

Subject Index

- accomodation 24
- activity
 - homeostatic control of 134
 - rhythm 127
- allogeneic MHC 32
- allograft(s)
 - rejection and delayed-type hypersensitivity 11
 - renal 64
 - unresponsiveness (tolerance) 57
 - – suppressor T-lymphocytes 11
- alloreactive repertoire 32
- allorecognition 30
- ALS-bone marrow model
 - dogs 63
 - mice 60
 - rhesus monkey 63
- angiogenesis 110, 112
 - of syngeneic islet grafts 112
- antibodies, natural 19, 20, 24
 - xenoreactive 20
- antigen(s)
 - antigen-binding groove 31
 - endogenous 31
 - gene, tumour-specific 33
 - minor H antigens 29, 31
 - protein, exogenous 31
 - tumour-specific 30
 - viral 31
- antilymphocyte serum, polyclonal 57
- arthritis 100
- autoimmune disease 33, 99, 100
 - with bone marrow grafts 99
- Billingham, Rupert 8–10, 13, 59
- body
 - temperature 129
 - weight 134
- bone marrow 67
 - donor-specific 57
 - grafts with autoimmune disease 99
 - transplantation 29, 95
- Brendel, Walter 1, 2, 7, 12, 17, 18, 25, 29, 35, 43, 75, 81, 95, 103, 129
- Burnett, MacFarlane 13
- caloric intake 134
- Canetti, Elias 127
- CD4⁺ T cells 31
- CD8 suppressor T cell, specific 89
- CD8-mediated T cell suppression 92
- CD8⁺ T cells 31
- Ceppellini, Ruggero 12
- chaffinches 127
- chimerism 67
 - red cell 15
- circadian 127
- class I MHC alloantigens 53
- clinical tolerance induction 57
- clocks 127
- clustering 38
- colorectal cancer 105
- complement 19
- conceptions 136
- concordant 18
- congenic mouse strains 29
- cyclosporin A 95, 122
- cytokeratin 18
- dark 128
- dendritic cell, follicular (FDCs) 36, 38
- deoxyspergualin, (\pm)-15- 122
- desynchronization, internal 130, 134
- diabetes mellitus 100, 109
 - insulin-dependent (IDDM) 46
- discordant 18
 - xenografts, transplantation 17
- donor-specific
 - antigen, unresponsiveness 59
 - bone marrow 57
 - unresponsiveness 92
- Ei jsvoogel, Vincent 12, 35
- endogenous
 - antigens 31

- peptides 30
- endothelial cell(s) 18, 21
- injury 122
- endothelium/Leukocyte adhesion 123
- entrained (synchronized) 127
- epithelial tumors, micrometastasis 103
- epitope linkage 35, 39
- exogenous protein antigens 31

- FDCs (follicular dendritic cells) 36, 38
- free-running rhythm 127

- galactosyl-ceramidase deficiency 99
- glomerulalike capillary network 116
- glycoproteins 20
- GvHD (graft-versus-host disease) 29, 67, 95, 96

- H antigens, minor 29, 31
- hamster dorsal skinfold chamber 110
- haplotype
 - NIMA 44
 - noninherited paternal 45
- heparan sulfate proteoglycan 21
- highly immunized patients 43
- histocompatibility complex (MHC) 29
- HLA system 43
- HLA-A 43
- HLA-B 43
- homeostatic control of activity 134
- host-versus-graft reaction 120
- hyperacute rejection 19
- hyperglycemia 109, 121
- hypermutation 38, 41
- hypersensitivity, delayed-type and allograft rejection 11
- hyporesponsiveness, broad nonspecific 92

- IDC (interdigitating dendritic cell) 36, 37, 39
- IDDM (insulin-dependent diabetes mellitus) 46
- IL-1 23
- IL-2 68
- immunized patients, highly 43
- immunological
 - enhancement 49
 - measurements, unresponsiveness 59
 - memory 40
 - studies on the mechanisms of TLI 92
- immunosuppression 120
- immunosuppressive drug therapy 90
- induction
 - of peripheral tolerance to class I MHC alloantigens 53
 - unresponsiveness 59
- insulin-dependent diabetes mellitus (IDDM) 46
- insuloacinar portal system 117
- intelligence 136
- inter-meal intervals 134
- interdigitating dendritic cell (IDC) 36, 37, 39
- interleukin 2, recombinant (rIL-2) 92
- internal
 - desynchronization 130, 134
 - temporal order 130
- intervals between meals 134
- Ir (immune response) genes, non-MHC 31
- irradiation 67
- islet
 - grafts, syngeneic
 - – angiogenesis of 112
 - – revascularization of 114
 - isolation 111
 - of Langerhans 109
 - microcirculation 110
 - transplantation 111
- isolation studies 129

- Kafka, Franz 131
- kidney transplantation, clinical, TLI in 89
- Krabbe's disease 99

