 - explosive reopening, 14
 - lower airways, 9
 - secretions, 14
 - upper airways, 9, 18
- Airway walls, 4, 9, 43
 - non-rigid walls, 43
 - rigid walls, 43
- Angle 56, 59, 124, 125, 127
 - incident angle, 56, 124, 125
 - reflection angle, 56, 124
 - refraction angle, 59, 127
- Angle of scattering, 118, 119
- Anisotropic deflection, 122
- Anisotropic scattering, 117, 167
- Anisotropy of tissues, 121
 - forward direction, 121, 122
- Anode, 100, 181
- Anterior upper chest, 84
- Aortic valve, 6, 33
- Apneic respiratory efforts, 29
- Apneic sounds, 28, 29
- Application pressure, 66, 67, 71
- Artefacts, 139, 153, 171
 - heart-induced pulsations, 153
 - movement artefacts (acoustical), 74
- Arterial fraction of I , 137
- Arterial blood, 131, 139, 155, 158, 159, 176
- Arterial circumference, 136
- Arterial compliance, 127, 132, 137, 139, 175, 176
- Arterial occlusion, 176
- Arterial oxygenated blood, 113
- Arterial radius, 130, 135
- Arterial vessels, 154, 155, 169, 174, 175, 176
 - distensibility of the arterial vessel, 173
 - stiffness, 177
- Arterial volume, 130

- Arterioles, 127
 Arterio-venous anastomoses, 127, 173
 Artificial diaphragm, 63, 66
 Artificial ear, 74
 Artificial exposure, 182
 Artificial sounds, 86
 Atoms, 96, 97
 Atria, 4, 6, 8, 193
 Atrial gallop, 8
 Atrioventricular valves, 5, 83
 Auscultation distance, 38
 Average free path of light, 109, 121, 122, 170, 172
 Aversion response, 184, 185
- B**
- Backward scattering, 121, 126
 Backward-propagating flux, 171, 172
 Banana-shaped light path/region, 162, 167
 Bell, 64, 65, 68, 70
 bell with the diaphragm, 70, 74
 bell without the diaphragm, 70, 74
 decreasing length, 65
 decreasing volume, 65
 entrance area of the bell, 68
 funnel, 69
 increasing area, 65
 internal volumes of transmission pathways, 69
 shallow bell, 68
 volume, 68
 trumpet-shaped bell, 67
 Bending of waves, 55, 58, 124, 126
 Bernoulli's equation, 19
 Black-body radiation, 96, 185, 188
 Blood, 109, 110, 113, 131, 161
 arterial blood, 131, 139, 155, 158, 159, 176
 capillary blood, 128
 venous blood, 128, 137, 139, 154, 158, 176, 177
 volume fraction of blood, 110
 Blood oxygenation, 92, 128, 130, 139, 152, 153, 158, 160, 162, 172, 174, 198
 deoxygenated blood, 112
 oxygenated blood, 112
 Blood perfusion, 107, 154, 162, 169, 174
 Blood perfusion index, 168
 Blood pressure, 132, 133, 135, 192, 197
 mean blood/arterial pressure, 132, 176
 passive mechanical transmission, 133
 Blood's turbulence, 4
 Blood volume, 92, 127, 149, 150, 163, 176
 decreased blood volume, 150
 low pulsatile fractions, 150
 poor perfusion, 150, 153, 158, 169
 volume changes, 159
 Blue-light retinal injury, 183, 188
 Body dimensions, 38
 Body mass index, 52
 Body sounds, 75, 76, 86, 126
 apneic sounds, 28, 29
 breathing sounds, 71, 80
 expiratory sounds, 53, 84, 85
 heart sounds, 4, 8, 29, 39, 44, 51, 52, 56, 66, 71, 73, 77, 83, 86, 192
 high frequency body sounds, 43, 51, 56, 57, 59, 66, 69, 73
 inspiratory sounds, 28, 53, 84
 low frequency body sounds, 43, 51, 56, 66, 68, 69, 71, 73
 lung sounds, 9, 29, 39, 43, 51, 56, 66, 73, 77, 84, 86
 mixture of body sounds, 60
 normal sounds, 51
 pathological sounds, 51
 snoring sounds, 17, 29, 39, 43, 46, 51, 56, 73, 85, 86
 Body sound sensor, 2
 air leaks, 71, 73, 76
 Bone, 38, 103
 Boundary, 56, 125
 boundary conditions, 46
 Breath holding, 198
 Breathing, 137
 Breathing sounds, 71, 80
 classification of breathing, 81
 residual cardiac component, 82
 variability of breathing sounds, 81
 Bronchial airways, 84
 Bronchovesicular sounds, 12
- C**

