

# Index

## A

Achieve output consensus, [72](#)  
Achieve output containment, [107](#)  
Achieve output formation-containment, [149](#)  
Achieve state consensus, [36](#), [57](#)  
Achieve state containment, [118](#), [135](#)  
Achieve state formation-containment, [135](#)  
Achieve state practical consensus, [36](#)  
Achieve time-varying output formation, [72](#)  
Achieve time-varying state formation, [56](#)  
Adjacency matrix, [26](#)  
Admissible, [30](#)  
Asymptotically stable, [28](#)

## C

Child node, [25](#)  
Complement consensus subspace, [26](#)  
Consensus error bound, [36](#)  
Consensus subspace, [26](#)  
Controllable, [28](#)

## D

Detectable, [28](#)  
Directed graph, [25](#)

## F

Feasible, [56](#), [58](#), [72](#), [73](#)  
First equivalent form, [30](#)  
First-order swarm system, [7](#)  
Follower, [107](#), [135](#)

## G

Graph, [25](#)

## H

High-order linear time-invariant swarm system, [9](#)  
Hurwitz matrix, [27](#)

## I

Impulse-free, [30](#)

## K

Kronecker product, [27](#)

## L

Laplacian matrix, [26](#)  
Leader, [107](#), [135](#)

## N

Neighbor, [26](#)

## O

Observable, [28](#)  
Output consensus function, [72](#)  
Output formation reference function, [72](#)  
Output space decomposition, [26](#)

## P

Parent node, [25](#)

## R

R-controllable, [30](#)  
Regular, [29](#)

**S**

Second-order swarm system, 7  
Spanning tree, 25  
Stabilizable, 28  
State consensus function, 36, 57  
State formation reference function, 56

State practical consensus function, 36

State space decomposition, 26

**U**

Undirected graph, 25
