## Advanced Texts in Physics

This program of advanced texts covers a broad spectrum of topics which are of current and emerging interest in physics. Each book provides a comprehensive and yet accessible introduction to a field at the forefront of modern research. As such, these texts are intended for senior undergraduate and graduate students at the MS and PhD level; however, research scientists seeking an introduction to particular areas of physics will also benefit from the titles in this collection.

# The New Springer Global Website

## Be the first to know

- ▶ Benefit from new practice-driven features.
- ▶ Search all books and journals – now faster and easier than ever before.
- ▶ Enjoy big savings through online sales.

springeronline.com – the innovative website with you in focus.

springeronline.com

The interactive website for all Springer books and journals
