

Subject Index

- acclimatization 11, 38, 56, 160, 179, 337
activated charcoal 82, 246, 324, 396, 419, 483
adventitious buds 51, 58, 427, 481
– shoots 275, 311, 457
Aesculus spp. 111–141
aesculin 125
afghan pine 269–287
Agrobacterium tumefaciens 19, 284, 390, 403
agropine 284
albinism 135
Amelanchier alnifolia 164–179
androgenesis 116, 135
androgenic embryos 127
angiosperm trees 1–237
anther culture 26, 47, 120
anthocyanin 201
axillary buds 276
- Bacillus thuringiensis* 284
bamboos 221–237
BAP 168, 217, 258, 455
benzylamino purine 9
black cherry 3–22
– spruce 423–445
brachyblast culture 326
bud induction 309, 351, 456
- Caesalpinaceae 142
Calamus spp. 211–220
callus culture 26, 368, 415, 426, 460, 484
casein hydrolysate 28, 116
Caribbean pine 254–266
caulogenesis 324, 370
cell suspension 277
Ceratocystis fimbriata 205
Cercis canadensis 142–151
C. siliquastrum 142
clonal propagation 414
cold storage 36, 431
commercial production 15
cryopreservation 404, 437
common fig 76
culture conditions 35
– medium 197
Cupressaceae 479
- cytokinins 352, 486
- differentiation 35
diseases 63, 96, 152, 167, 223, 289, 307, 318,
359, 449
DMSO 349
- eastern red bud 142–151
eastern white pine 358–382
egg-cone pine 304–316
Eldarica pine 269–287
electron microscopy 199
electroporation 108, 403
embryo culture 25, 68, 128, 184, 228, 245,
294, 326, 464
embryoids 72, 225
embryogenic suspension 99
embryogenesis 131, 181
endosperm culture 64
Engelmann spruce 408–422
Eriobotrya japonica 62–75
- Ficus* spp. 76–93
Ficus bejamina 82
F. carica 79
F. elastica 80
F. lyrata 82
F. pumila 87
F. religiosa 85
field performance 396, 466
– test 16
– transplanting 176
freeze preservation 400
frost resistance 472
fungicides 193
Fusarium moniliforme 385
- genetic stability 15, 58, 107, 181, 250, 299,
401
– transformation 59, 108, 403
– variation 265
gibberellic acid 9, 135, 176
glycine 323
glycoprotein 300
Gramineae 221

- grenadine 44
 growth regulators 34
 gymnosperm trees 238–490
- haploid culture 367
 Hippocastanaceae 111
 horse chestnut 111–141
- in vitro approaches 6, 64, 98, 113, 144, 156,
 168, 224, 243, 273, 293, 309, 320, 362, 414,
 426, 450, 473
 – multiplication 484
 – mycorrhization 332
 – rooting 182
- Judas tree 142–151
- larch 446–470
Latrix desidua 446–470
 Lauraceae 180
 leaf tip culture 475
 Leguminosae 142
 linden trees 152–163
Liriodendron spp. 94–110
 liriodine 94
 loblolly pine 383–407
 loquat 62–75
 luciferase assay 403
- Magnoliaceae 94
 Maritime pine 317–338
 mazzard cherry 6
 media 34, 64, 100, 161, 228, 245, 271, 274,
 310, 323, 364, 392, 432, 489
 meristem culture 8, 27, 119, 128, 324
 metabolic studies 299
 micrografting 24, 326
 micropropagation 28, 78, 131, 161, 168, 195,
 202, 215, 257, 275, 308, 334, 340, 388, 395,
 416, 467
 morphogenesis 45
 multiple buds 261, 343
 – shoots 217
- NAA 217, 227, 310, 341, 483
- organ culture 48, 366
 organogenesis 73, 181, 225, 370, 395
- pests 213, 259, 271, 306, 359
 phenolic production 8
 phytoalexins 195
Picea glauca 423–445
P. mariana 423–445
 Picloram 432
 Pinaceae 401, 423
 pine gall rust 339
- Pinus caribaea* 254–266
P. eldarica 269–287
P. elliottii 288–303
P. oocarpa 304–316
P. pinaster 317–338
P. ponderosa 339–382
P. strobus 358–382
 pitch canker 290
 plane tree 191–210
 plant regeneration 132, 249, 395
 Platanaceae 191
Platanus spp. 191–210
Platanus acerifolia 205
 pollen diamorphism 139
 – polymorphism 120
 polyembryony 387, 396, 428
 pomegranate 44–61
 ponderosa pine 339–357
 proline 118
 propagation 78
 protoplasts 25, 102, 230, 278, 295, 311, 327,
 401, 437
 provenance testing 5
Prunus axium × *P. pseudocerasus* 25
Prunus cerasus 23–43
P. serotina 3–22
Punica granatum 44–61
- rattans 211–220
 regeneration 35, 264, 279, 297, 327
 RFLP 107
 root culture 55
 root rot 449
 rooting 10, 158, 283, 324, 328, 464, 485
- Saskatoons 164–179
Sassafras randaiense 180–190
 secondary needles 260
 – products 108, 201
 shoot culture 473
 shoot tip culture 46, 65, 181
 single-gene mutations 15
 Slash pine 288–303
 sodium alginate 400
 somaclonal variation 59, 107, 135, 143, 204,
 273, 277
 somatic embryogenesis 68, 116, 145, 185,
 224, 236, 251, 261, 275, 372, 396, 428
 somatic hybrid 25
 sour cherry 23–43
 sterilization 8, 34, 64, 100, 113, 154, 197,
 244, 273, 293, 308, 321, 392, 454
 stone fruits 6
 storage protein 379
 suspension culture 15, 101, 196, 228, 249,
 294, 433
 sycamore fig 76

- Thuja plicata* 479–490
- TIBA 370
- Tilia* spp. 152–163
- Tiliaceae 152
- tissue culture 25
- transfer to field 396
- transfer of plants 283, 297
- transient gene expression 440
- transplanting 67, 184
- ultrastructure 125, 299
- vegetative propagation 215, 243, 256, 426
- western red cedar 479–490
- white spruce 423–445
- yellow poplar 94–110
- zeatin 27
