

# Subject Index

- abscisic acid (ABA) 47, 138, 154  
actin binding protein (ABP) 98, 109  
actin filament (AF) 98, 105, 285  
ADA coactivator 317  
ADP-glucose pyrophosphorylase 206  
*Agrobacterium tumefaciens* 15, 223, 308  
alkaloid 231, 244  
 $\alpha$ -amanitin 267  
amplified fragment length polymorphism (AFLP) 9, 244  
amyloplast 204  
anababine 237  
anabasine 237  
anaphase-promoting complex (APC) 54  
anatabine 238  
anattaline 238  
antiauxin 165  
aphidicolin 3, 9, 38, 83, 149  
autophagic process 291  
auxin 47, 136, 138, 149, 161, 174, 181  
auxin autotrophy 151  
auxin binding protein 1 (ABP1) 170, 174, 183  
auxin-responsive gene 176  
auxin starvation 157  
azuki bean 226
- B deficiency 250, 261  
B-polysaccharide complex 252  
B-type cyclin 25  
Baculovirus expression system 43  
BCECE 89  
6-benzylaminopurine (BA) 205  
bioinformatics 336  
boron (B) 221, 250  
brassinosteroid 140  
5-bromodeoxyuridine (BrdU) 202  
b-ZIP protein 154  
BY-2 proteome database 335
- Ca<sup>2+</sup> 253  
cafein 124  
calmodulin (CaM) 106  
catalase 260
- Catharanthus roseus* 2  
CCAAT box 29  
Cdc25 134  
CDK inhibitor (CKI) 44  
2B-13 cell line 151  
cell cycle 7, 84  
cell cycle dependent element (CDE) 31  
cell cycle genes homology region (CHR) 31  
cell division-inducing factor (CDF) 151  
cell expansion 161, 169, 182, 227, 292  
cell plate 116, 127, 226, 292  
cell wall 217  
cell wall regeneration 221  
Cellulase Onozuka RS 2, 278  
cellulose 218  
cellulose microfibril (CMF) 81  
check point 60  
chemostat culture 161  
cis-element 24  
confocal laser scanning microscope 16, 18, 95  
COP I vesicle 290  
COP II vesicle 289  
cortical microtubule 81  
CRE-*loxP* 11  
CycD 134  
cyclin 7, 37, 52  
cyclin-dependent kinase (CDK) 7, 25, 37, 52, 134  
CyDye 339  
cytokinin 47, 132, 135, 169  
cytokinesis 61, 116, 225, 285  
cytokinin 164, 205  
cytokinin receptor 135  
cytoplasmic streaming 105  
cytoskeleton 10, 67
- D-box 55  
2D PAGE 335, 336, 337  
2D liquid chromatographic separation 338  
D-type cyclin (CycD) 43  
dexamethasone 303, 308  
4',6-diamidino-2-phenylindole (DAPI) 194  
2,6-dichlorobenzonitrile (DCB) 221

- 2,4-dichlorophenoxyacetic acid (2,4-D) 205, 239  
dihydrozeatin 132  
DNA-binding heterodimerization partner (DP) 40  
DNA binding protein 194  
DNA methylation 274  
DNA polymerase  $\alpha$  149  
DNA polymerase I 204  
DNA polymerase III 204
- E2F 24, 40  
endomembrane system 283  
endoplasmic reticulum (ER) 284  
endoreduplication 42, 173  
endosomal membrane 89  
ER-to-Goldi transport 289  
ethanol inducible promoter 303  
ethylene 140  
evacuolated protoplast 100  
expansin 171  
 $\alpha$ -expansin 219  
expressed sequence tag (EST) 298  
extracellular pH 171  
extracellular polysaccharide (ECP) 256
- $\sigma$ -factor 197, 198  
FM-64 83  
fluoresceinyl xyloglucan 219  
fluorescence microscopy 194  
fluorescent xyloglucan 220  
fusion tube 123
- G-protein 136, 150, 183  
GAL4 DNA binding domain 303  
Gateway conversion technology 11  
GCN5 coactivator 317  
GFP-tagging 16, 223  
gibberellin 140  
 $\beta$ -1,3-glucanase 267  
glucocorticoid inducible promoter 303  
glucocorticoid receptor 13, 303  
glucosyltransferase 261  
 $\beta$ -glucuronidase (GUS) 308  
glutathione S-transferase (GST) 260  
glycoprotein 152  
O-glycosylation 293  
Goldi apparatus 208, 285  
green fluorescent protein (GFP) 14, 18, 55, 83, 309  
guaiacol-type peroxidase (POX) 218
- H<sup>+</sup>-ATPase 175  
habituation 151, 164  
high pressure freezing and freeze substitution electron microscopy 123
- histidine kinase 135  
histone 317  
histone acetyltransferase (HAT) 317
- ICKI 138  
immunofluorescence microscopy 81  
immunogold labeling 226  
in vitro labeling 295  
in vitro transcription 194  
indole-3-acetic acid (IAA) 141, 143  
inhibitor 296, 297  
isoprenoid 242
- jasmonate 139
- K<sup>+</sup>-channel 150  
2-keto-3-deoxysugar 256  
kinesin 120  
kinetochore 74  
Knolle 26
- lovastatin 133, 206  
liposome 3
- M phase specific activator (MSA) 26, 33  
MAP4 68  
MAPKKK 125  
65kDa MAP 102  
mass spectrometry 141, 142, 143  
mastoparan 186  
membrane hyperpolarization 176  
metaphase 55  
methyl jasmonate 238, 239, 243  
N-methylputrescine 235  
microelement 250  
microfilament 67, 98  
microsomal membrane 288  
microtubule (MT) 66, 81, 98, 117  
microtubule-associated protein (MAP) 98, 101, 111  
microtubule nucleation 72, 74  
microtubule nucleation complex 67  
microtubule-organizing center (MTOC) 66, 88  
miniprotoplast 100, 110  
mitochondria 192  
mitogen-activated protein kinase (MAPK) 125, 176  
mitosis 9, 55, 68  
Myb protein 24, 27, 33  
Myosin 105, 106  
myosmine 237
- NACK1 26, 123  
1-naphthaleneacetic acid (NAA) 185  
nicotine 232, 239

