

Index

A

ABE fermentation, 208
Acetyl CoA carboxylase (ACCase), 189
Actinobacteria, 41
Actinoflora, 111
Actinomycetes, 37, 40, 46, 111
Actinomycin D, 39
Acute inflammation, 63
African rice, 6
Agricultural biodiversity, 3
Agrobacterium, 24
Agrobiodiversity, 3
Air pollution, microbial bioremediation, 158
phytoremediation, 169
Alcohols, 185
Alkaline protease inhibitor (API), 122
Alkaloids, 88
Allicin, 74
Amaranth, 17
Aminoglycoside, 42
Anthracenones, 39
Anthracophyllum discolor, 154
Anthracyclines, 39, 74
Anthraquinones, 85
Anti-inflammatory agents, 63
Antibiotics, 37, 111, 117
Anticancer activity, 59
Anticancer compounds, 37, 74
Antifungals, 117
Antimicrobial activity, 59, 79
Antineoplastic activity, 39
Antitumor activity, 37
Archazolides, 47
Aridicins, 46
Arsenic, 167
Arsenite, 154

Avermectins, 120
Avicennia schaueriana, 166

B

Bacteriome, 114
Bacterioplankton, 172
Barley, 4, 9
Benz[a]anthracene, 153
Benzene, toluene, ethylbenzene, and xylene
(BTEX), 169
Berberine, 88, 90
Bioaugmentation, 139
Biodiesel, 185
Japan, 200
Biodiscovery, 111
Biodiversity, 3, 37, 59, 137
Bioenergy, microalgae, 188
Biofuels, 185
Biological nitrification inhibition (BNI), 21
Bioprospecting, molecular, 142
nonmolecular, 141
Bioremediation, 137, 147
Biosynthetic potential, 185
Bleomycin, 39
Brachialactone, 21
Bread wheat, 7
2,3-Butanediol, 211
Butanol, 185, 208

C

Cadmium, 154, 160–168
Caffeic acid, 85
Calcheamycin, 39
Camptotheca acuminata, 51

Camptothecin, 51
 Cañahua (*Chenopodium pallidicaule*), 20
 Carbohydrates, 185
 Cardiac glycosides, 73
 Cardiovascular diseases (CVDs), 59, 72
 Cellulolytic fungi, 121
 Central nervous systems (CNS), 62
 Cereals, 4
 crop biodiversity, 1
Chaetomium globosum, 51
 Chili peppers, 17
 Chitinase, 122
Chlorella vulgaris, CO₂ absorption, 159
 Chondrochloren, 48
Chondromyces crocatus, 48
Chondromyces pediculatus, 48
 Cinnamaldehyde, 88
 Climate change, 1
 CNS, 59
Coptis chinensis, 90
Coptotermes lacteus, 127
Cornitermes cumulans, 123
 Coumarins, 87
 Crop genomics, 1
 Crop improvement, 1
Cubitermes niokoloensis, 123
Cubitermes spp., 123
 Curcumin, 74
Cymbidium goeringii, 73

D

Daptomycin, 52
 Daunorubicin, 39
 Dentigerumycin, 111
 Diacylglycerolacyltransferase (DGAT), 190
 Diallyl sulphide, 74
 Dibenzofurans, 153
 Digalactosyldiacylglycerol (MGDG), 189
 Digitalis glycosides, 60
 Digoxin, 73
 Diterpenes, 119
 Dopamine, 62
 Doxorubicin, 39
 Duckweed, 167
 Dynemicin, 45

E

Earthworms, 170
 Eco-taxonomy, 111
Eisenia foetida, 170

Eleutherine americana, 71
 Emmer wheat, 7
 Emodin, 72
 Endosulfan, 155
 Eneidyne, 39
 Energy plants, 199
 Environmental tools, 137
 Enzymes, oxidative, 121
 Epirubicin, 39
 Epothilones, 39
 Essential oils, 87
 Ethanol, 185, 187
 fuel production, 200
 synthesis, bacterial, 204
 yeast, 202
 Etnangien, 49
 Eugenol, 88
Euphorbia lathyris, 200
Evodia rutaecarpa, 70
 Evodiamine, rutaecarpine, 70
 Evolutionary clock, 142
 Exploration, 137

F

Fatty acids, 189
Fatoua pilosa, 87
 Fe-hydrogenase, 191
 Fidaxomicin, 52
 Fish farm sediments, 171
 Flavones, 85
 Flavonoids, 85
 Flavonols, 85
 Fluoranthene, 170
 Food security, 1
 Functional genomics, 143
 Fungal entomopathogens, 117
 Fungi, 37
 ants, 117

G

Gamma-aminobutyric acid, 62
 Gasoline, 185
 Gastrointestinal (GI) ulceration, 89
 Genetic engineering, 145
 Genetic resources, 1
 Genetic variation, crops, 5
 Genistein, 74
 Geosmin, 120, 128
 Gifhomenolones, 120
 Gigantol, 72, 73

- β -1,3-Glucan recognition proteins (BGRPs), 122
- Glucanases, 122
- Glutamate, 62
- Glycosyl glycerides, 188
- Goca (*Oxalis tuberosa*), 17
- Golden Rice, 25
- Good agricultural and collection practices (GACP), 92
- Goshuyamide, 70
- Greenhouse gases (GHG), 21, 169
- H**
- Heavy metals, 155, 160
phytoremediating plants, 145
- Helicobacter pylori*, 88
- Hinkitiol, 72
- Hodotermes mossambicus*, 119
- Human population pressure, 91
- Hydrocarbons, 185
- Hydrogen, bacteria, 211
microalgae, 191
production, nitrogenase-mediated, 192
- Hydrogenases, 191
- Hypericin, 51
- I**
- Imidacloprid, 165
- Inflammation, 63
