

Subject Index

- ADA2 transcriptional adaptor 15
- adhesion molecules 39
- AIDS 133, 134, 171
- anti-Nef antibodies 172
- anti-Vpr antibodies 218, 225, 229
- AP-1 11
- AP-2 31
- astrocytes 215
- ATF-1 82

- baculovirus 217
- Bec 8
- bel* genes 4
- Bel-1 7
- Bel-2 8
- Bel-3 8
- bel-3* 9
 - leucine zipper 9
- Bes 8
- Bet 8, 9
- blood brain barrier 215
- BLV 27
- bone 215
- 21-bp enhancer 82

- c-egr* 84
- C-fms 39
- c-fos* 80, 84
- CARG box 84
- cataract 144
- CD4 172
 - degradation 112–116
 - expression 194–199
 - proteolysis 116
- cell cycle, arrest 213
- CEM cells 185
- central nervous system (CNS) 215
- cerebral-spinal fluid, Vpr protein 227
- chimpanzee 135
- chronic fatigue syndrome 2
- cis* 191
- collagen 39
- CRE 80
- CRE/ATF 29

- CREB 82
- CREB/ATF family 82
- CTL 33
- cytokines 218, 224
- cytotoxic T-cell responses 174

- De Quervain's thyroiditis 2
- DNA polymerase β 80

- EGR-1 33
- endoplasmatic reticulum 112–116
- envelope glycoproteins 114
- Ets 85

- fibroblast growth factor 37
- fibronectin 39
- foamy virus Gag precursor 6
 - GR-box 6
 - nuclear fluorescence 6
 - nuclear localization 6
- fos 39

- G protein 180
- Gag
 - capsid protein, p24 225, 227
 - matrix protein, p17 213
 - p6 212
 - Gag-Pol precursor molecule 6
 - +1 frame 6
 - +1 ribosomal frame 6
 - GAI4 14
 - gibbon 136
 - GLI 85
 - glioblastoma/astrocytomas, cell lines 215
 - GM-CSF 29
 - Graves' disease 2

 - HFV Gag precursor protein 5
 - phosphorylated 5
 - HIV
 - associated nephropathy 146
 - cellular differentiation 213
 - genomic structure 170
 - LTR 83

- HIV
 - replication, reactivation 225
 - /SIV virion 123
- HIV-1 25, 91-101, 171
 - genome, organisation 108
 - gp160 114
 - LTR 13
 - replication 157-166
 - viral infectivity factor (<*vif*>) 157-166
 - - discovery 158-163
 - - mechanisms of action 165
 - - properties 159
- HIV-2 187, 210
 - Gag precursor protein 126
 - replication 220
 - /SIV, genomic organisation 122
- HTLV 79
- HTLV-I 25, 27
- HTLV-II 27
- hypercalcemia 31

- I- κ B 85
- IgG1 172
- IgG3 172
- IgM 172
- IL-1 218
- IL-2 37, 193
 - receptor 37
 - - α 29, 80
- IL-6 37, 39
- immunity, anti-Vpr 229
- infection
 - asymptomatic 224
 - chronic 224
 - Gag 225
 - latent 224
 - nonproductive 224
- internal promoter 10
 - second promoter 10
 - transcription, internal start 10

- Kaposi's sarcoma 37, 148, 149

- latency
 - cell lines 224
 - cellular 224
 - clinical 224, 227, 230
 - PBMC 224
 - reactivation 224, 225
- liver lesions 149
- long terminal repeats (LTR) 211, 212
- LTR 80

- macaque 137
- macrophages 211, 222
- methylation of the viral DNA 3
- mice, transgenic 2
 - encephalopathy 2
 - foday virus genes 2
 - myopathy 2
- monocytes 211
 - adherence to plastic 218
 - cell lines 218, 220
- motorneuron disease 2
- mouse 138, 139
 - mammary tumor virus 11
 - - *sag* gene 11
- multiple sclerosis 2
- muscle 213

- NC protein 6
 - CH boxes 6
 - packaging of genomic RNA 6
- Nef 169-201
 - effects on HIV-1 replication 183
 - expression 175
 - myristylation 179
 - protein structure 176, 179
 - transcriptional effects 190
- nef* 9
- neurological disorders 215
- NF- κ B 13, 27, 83
 - binding site 80
 - p50 83
 - p65 83
 - p105 86

- oncogenes 39
- osteosarcomas, cell lines 215

- pararetrovirus 7
- PCR 224
- peripheral blood lymphocytes (PBL) 222
- peripheral blood mononuclear cells (PBMC) 217, 222, 228
- phorbol ester 224
- phosphoprotein 181
- plus-strand cDNA synthesis 4
 - gapped unintegrated DNA 4
- polypurine tract 4
- preintegration complex 213
- proliferation 217
- psoriasis 143, 144
- PTHrP 31, 33

- R-U5 14
 - RNA secondary structure 14
 - suppression of foamy virus gene expression 14
- rabbit 137, 138
- Rev protein 10, 91-101, 210
 - functions 100
 - in the viral life cycle 93, 94
 - multimerization 97
 - response element 94, 95
- rev* 27
 - effector domain 99
- Rex 10
- rex* 27, 35, 79
 - Rev 35

- rhabdomyosarcoma 213, 217
- RNA
 - HIV 224
 - splicing 92
- seroepidemiological survey's 2
 - HFV infections 2
- serum, Vpr content 227
- SIV 187, 210–212
 - lentivirus, genomic structure 170
- sodium azide 218
- superantigen 198
- T cell depletion 215
- Taf 7, 15
 - acidic activation domain 15
 - dimerization 18
 - DNA binding 17
 - dominant negative phenotype 18
 - phosphorylation 17
 - promoter specificity 17
 - responsive elements 12
 - – enhancer elements 13
 - Taf_{HFV/VP16} 17
 - transactivator of foamy viruses 4
- taf* 9, 15
 - minimal activation domain 15
- TAR 35
- Tat 175
- tat* 35, 39
 - activating cellular genes 68
 - activating viral genes 68
 - associated proteins 67
 - binding to TAR RNA 59
 - function
 - – *cis*-acting DNA 56, 57
 - – determination 58
 - – therapeutic implications 70
 - mediated transcriptional activation 63
 - protein, structure 53
 - regulation of gene expression 52
- Tax protein 80
 - CREB complex 82
 - domains 86
- tax* 27, 29, 33, 79
 - CRE/ATF 29
- TGF β 1 37
- THP-1 85
- THP-2 85
- TNF β 37
- TNF receptor 37
- transferrin receptor 218
- TRE-2 85
- tumor suppressor gene 214, 215
- unintegrated linear viral DNA copies 3
- vaccines, live attenuated 215
- vif* *see* HIV-1, viral infectivity factor
- viral protein X *see* Vpx
- virions 123, 124
- VP16 14
- Vpr and Vpx 129
- vpr* 9
 - antisense 211
- Vpu protein 107–118
 - membrane topology 108
 - role in virus release 109–112, 116
 - structural features 109
 - synthesis 108
- Vpx 121–129, 211
 - amino acid sequence structure 127
 - amphipathic helix 127
 - packaging 126
 - replication 128
 - virion incorporation 124, 127