- Lamarckian inheritance 13
- Lamb, Charles 127
- leukaemic
 - clonogenic cell 98
 - patients 96
- library circulations 136
- light 128
- Linch, David 15
- liver
 - transplantation 75
 - – indications 76
- lymphoid irradiation, total, in transplantation 87
- experimental studies 88
- optimal regimen 88
- lysosomal storage disease 99

- mammary cancer 105
- meals 134
 - intervals between meals 134
- Medawar, Peter 8, 29, 30
- metabolic rate 134
- MHC 67, 95
 - allogeneic 32
 - alloantigens, I class 53
 - (histocompatibility complex) 29
 - non-MHC immune response (Ir) genes 31
 - restriction 30

- micro-angio-architecture 114
- microcirculatory network 110
- micrometastasis of epithelial tumors 103
- microvascular network 115
- minor H antigens 29, 31
- MLR, patterns of 92
- MLs^a 31
- MLs^c 31
- monoclonal antibody 104
- mutation, hypermutation 38, 41

- natural antibodies 19, 20, 24
- Newton, Isaak 4
 - noreactive 20
- NIMA (noninherited maternal antigen) 44, 45
 - haplotype 44
- NIPA (noninherited paternal antigen) 45
- Nobel Prize 13
- non-MHC immune response (Ir) genes 31
- non-T suppressor cell phenomenon,
 - non-specific 88, 89, 92
- noninherited
 - maternal antigen (see NIMA) 44, 45
 - paternal antigen (see NIPA) 45
 - paternal haplotypes 45

- oscillations, self-sustaining 127
- oscillator 131
 - two-oscillator models 131

- pancreatic islet
 - grafts 109
 - transplantation 81
- peptides, endogenous 30
- perception of time 133
- period time 127
- phosphatidylinositol 32
- plasma suppressor factor 92
- polyclonal antilymphocyte serum 57
- prednisolone 122
- presensitization 91
- pretransplant transfusion effects 53
- protein antigens, exogenous 31
- proteoglycan, heparan sulfate 21

- range of entrainment 130
- recovery process 132
- red cell chimerism 15
- reflections 7
- rejection
 - hyperacute 19
 - phenomena 122
- renal
 - allografts 64
 - transplant 43
- restriction
 - MHC 30
 - molecules 32
- revascularization 110
 - of syngeneic islet grafts 114
- rIL-2 (recombinant interleukin-2) 92
- riser
 - early 129
 - late 129
- roosting 127

- seasonal rhythms 135
- self-sustaining oscillations 127
- Shakespeare, William 134
- skinfold chamber, dorsal, hamster 110
- sleep-wake cycle 127
- Starzl, Thomas 75, 77
- suicides 136
- suppressor
 - cell specificity 50
 - factor, plasma 92
 - T cells 50
 - T-lymphocytes in allograft
 - unresponsiveness 11
- syngeneic islet grafts 112, 114, 115
 - angiogenesis 112
 - revascularization 114

- T cell(s) 21, 67
 - CD4⁺ 31
 - CD8⁺ 31
 - receptors 31
- T-lymphocytes 96–98
 - suppressor in allograft unresponsiveness 11
- TBI (total body irradiation) 67
- temperature, body 129
- temporal organization in man 127
- TLI (total lymphoid irradiation)
 - in clinical kidney transplantation 89–91
 - actual graft survival 90
 - additional fractions of 89
 - current functional graft-status 90 – –
 - deaths 91
 - follow up 89
 - graft rejection 90
 - immunosuppressive drug therapy 90
 - infection 91
 - irradiation regimen 89
 - malignant conditions 91
 - one-year actual survival 89
 - patients and TLI regimen 89
 - immunological studies on the mechanisms of 92

- variables of potential relevance to the safety and efficacy 88
- tolerance 12, 31, 67, 88
 - allograft unresponsiveness 57
 - induction, clinical 57
 - peripheral, induction of, to class I MHC alloantigens 53
- transfusion effects, pretransplant 53
- transgenic mice 32
- transplant, renal 43
- transplantation 18, 109
 - additional fractions of TLI given after 89
 - bone marrow 29, 95
 - of discordant xenografts 17
 - liver 75
 - pancreatic islet 81
 - tolerance 87
 - total lymphoid irradiation 87
 - xenogenic 111
- trypan blue 8
- tumour-specific antigens 30, 33
- two-oscillator models 131
- unresponsiveness 58, 59
 - donor-specific antigen 59
 - immunological measurements 59
 - induction 59
- verapamil 122
- viral antigens 31
- wakefulness 133
- Woolfe, Virginia 134
- xenogeneic
 - islet grafts 120
 - proliferative responses 22
 - transplantation 111
- xenografts, discordant, transplantation of 17
- xenoreactive natural antibodies 20
- xenotransplantation 18
 - clinical, achieving accomodation 23
