

basal cells	51
bell pepper odor	46,55
benzaldehyd	2
beta-adrenergic receptor	192
beta-damascone	21
beverages	168
biccuculine	197
biochemistry of	
odorant reception	33
bombykal	60
bombykol	60
Bombyx	53,216
bovine OBP	129
breathing cycle	236
broad-spectrum responses	305
8-bromo-cAMP	3,13
bulbar layers	322
bulbar output cell(s)	248,254
bulbar reinnervation	260
bulbectomy, partial	260
bursting response	4
butylacetat	2
Ca ²⁺	37
Ca ²⁺ -current	9
Ca ²⁺ -dependent K ⁺ -channels	81
cAMP	10,36,37,42,45,49
camphor	2,25
camphor-binding protein	27
camphory odour	25
catfish barbels	91
cation conductances	46
CCD	296,318
cDNA libraries	38,40
central afferent fibers	182
central afferent fibers,	
neurotransmitter content	183
central afferent fibers,	
sources for	177,183,184
central afferent pathways	179
central pathways	184
centrifugal fibers	319
cGMP	10,37,41,45,78,81
chemoreceptor protein	40
chemoresistor	155
chemosensory maps	359
chloride channel	65
cholera toxin	41
cilia	35
ciliary knob	5
cineole	1,2,5,24,38,41,250
citral	2,41
clone	40
close cells	254
cluster separation	167
cockroach pheromone	79
coding of odours	214

coding	320
columnar organization of the bulb	249
Concanavalin A	10,39
conditioning	384
conducting polymers	149,155
conduction velocity	341
confocal microscopy	294,296,300
connectivity	315
conventional microscopy	294,298
convergence	254
convolution	366
cooperative activity	375
correlation coefficients	242,361
cross adaptation	29
crustaceans	204
CS+	376,388
CS-	376,388
cuticle	51
cyclohexanone	2,250
cycloketones	25
cymene	250
cytochrome P-450	51,61
d-carvone	25
DAG	50
degeneration process	365
degradative enzymes	64
dendrodendritic synapses	182,187
depolarization	310
descriptors	98
2-desoxyglucose	206,207,244,277,305,321
detector arrays	296
diacylglycerol (DAG)	37,78
dimension	254
dimensionality	21
diode array	334
diodes	115
discrimination of odours	215
discrimination	21,64
dissimilarity	361
DNA	42
dopamine	183,184,186,
<i>E. coli</i>	40
EEG patterns	382
EEG spatial pattern	376
EEG	375,376
electrical stimulations	194
electro-olfactogram	5,28,39,202,308
electrochemistry of conducting polymers	150
electronic nose	131
electronic noses, evolution of	144
electronic noses, history of	144
ensemble coding	321
epithelial chemotopy	28
ethylbutyrat	2

Euclidean distance	361
European corn borer	66
evoked field potential	197
excitation	254
excitatory response	253
external plexiform layer	177
extrinsic optical signals	291
factor analysis	168,361
fast inactivating	
potassium current	9
field effect transistors	116
fish	22
fluorescence	291,301,317
forskoline	16,37,42,49
frame frequency	293,296
frogs	239
functional columns	247
functional sub-units	321
G-protein(s)	34,36,37,40,43
gamma-aminobutyric acid (GABA)	183,208,211,214,312
gas sensors	112,155
GDP	43
general-odorant binding protein	54
generator current	20,36
geraniol	2
G_i	43
G_K	43
glia	205
glomerular activity patterns	359,361
glomerular afferences,	
functional homogeneity of	249
glomerular circuitry	208
glomerular images	370
glomerular layer	176
glomerular neuropil	177
glomerular projection	362
glomeruli	176,177,179-181,186,204,207, 208,215,249,254,320
glutamate	183
glycoproteins	27,39
G_o	43
G_{off}	44,45,49
gp95	39
granule cell layer	179
granule cells	177,179-184,186,187,208,278
graphics workstation	332
growth of connections	365
G_s	43,45
G_T	43
GTP	79,80
GTP-binding proteins	43,45,49
GTP-gamma-S	41
guanylate cyclase	37,41
heartbeat	323
Heliothis moths	229
Heliothis verescins	53

heptanol	24
heptanon	2
hexenal	79
hexenic acid	79
hippocampal brain slices	302
histamine	65
homogeneous semiconductor sensors	110