- nicotinic acetylcholine receptor (nAChR) 232  
 nicotinic acid 235, 238  
 NPK1 125  
 nuclear localisation signal (NLS) 306  
 nuclear targeting 319  
 nucleosome 317  
 nucleus 266  
 NY-Y factor 30
- Organelle 192
- pectic polysaccharide 253  
 Pectolyase Y23 278  
 peptide mass fingerprint 341  
 phenylalanine ammonia lyase (PAL) 240  
 phenylpropanoid pathway 241  
 phosphate 150  
 phosphate starvation 158  
 phospholipase A2 175  
 phragmoplast 3, 19, 84, 116, 121, 127, 225  
 phytoalexin 242  
 phytosulfokine- $\alpha$  162, 172  
 plasma membrane 251  
 plasmodesmata 284  
 plastid 192  
 Pol I 266  
 Pol II 266  
 Pol III 266, 269  
 polyamine 240  
 preprophase band (PPB) 19  
 pre-tRNA 275  
 prevacuolar compartment 286  
 5' processing 276  
 programmed cell death 258  
 promoter-activating system 305  
 promoter-repressing system 305  
 propyzamide 3, 116  
 protease inhibitor 110  
 proteasome 54  
 190-kDa protein 103  
 210-kDa protein 103  
 protein identification 339  
 protein profiling 333  
 protein localization 14  
 protein phosphatase 2A (PP2A) 88  
 protein-protein interaction 326, 335  
 proteolysis 54  
 proteome 332, 334  
 proteomics 332  
 protoplast 222, 251  
 putrescine 234, 240  
 putrescine *N*-methyltransferase 235
- quinolinate phosphoribosyltransferase 236
- rhamnogalacturonan II (RG-II) 252  
 retention signal 284  
 retinoblastoma (Rb) protein 39, 45  
 RNA polymerase 197  
 RNase T1 fingerprinting 277  
 rRNA 268  
 run-on transcription 194
- 5S rRNA 275  
 SCF complex 136  
 scopoletin 242  
 scopolin 242  
 secretory pathway 227  
 secretion 283  
 securing 60  
 secondary metabolism 231  
 sequence ladder 341  
 serotonin 186  
 short interspersed nuclear element (SINE) 274  
 Southern hybridization 202  
 Spc97p 71, 76  
 Spc98p 71, 76  
 spindle 19, 60  
 splicing 276  
 split-ubiquitin system 322, 325  
 starch branching enzyme 207  
 starch synthase 207  
 sucrose 47  
 synchronization 3, 16, 84, 172
- tagetitoxin 198  
 TATA box 273  
 Taxol 110, 119  
 Telomerase 137  
 tetracycline inducible promoter 303  
 Tet repressor (TetR) system 303, 304  
 TGV system 306  
 TMBP200 103  
 tobacco mosaic virus (TMV) 2  
 tobacco XD6 2  
 tonoplast 287  
 toxicity 312  
 transport vesicle 289  
 transacting factor 265  
 transcriptional coactivator 318  
 transcriptional regulation 24  
 transcriptome 298  
 transfection 324  
 tRNA 272  
 $\alpha$ -tubulin 73, 76  
 $\beta$ -tubulin 76  
 $\gamma$ -tubulin 69, 70, 76, 88  
 $\gamma$ -tubulin ring complex ( $\gamma$ -TuRC) 68, 76  
 $\gamma$ -tubulin small complex ( $\gamma$ -TuSC) 68, 76

- tubulo-vesicular network (TVN) 123
- turgor 169
  
- U3 snRNA 269
- U6 snRNA 271
- ubiquitylation 53
  
- vacuolar membrane 83
- vacuolar sorting signal (VSS) 286, 290, 291
- vacuolar targeting 290
- vacuole 287
  
- vital staining 294
- VP16 transactivation domain 303
  
- WD-40 repeat protein 150
  
- xylanase 219
- xyloglucan 218
- xyloglucan endotransglucosylase/hydolase  
(XTH) 218, 219, 223, 224, 226
  
- zeatin 132
