# Theory and Applications of Economic Indices

Edited by  
**Wolfgang Eichhorn, Rudolf Henn, Otto Opitz, Ronald W. Shephard**  
1978. 758 pages. Paperbound DM 89,-/U.S.\$ 35,60\*. ISBN 3 7908 0191 7.

An international symposium on economic indices was held at the University of Karlsruhe in April, May, and June of 1976, involving participants from Belgium, Canada, Finland, Great Britain, Luxembourg, Sweden, Switzerland, and the USA. There were also many participants from German universities and other German institutions who made contributions. The majority of German contributors were from Karlsruhe.

For the discussions of the seminar, 32 papers spanning a large part of the field of economic indices were presented. These papers are published in this volume as a coherent collection under the title of THEORY AND APPLICATIONS OF ECONOMIC INDICES.

*"This particular collection contains some important papers . . . The editors . . . are to be congratulated on an unusually good Conference volume."*

*W.M. Gorman in THE ECONOMIC JOURNAL, Vol. 89 (June 1979)*