 - Systolic radius, 131
- T**
- Temperature, 37, 96
 - Thermal burn/damage, 183, 184, 187
 - Thermal conduction, 49
 - Thermal effects/impact, 106, 184, 185, 188
 - Thermal energy, 96, 98
 - Thermal interactions, 183, 189
 - blood flow, 186
 - regulatory mechanisms (thermal), 183, 187, 189
 - Thermal loading, 188
 - Thermal pain, 187
 - Thermoregulatory functions, 128
 - Third heart sound, 8

- Time constant of regulatory processes, 107
 Time delay, 130, 153, 158, 198, 200
 Time domain, 77, 78, 80, 192, 195, 198
 Tissue (biological), 38, 61, 103, 110, 121, 122, 131, 137, 139, 151, 159, 179
 adipose layer/tissue, 137, 163, 165, 174
 air, 50, 61
 blood, 109, 110, 113, 131, 161
 bone, 38, 103
 cardiovascular structures, 84
 chest, 137, 138, 174
 collagen fibers, 117, 120
 earlobe (sensor), 137, 153, 173, 200
 eye, 92, 182–184
 fat, 52, 103, 108, 110, 112
 finger (sensor), 137, 153, 173, 174, 190, 198
 forehead, 173
 lipids, 120, 122
 lung tissue/parenchyma, 38, 44, 52
 mediastinum, 43, 44, 84
 motion-induced tissue deformation, 139
 muscle, 108, 110, 112, 122, 137, 163, 165
 respiration-induced tissue deformation, 139
 skin, 57, 63, 96, 110, 117, 119, 120, 122, 126, 137, 152, 153, 161, 163, 165, 166, 168, 169, 174–176, 182–189
 water, 38, 50, 110, 117, 122, 161
 Tissue-photon interaction, 122
 many scattering events, 123
 single absorption event, 123
 Total absorption coefficient, 50, 122
 Total attenuation/absorption of light, 147, 168
 Total transmitted intensity, 128
 Tracheobronchial lung sounds, 10, 16, 53
 Translational energy, 49
 Transmission efficiency of resonator, 46, 67
 Transmission of body sounds, 35
 Transmission of light, 101
 Transmittance mode, 137, 146, 148, 150, 151, 155, 161, 166–170, 173
 Transmitted light intensity, 93, 127, 165, 167, 170, 171, 173, 180, 181, 191, 195, 198
 Transmural pressure, 175
 Transparency to light, 105
 Transverse electromagnetic wave, 95
 Transverse sound wave, 60
 Tricuspid valve, 5, 32
 Trumpet-shaped bell, 67
 Tubing, 68, 74, 75
 wall of the tubing, 76
 Turbulent air flow, 4, 10, 11, 17, 21, 28
- U**
 Ultraviolet light, 106
 Underdamped system, 65
 Unmasking of high frequencies, 66, 71
 Uvula, 21
- V**
 Valence band, 98, 101, 181
 Variability of breathing sounds, 81
 Vasoconstriction, 150, 153, 169, 174, 179, 198
 vasoconstrictive stimuli, 179
 Vasodilation, 107, 140
 Vein circumference, 136
 Veins/venous vessels, 127, 154
 Venous fraction of I_{DC} , 137, 138
 Venous blood, 128, 137, 139, 154, 158, 176, 177
 peripheral venous blood, 136
 Venous compliance, 127, 137, 139
 Venous deoxygenated blood, 113
 Venous pulsations, 150
 Venous return of blood, 176
 Venous vessels, 137, 155, 176
 collapse, 176
 Ventricle, 4–6, 8, 130, 193
 Ventricular contraction, 127
 Ventricular gallop, 8
 Venules, 127
 Vesicular lung sounds, 11, 16, 53
 Vibration, 2, 17, 20, 23, 96, 105, 108, 114
 Vibration of the skin, 60, 62
 Vibrational motion, 96
 Vibrational energy, 49
 Visible light, 106, 110, 114, 119, 122, 126, 161, 182, 183–187
 Volume effects, 47, 103
 Volume elasticity, 37
 Volume pulsation, 175, 176, 179
 Voluntary apnea, 198, 200
